

**A Well Lubricated
Bearing
Never Burns Out!**

No ordinary oil can stand the pace on the open concrete highway. The hard grind of hour after hour at top speed breaks down its "body" until the motor is no longer protected against friction. Then come burnt-out bearings and other costly damages - - - heavy penalty to pay for using a carelessly chosen oil.

A well-lubricated bearing never burns out. Guard against breakdowns by using Golden Clear Shell Motor Oil, an unusually high-quality product, which is refined to resist engine heat for long periods and afford a smooth cushion of protection to all moving parts.

**A Natural
"Anti-Knock" Fuel
No Chemicals!**

Developed for high compression motors - - - Improves the operation of Any car - - -

Super-Shell Gasoline is an all-petroleum product which owes its "anti-knock" properties to specially selected crude oils and to improved refining methods. Chemical doctoring is unnecessary - - - it is perfectly harmless to you and your car - - -

Although Super-Shell was primarily developed for high-compression motors and is ideal for use in them - - - this modern fuel tones up the performance of *any* car. It delivers brisk starting, smooth acceleration and a total freedom from engine knocks. Three cents a gallon is but a trifling premium to pay for such a gasoline - - -
