

Rocks Augment Garden Plot

Photo by Lehle

Here is another of the many beauty spots to be found on the north shore. The Mrs. George W. Mieth garden at 731 Bluff street, Glencoe, is a most artistic combination of water and rock garden and a very pleasing wall effect. The latter contains many rock plants which grow and are seen to the best advantage under such conditions. It might also be stated that there is a very elaborate display of various seasonable flowers in the border surrounding the residence.

Greger Jones, 319 Sheridan road, left a week ago or so ago for California where he will visit his former roommate at Princeton and also relatives, the Sam Clovers of Los Angeles.

Mrs. W. C. Van Horne, 757 Locust street, returned last Sunday from the east where she had been studying at the Vassar Institute of Euthenics for past month.

New 9 Room Brick
439 Grove Street

2½ blocks from Skokie Club House
