

## Pack Health in the Vacation Kit

**M**ILES of tramping, hours of active play—running, leaping, climbing! Long days when youthful feet are never still from dawn to dusk. Days that call for sensible, comfortable shoes to change vacation from a time of foot-health hazards to a period of beneficial development.

And here is the shoe—the Pool & Piper Moccasin for the boy and girl's summer! It's comfortable, cool and sanitary, because it's lined. Sturdy, but light as a feather. Elk Skin, Smoked or Tan, in sizes 8½ to 2. High or low, as pictured.

## Nature's Beauty—Man's Needs

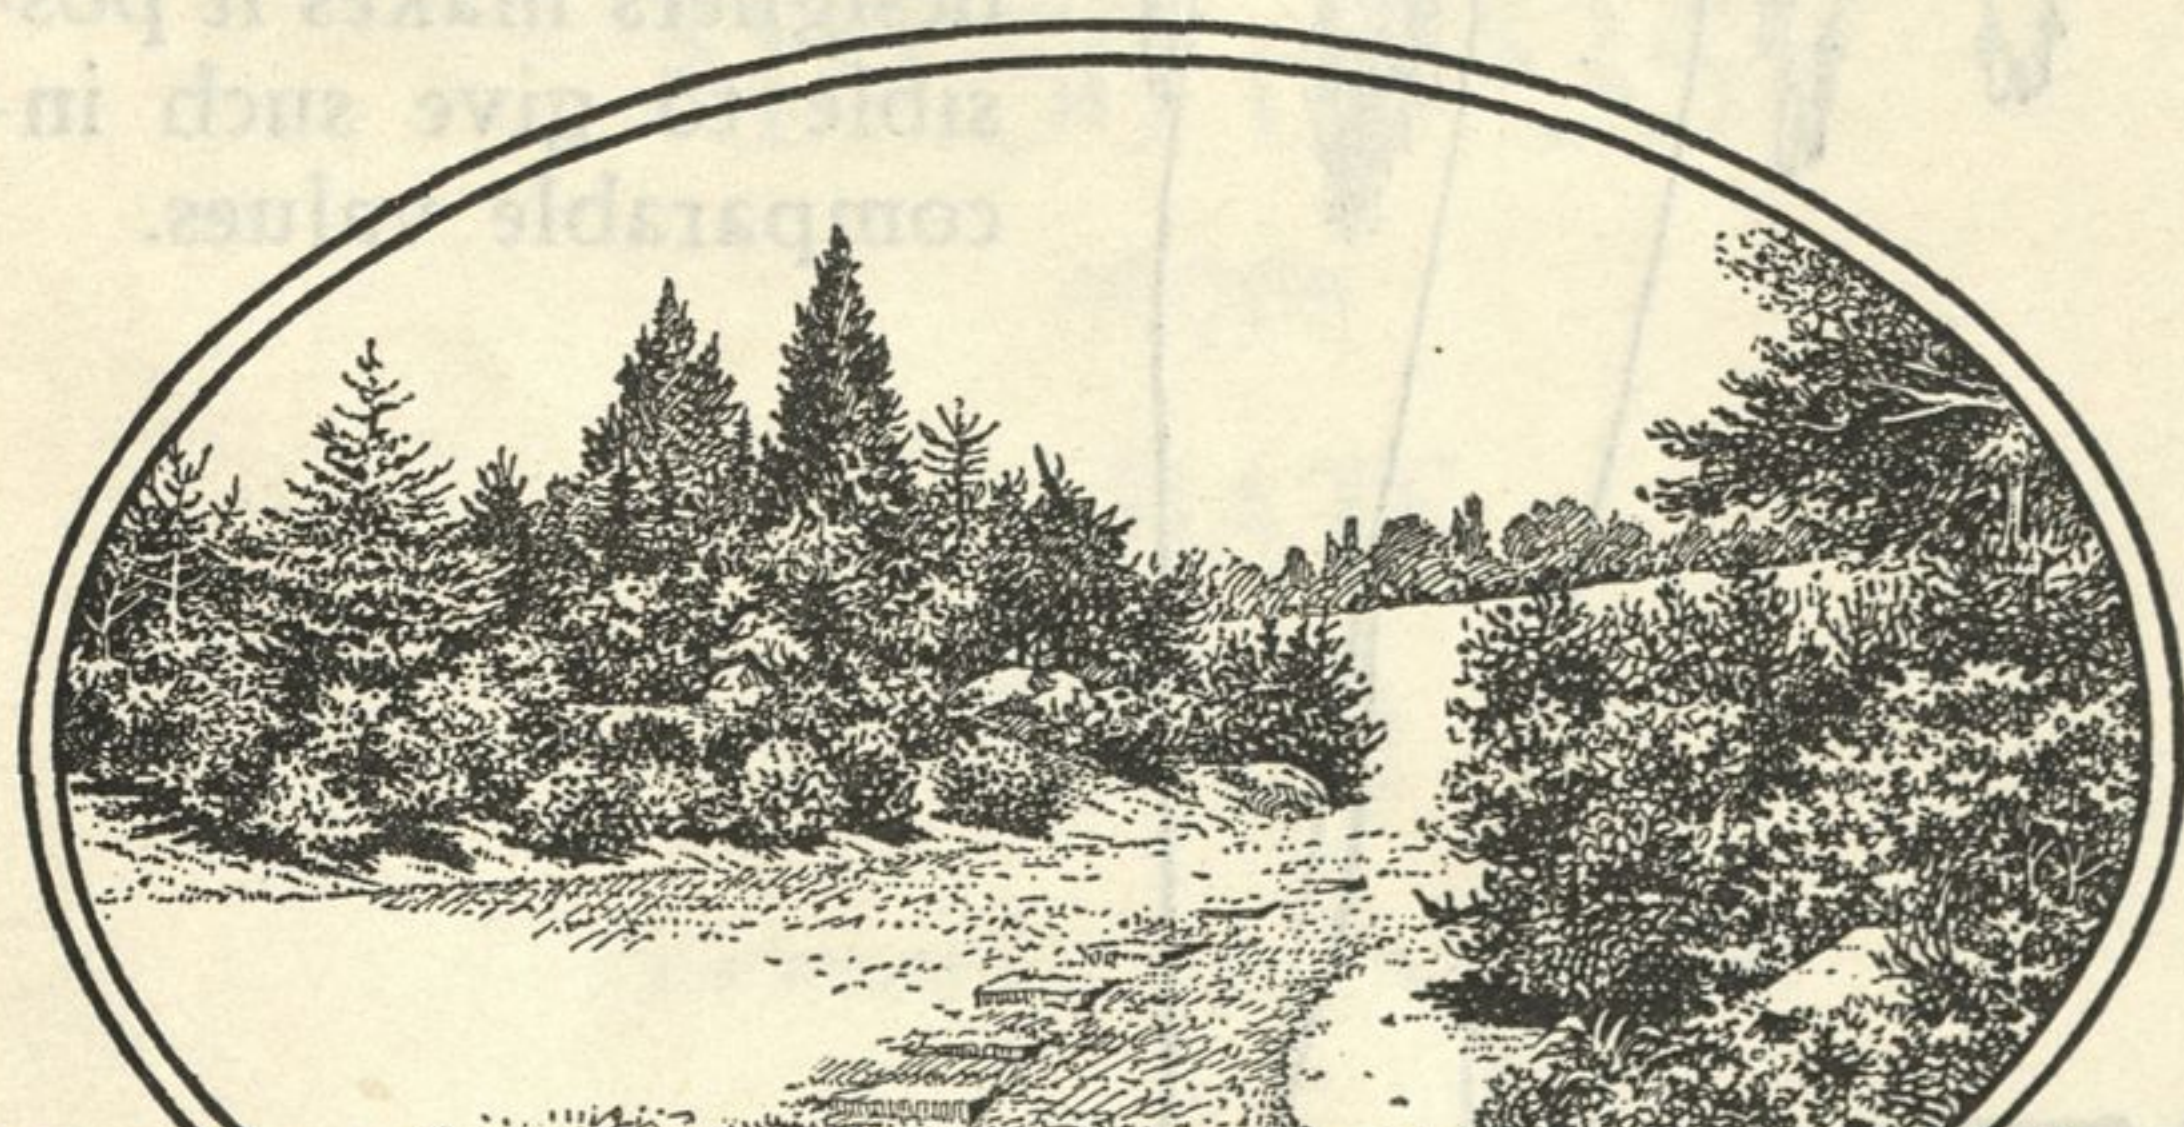

Nature is the greatest landscape gardener. In the untouched forest or field we find no displeasing combinations.

But even if we built our homes in their midst, we would have to adapt certain features to conform to the needs of living. So when we plan our home surroundings, we make them practical without violating the rules of natural beauty.

A fine understanding of the proper blending of these principles is displayed in our landscape work.
