Release from Dishwashing is a Real Christmas Gift!

The man who adds a CONOVER Electric Dishwasher to his home this Christmas, says to his wife: "No more dishwashing!" He has done away with the tiresome, depressing job of washing a stack of dishes three times a day—by providing efficient, electric machinery to do the work.

The Conover

fills and empties itself mechanically. It can be pushed about easily from one corner of the kitchen to another, so it is never in the way. It occupies no more actual floor space than a kitchen chair. And still it works so efficiently that while it does your dishes you have time to do all the small tasks about a kitchen which must generally wait until dishwashing is over.

Tests more searching and severe than would be given it in the average home have proved that the CONOVER is thoroughly practical and highly efficient. Moreover, it is a work of beauty. With its glistening white enameled tank and cover, and graceful colored legs to harmonize with popular kitchen color schemes, it makes a most attractive addition to the very smartest kitchen.

Free Trial

You can arrange in your own home, to try the CONOVER in your own kitchen with your own dishes from 21 meals without cost or obligation. There are two sizes—Model AA for small and medium sized families, and Model TR for large families, diet kitchens and tea rooms.
