LECTURES AT NORTHWESTERN

Frederick E. Clerk, superintendent of the New Trier Township high school, will give a series of lectures on high school administration and personnel work, at Northwestern university this summer. The lectures will be for graduate students in the school of education at the university.

PLAY FOR DIRECTORS' CUP

The second round of the directors' trophy tournament will be played at the North Shore Golf club this Saturday. On Sunday a mixed two ball foursome and medal play will be the features.

Miss Frances Oleson is at home in Kenilworth from the Hillside school in Connecticut.

GIVES LECTURE ON CHRISTIAN SCIENCE

Editor's note: Following is an extract from a lecture on Christian Science given Sunday, June 10, in the First Church of Christ, Scientist, in Winnetka, by James G. Rowell, member of the Board of Lectureship of the Mother Church, the First Church of Christ, Scientist, in Boston, Mass.

The Discoverer and Founder

It was the earnest study of the healing related in the Bible which led Mrs. Eddy to the discovery of the fact that true Christianity is scientific. It was her spiritual mindedness, her fidelity, her love for mankind, and her perseverance in the face of almost insurmountable difficulties that made possible not only the discovery, but the establishment of Christian Science.

This knowledge of God's all-power and ever-presence had healed her of an injury resulting from an accident, declared by her physician to be fatal. She was convinced that this understanding would free mankind from every enslaving shackle. She had always been a faithful, earnest student of the Bible, but with her healing and the discovery that accompanied it, she delved into the Bible with increased interest and with a definite object in view. She wanted to know the Science of her healing. She longed to help free others from the bondage of sickness which many years of invalidism had taught her is slavery indeed.

In due time she gained some measure of the desired understanding and was soon explaining the truth she had discovered to those who would listen. Many would not even listen, and many of those who did listen counseled her to drop her investigations. Mrs. Eddy applied her new-found knowledge to cases of sickness and it healed others as it had healed her.

The early years following the discovery of Christian Science tested Mrs. Eddy's practical love for God and man. Any day she could have dropped the effort to clothe her discovery in exact and concrete terms. How easy it would have been to give up. She had been healed herself; she had brought health and comfort to many others; why not be satisfied. How easy to have become discouraged by the ridicule, the rebuffs, the lies of those animated by hate, and to have accepted the advice proffered by well-meaning friends to leave the subject alone. But Mrs. Eddy was as one working under orders. She had had a glimpse of the loving, ever-present Christ, Truth, and this sustained and encouraged her as her discovery unfolded and finally found full expression in the Christian Science textbook, "Science and Health with Key to the Scriptures."

Mrs. Eddy's statement of Christian Science is a final revelation of Truth. She has given this revelation to the world in such clear words and illustrations that any earnest seeker can understand and prove its teachings. She has presented the fact of the allness of God, good, and the nothingness of evil. Nothing more can be said. Just as Jesus himself did, she has demanded demonstration as proof of understanding.

All that has been written or spoken truly on the subject of Christian Science has been based on the statement of truth as found in Science and Health. All that can ever be truly said on this subject will but present to thought in other words and illustrations the same truth that Mrs. Eddy has already expressed in perhaps a thousand ways in her textbook. Gratitude wells up in our hearts; but let us not forget that our sincerity is proved only by our deeds.
