Address	TI'E TRIBUNE, STOUFFVILLE, ONT.

NOTWITHSTANDING that the government majority voted down Mr. Laurier's motion to continue to issue licenses to American fisherman during the present season, the Ottawa Government have decided to adopt that course suggested by the leader of the opposition. Despatches from Gloucester, Mass., state that the American fishermen are well pleased with this action.

SHOULD your eye happen to fall on this paragraph read it through. Those of our subscribers who have renewed so promptly are entitled to our thanks. Those who have not yet done so will kindly call and secure a receipt for a dollar. If you are not in town registered letter will find us. We have to pay cash for our paper and other supplies and we would feel bad if we had to go without our dinner for a week or so in order to pay our debts. Send in your little dollar and feel good.

PANICS.

As is stated in our account of the Gospel Temperance meeting, on Tuesday evening, which will be found in our Local column, the fall of a lamp from the organ on the platform caused a scare which needed very slight encouragement, to develop it into a first-class panic. The facts of the burning of the Brooklyn theatre and of similar horrors must be fresh in the memories of all except the children and it is no exaggeration to say that all present on Tuesday evening ought to feel thankful that the little sensation which is now a subject for merriment, did not prove a very serious affair.

It is queer that people who, under ordinary circumstances, are possessed of undoubted intelligence should become so easily rattled. No one present on Tuesday evening ought to be ignorant of the fact that Daley's Hall if packed to its utmost capacity, can be emptied in less than five minutes at the very most, provided every one walks out in an orderly manner, whereas, if people start to go helter skelter over the seats, in their efforts to be first out the door ways and anteroom would become blocked, and a much longer time would be needed even if no one was injured. The Public Schools, of Toronto, have what is called a Fire Drill—an exercise, which should be practised in all schools, especially those occupying two storey buildings. An alarm is sounded in the midst of the lessons, and neither teachers nor scholars know whether it is a genuine alarm of fire or merely drill. It does not matter. Each teacher, without undue haste calls his pupils to order. Books are put into satchels, the pupils rise at the word of command and file out in perfect order keeping step like soldiers on parade. By this means, large schools like Ryerson and Hope St. Schools are emptied in less than three minutes. The excellence of the discipline was exemplified in one of the largest schools in Toronto, not long ago, in the case of a real fire when over one thousand children were marched out of the building carrying their books with them in less than two minutes, neither teacher nor pupils knowing whether these were really a fire or not. We recommend the idea to the notice of our school Board.

No medicine has had greater success in checking consumption in its early stages, than Ayer's Cherry Pectoral. It stops coughing, soothes the throat and lungs and induces much-needed repose. Hundreds have testified to the remarkable virtues of this preparation.

THE QUESTION OF THE HOUR.

Of all the questions before the public at present, the one which is receiving the most attention is undoubtedly that referring to the Jesuits' Estates Bill. The attitude of the two political parties towards the Question of Disallowance would be extremely difficult to define. That the Government will disallow the measure is very unlikely, and that a large number of the opposition will vote with the Government is according to the majority of the newspapers, a foregone conclusion. The Globe is in for any amount of abuse from contemporaries representing both parties. That the Globe has been so very inconsistent after all we fail to see. As far as we understand the matter, the Globe has argued from the first that if unconstitutional, the measure should be disallowed, and since becoming convinced that the measure really is such, has continued to boldly demand its disallowance. Even if the Globe at first was non-committal in its utterances, and that is all that can really be said, no one can truthfully charge it now with giving forth an uncertain sound.

The Third Party seems to be an accomplished fact, but we have yet to learn that Hon. Mr. Meredith has accepted the leadership. Possibly Mr. Hughes' eloquent appeal in the Mail last week escaped his notice.

The anxiously expected motion of Col. O'Brien was brought before the House on Tuesday last, and in the opinion of the Mail, the gallant Colonel has rendered the country a great service. This opinion, it seems, is not shared by the Globe, which considers that the resolution is couched in such terms that no Catholic member could possibly be expected to vote for it, while numbers of Protestant members would hesitate to do so, from the sense that the wording of the amendment is unnecessarily offensive to Roman Catholics, who, were it otherwise expressed, could conscientiously support it. Thus the war of words proceeds, but what the ultimate result will be it would be difficult to conjecture.

Up to the time of our going to press no division has been taken in the House, on Col. O'Brien's amendment. Speeches have been made by Colonel O'Brien, Barrow, Wallace, McCarthy, McNeill, and against it by Rykert, Colby, and Sir John Thompson. The motion for adjournment of the debate was moved by Hon. David Mills, who will therefore be the next to address the House.

EXPERIMENTAL WORK FOR FARMERS.

FROM THE LIVE STOCK FARM JOURNAL. The members of the Experimental Union are endeavoring to introduce a system of practical experiments, in which they solicit the co-operation of the farming community. The object is to inaugurate such experimental work as will be valuable to every farmer in the province.

These experiments are intended to be such as can be carried out by almost every farmer, with but little trouble or expense. The following are the experiments chosen for this year, and the systems for carrying them on:

1. A continuation of the experiments of 1888 on the same plots, without further application of fertilizers.
2. A test of superphosphate, dried blood, farm-yard manure, and no manure with oats.
3. A comparison of the different systems of raising fodder corn.

The first is only to be undertaken by those who experimented with fertilizers in 1888; the second is to ascertain the value of some of our quick-acting and best known fertilizers. This experiment will prove especially valuable to small farms, grain and truck farms.

The third, the shortage of pasture and increased use of supplemental crops impress upon us the need of the best methods of raising fodder for summer and winter use. With this object in view the experiment with corn was planned.

Other experiments are being arranged in stock feeding, dairying, horticulture and bee-keeping by different committees.

We solicit the help of farmers in this work, and would ask them to apply to Mr. C. A. Zavitz, secretary of experiments, O. A. C., Guelph, for further information.

Our means being limited, those who apply first will be supplied with experimental material. The result of the work should well repay each one who takes part in it.

EXPERIMENTAL COMMITTEE ON GRAINS AND FERTILIZERS.

If you have a house to sell or want to buy any kind of village or farm property, call on R. J. Daley.

DON'T FORGET
THAT WE HAVE MOVED
TO
KEMP'S NEW STORE.

Horse Cuts

at the

Stouffville Tribune,
OFFICE,

Work done promptly and at lowest rates.

A free notice of your horse given in the TRIBUNE if you get your bills printed at the

Stouffville Tribune Office.

The First Symptoms

Of all Lung diseases are much the same: feverishness, loss of appetite, sore throat, pain in the chest and back, headache, etc. In a few days you may be well, or, on the other hand, you may be down with Pneumonia or "galloping Consumption." Run no risks, but begin immediately to take Ayer's Cherry Pectoral.

Several years ago, James Birchard, of Darien, Conn., was severely ill. The doctors said he was in Consumption, and that they could do nothing for him, but advised him, as a last resort, to try Ayer's Cherry Pectoral. After taking this medicine, two or three months, he was pronounced a well man. His health remains good to the present day.

J. S. Bradley, Malden, Mass., writes: "Three winters ago I took a severe cold, which rapidly developed into Bronchitis and Consumption. I was so weak that I could not sit up, was much emaciated, and coughed incessantly. I consulted several doctors, but they were powerless, and all agreed that I was in Consumption. At last a friend brought me a bottle of Ayer's Cherry Pectoral. From the first dose, I found relief. Two bottles cured me, and my health has since been perfect."

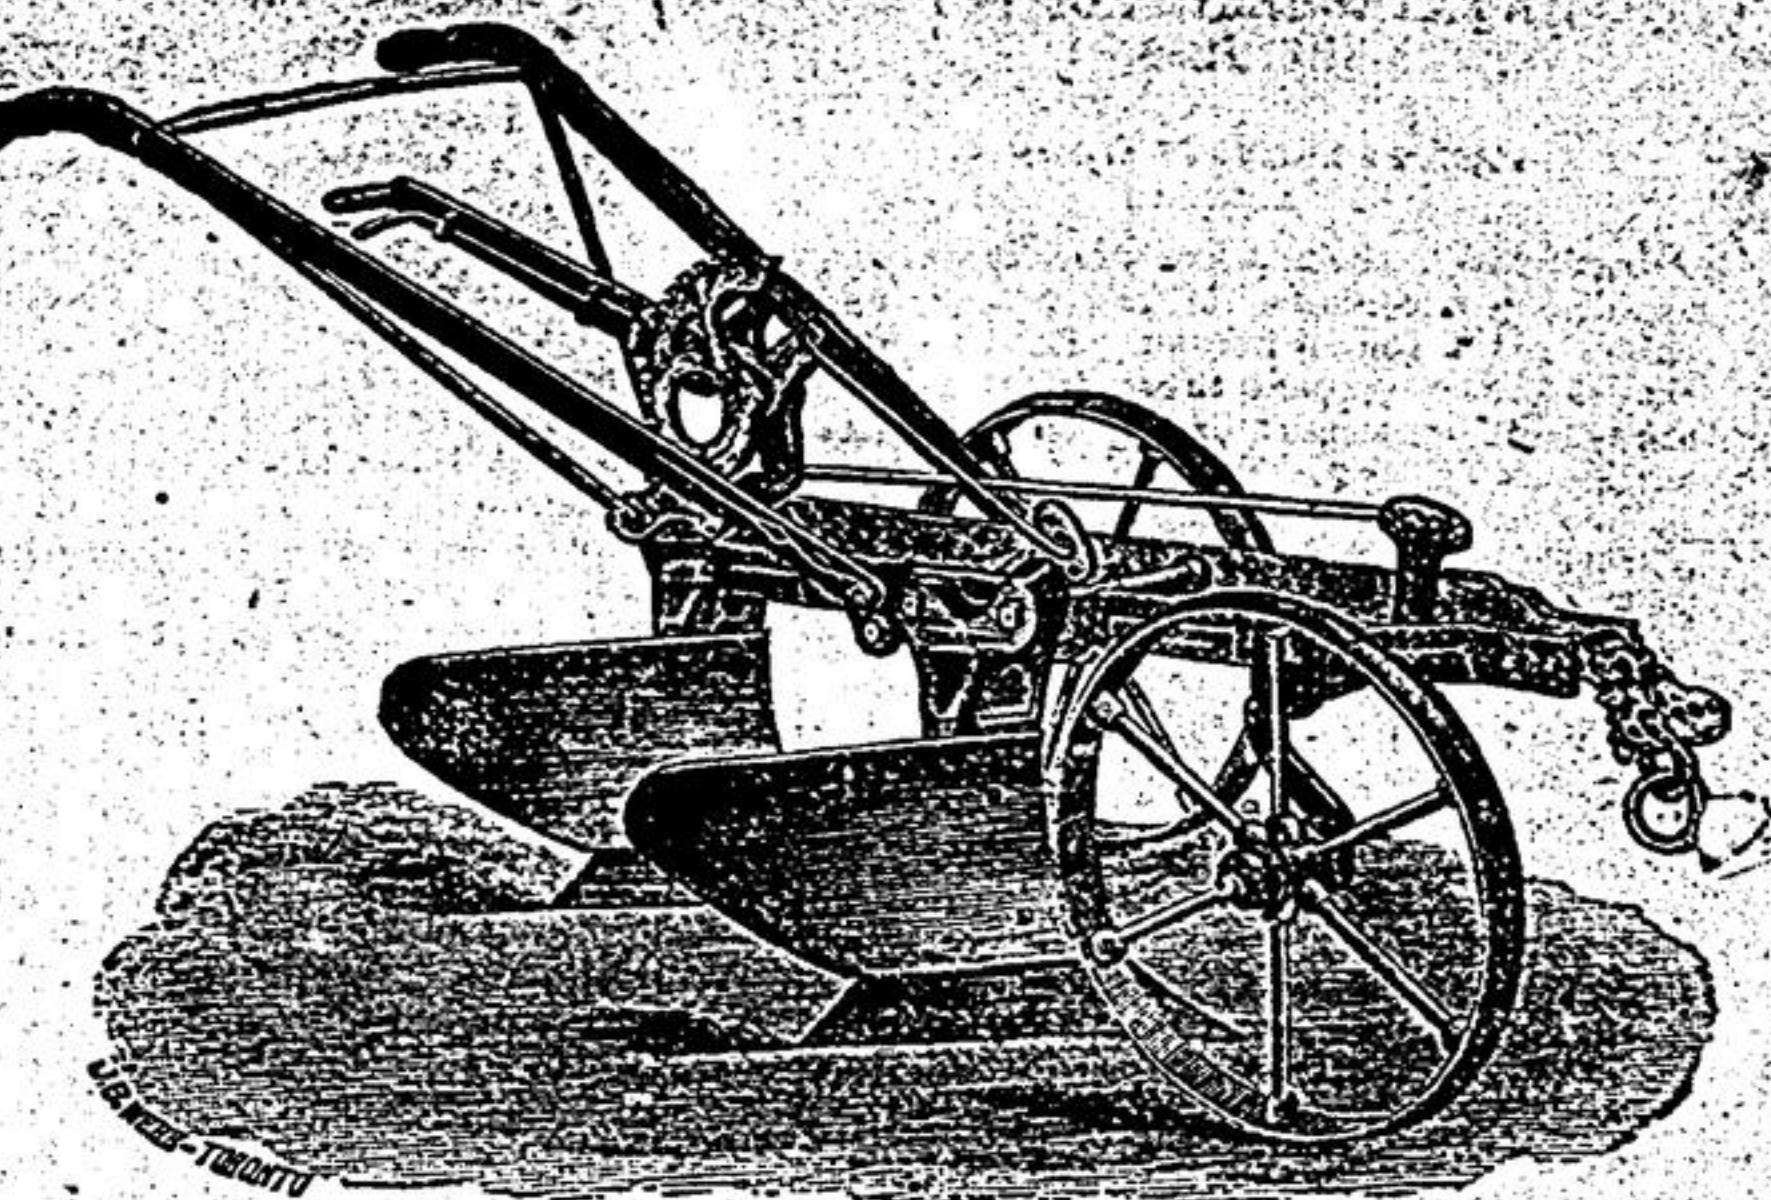

Alsike-Clover-Timothy-Seed Corn,

Black eye Peas at A. G. Brown's.

Indiscretions in diet bring on dyspepsia and irregularity of the bowels. Eat only wholesome food, and if the trouble has become permanent—as it is very prone to do—try a course of Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure. The combined effects astonish and delight the sufferer, who soon begins to digest well, regain functional regularity and improve in appetite; the blood becomes pure, and good health is restored.

TAKE an endowment policy (20 payments) in the Sun Life Assurance Co., if you want a good investment. R. J. Daley, General Agent, Stouffville.

TO THE FARMERS OF YORK AND ONTARIO CO'S.,

GENTLEMEN:

If you want to get a CULTIVATOR, SULKY PLOW, TWIN or GANG PLOW, SINGLE PLOW, LAND ROLLER, IRON HARROWS or SCUFFLER, go to the

Stouffville Agricultural Works, if you want the best articles Manufactured in these lines.

OUR CULTIVATOR is unsurpassed by any in the market; our lever raises the teeth two inches higher from the ground than any other Spring Tooth Cultivator made; this is acknowledged by all to be a very great advantage.

OUR TWIN PLOW has been very greatly improved and thoroughly tested, having last fall been brought in competition with nearly all the leading Twin Plows in the market and in the practical field contest, have taken the bun every time. In their construction we use the very best material and they are put together with very great care.

OUR SINGLE PLOWS are so well known for their superior working qualities that it is useless to say anything in their favor here, more than that we are this season using in their construction the best Soft Center Steel Mould Board Manufactured in the United States which is a sufficient guarantee of a good cleaning, and consequently an easy running Plow.

OUR LAND ROLLERS IRON HARROWS SCUFFLERS &c. are also of No. 1 quality, and unsurpassed by anything in the market.

To those who are in need of anything in the above lines we would invite an inspection of our Stock before buying. Be sure and get our prices, especially our cash prices, as we are prepared to make things very interesting to the man who buys with the cash. Kindly note this in your cranium.

Repairing done as usual.

A. FLEURY & SONS.

STOUFFVILLE Feb. 22nd 1889.
