If you give your wife a General Electric Refrigerator, you give her a gift that carries its usefulness and its comforts through the years. You give her the pleasant knowledge that the food for her family is always healthfully fresh. You cut several marketing trips off her weekly schedule. You make it easier for her to plan interesting menus and to serve tempting foods.

The General Electric Refrigerator appeals to women particularly because it is so absolutely automatic that it never even

needs oiling. It is unusually quiet. It is easy to keep clean because there is a constant mild upward current of air which rises from the coils and keeps the dust from settling. All models are up-on-legs providing ample broom-room underneath.

This is the "years ahead" refrigerator which is the result of fifteen years of development in the Research Laboratories of General Electric. Each refrigerator is guaranteed by General Electric. We shall be glad to show you the models. Buy on a convenient payment plan, if you prefer.
