**Stealing Car in Mexico
Is Punishable by Death**

An old decree dug up in government files at Mexico recently pointed to the effect that any person stealing an automobile should be tried by court-martial and if found guilty, shot by a firing squad, according to a bulletin issued by The Automobile Club of Illinois. Pretty hard on the auto thieves, if it is discovered that the old Mexican law was never repealed. However, the decree has not been enforced in late years and it is doubtful if it ever will be.

TEHERAN GETS NEW THRILL

Residents of Teheran, Persia, had their first experience with spectacular advertising recently, when an airplane scattered Graham-Paige announcements over the city,—marking the arrival of the first cars of this make.

**SERVICE OF A TEST CAR
HELPFUL TO MOTORISTS**

**Automobile Club of Illinois Gives
Accessories Thorough Trials
—Protects the Owners**

Chicago again comes to the front as the originator of the newest idea in automotive circles. Sensing the great need of furnishing authoritative information to its members, The Automobile Club of Illinois has inaugurated, in addition to its well established Accessory Display Department, an Automotive Test Car which is being used primarily for the purpose of giving new accessories an exhaustive test both as to quality as well as utility, and in this way acquaint its members regarding the merits of each particular product so tested.

Every accessory displayed at the club is to be subjected to the most grueling workable tests, and actual results as ascertained on the "test car" will be used as a basis of judging the new products as they appear on the automotive market. During the first three months of the newly established accessory display 792 inquiries were received and answered by the department. Many ask information on the dependability of some particular product and it was this query that prompted Si. Mayer, President of The Automobile Club of Illinois to institute the new service for motorists.

In the inspection of mechanical fitness, three automotive engineers comprise the committee on final analysis. In this way, each automotive unit or accessory is scrutinized under the severest of tests, and only after an approval from the engineering staff are such products displayed.

This service has been offered to manufacturers and distributors of automotive accessories and the testing protects the motorist against inferior accessories.

GRAHAM-PAIGE GAINS

Graham-Paige production in November was 2,793, a gain of 35 per cent over the same month last year. The total for eleven months is 73,194, as compared with 20,860 in the same period last year, an increase of 250 per cent. Shipments in November were 3,161, as against 2,407 in November 1927. Eleven month's shipments this year total 73,363, against 21,548 last year.
