

## CHICAGO AFFECTS LOCAL INSURANCE

**Rates for Theft Protection Doubled Here Because of Close Proximity**

Because of its nearness to Chicago, the north shore, whose rate of crime is low in comparison with other vicinities of equal population, is compelled to pay the same rates for burglary and theft insurance as Chicago, where the hazards are so great that rates are considerably higher than in any other city in the United States, according to local insurance men.

Insurance dealers on the north shore say that the Cook county rates are approximately twice as much as the rates for the rest of the state, and these rates obtain on the north shore as well as in Chicago.

### Advances This Year

The rates each year are based on the amount of theft during the past year, and the way in which thieves and robbers are dealt with by the authorities. The north shore dealers are of one opinion, that the laxity of the authorities of Chicago in handling crime is the biggest factor in the high rates of Cook county.

The rates for the present year have advanced approximately 25 per cent over the rates for last year. In addition to these increased rates all policies less than \$2,000 must include an 80 per cent contribution clause, which works an additional hardship on most policy holders, for most policies are written for less than \$2,000.

The increase in rates for the present year are now in effect for all new policies. All renewals made before September will not be charged the increased rates.

### Doubled in Five Years

It is estimated that during the past five years the rates for theft and

burglary insurance in Cook county have more than doubled.

Although there were only four burglaries and eight robberies in Evanston during 1919, the rates have increased here the same that they have increased in Chicago, which had 6,055 burglaries and 2,916 robberies.
