One of the very best sources from which the farmer may get sound practical ideas about his business, and much interesting and useful information of a general kind is the "American Agriculturist" which is publish. ed in New York.

Information has reached us that it is not necessary to go so far as London, England, to find an instance of cheap gas. It appears that at Jackson, Mich., the price of gas went reduced on the lat of October to 30 cents per 1,000 feet. The gas is a water gas, but is manufactured on what is known as the Swedish system. It is stated that Cornwall, Ont., is soon to be supplied with illuminating gas on the same terms as in the case of Jackson. If gas can be profitably supplied to consumers in a small place like Cornwall for 30 cents per 1,000 feet, the citizens of Toronto would like to know why they are charged \$1.25.

The Grey Nuns were founded as a religious order in Canada about a hundred and fifty years ago, the mother house being in Montreal. "La Minerve" of Thursday contains an interesting account of the progress of this order, from which it appears that it now numbers in the Dominion 1,301 persons, namely, 1,080 professed nuns, 141 novices, and 88 postulants., They have a hundred and two establishments in various parts of the country, spread over twentythree Roman Catholic dioceses.

Some of the Democratic papers in the United States have been claiming that, although President Cleveland was defeated in not securing a majority of the Electoral College, he did get a majority of the popular vote. In Texas there was a gain in the in the solid South.

An old woman, "who had for eleven years tucked him up in his bed, "was made richer by the sum of one guinea. His crowning act was to make one endowment by which forty dozen penny loaves were to be thrown down from the parish church steeple at noon on every Christmas Day forever.

There are many tendencies in the civilization of the United States, like the rage for divorces for example, which do not promise well for the future of the republic. The tendency to seize other people's property and bolt for a foreign country is another. It does not confine itself to bank cashiers and civic officials, but has spread into the ranks of society, afflicting young and old, even young girls falling victims to the prevailing rage. A girl-of fourteen has justbeen taken back to New York by her mother, having been caught in a Cenadian city. She got hold of a large sum of money and fled with it. The nursery door needs to be double-locked in view of such cases as these.

The crop of anarchists in Chicago shows no signs of giving cut, and the quality is also first-rate. Evidence is being taken against certain prisoners believed to have had some connection with recent dynamite plots. During the progress of one of these cases an informer named Chleboun was giving testimony inplicating Anarchist Hronek, one of the men under arrest. "Hronek told me," he said, "that he had a bomb ready to throw at President Cleveland's carriage when the President was here and would have thrown it had not Schneider and Nekolanda dissuaded him." This will give rise to the impression that the number

of Presidents assassinated in that land of free-

dom may not be so large as those who have

narrowly escaped a violent end.

From Zanzibar it is reported that the English and German admirals, in the Sultan's name, have published a proclamation to the effect that the blockade will commence at noon on Sunday, and that the fleets are to take their positions to day, the German vessels on the south, from Warga to Linde, and the English on the north, from Wangs to Lamer Island. The Sultan is still ill. Heavy and constant firing was heard on the mainland yesterday. It seems that the vesels Sophie and Carola were fired at from the shore, and thereupon bombarded the coast. They also landed some men, who found two dead Arabs. One German was pretty, and so was the face under it. wounded. It is rumoured that the Arab chief Bushiri, with S00 soldiers, is assembling the tribes at Bagamoyo for a fresh

France pays \$1,890 a year and Prussia \$5 a day. Oa this continent Mexico, the Argentine Republic, the Urited States and Canada all pay the members of their legislatures. The present system in Great Britain, which prevents poor men from entering Parliament, unless, like the Irish Nationalist members, they can induce their constituents to subsidize them, has done sufficient harm to more than coun

terbalance its advantages. The London "Daily Telegraph" points out that while forty years ago the world went crazy in favor of youth, the present tendency in public life is to worship old age. The English people in particular believe fervently in old age and grand old men. There is, however, an awkward side to the worship of old age. "For at least ten years," says the "Telegraph," "the Dake of Wellington delayed needful improvements in the British army; for about the same period Lord Palmerston stifled reform. And, if one day the realm is split up into two, three, or four sections of jarring nationalities, it will be because reverence and gratitude led the multitude to accept any proposal, however wild or sentimental, made by that remarkable man who excels in his old age the oratorical achievements of the strongest speakers of the past."

From all quarters come complaints of the arbitrary conduct of the German authorities in Samoa, and unless some change takes place in their treatment of other Europeans, there is likely to be a serious diplomatic protest from the English and United States Democratic figures of 30,000, in Michigan Governments. By the latest advices the 20,000, and so forth, apparently greater situation in Samoa was very complicated, than the total gains of the Republicans. and a battle was pending between Tamasese, The latter, however, refuse to allow that the usurper, and Mataafa, the successor of the figures from the Southern States can be Malietoa, who was deposed by the Germans. fairly included in making up the popular | The German marines and sailors, besides vote, for Republicans contend that their giving aid and supplies to the usurpar, have voters are not allowed to cast their ballots been guilty of several attacks on English and American residents. > The habitual cougher in church is being rapped over the knuckles by the London Lancet. His existence not being confined to any one part of the world, the views of the great medical journal may be noted. It is held that too often the cougher disturbs the audience through thoughtlessness, and a little restraint, would remedy the matter, and even "when basis of disease underlies the explosion, a little self-control could jusually do something to lessen its force or its frequency." The admission is made that honest coughers do really exist, and these are recommended to refrain from using the voice during the service, and to resort to medicinal aids. The public eye is, therefore, upon the cougher at present in England. How much of the complaint is due to the bad ventilation of churches the London critic MONITY TO LOAN on _ mas. Lowest Rates does not seem to consider, nor is any light thrown upon the curious fact that the chorus of coughs comes just when the preacher is making some interesting announcement, or winding up a brilliant sermon with an eloquent peroration. 1999 300 3 1114 1788

It is said that the workingmen of the Western States will make a big effort to obtain a reduction of the hours of labour. A great convention of labourers is planned to be held at St. Louis in December, which will consider the advisability of a general strike in the interest of the eight-hour movement. The strike is intended to take place a year from June next, and the long preceding interval is to be employed in or ganizing and in making other preparations, An eight-hour law is in force in Illinois but it has not worked to the satisfaction of everybody. The effect of substituting eight hours for ten has there been to cause a loss to married men and slow men. The former suffer by having their wages reduced, the latter because they cannot earn as much in eight hours as they did in ten hours. No doubt the shortening of the hours of 1 bour will give work to many now unemployed, but would the condition of the present wage-earners be benefited by the change? This is a question which has not yet been satisfactorily answered.

An eccentric hat seen at the wedding of Gen. Boulanger's daughter was blue velvet, low-crowned and broad-leafed, the trimming simply being a boa of swansdown wound once round and tied above the right ear, leaving an end sticking up, and then descending to wind round the neck, where it was fastened in a coil. It was all singularly to be been from there
