GENERAL NEWS

Easter Sunday occurs on the Sab-
bath next after the first full moon
succeeding the 21st of March, but if
the full moon occurs on Sunday then
Easter will be on the Sunday follow-
ing.

Mr. E. A. Coombs, principal of the
Newmarket High School, was com-
pelled to give up teaching recently ow-
ing to a severe attack of rheumatism
and a substitute will probably officiate
in his stead for a short time.

The man, who with his team got
lost one night recently near Aurora
and travelled all night through the
fields and over fences, one of them
being of the stump variety, must
have had a narrow escape, or they
travelling in defiance of the law
of gravitation. The driver must also
have had a "meandering time of it."

A meeting of the North Ontario Bakers'
Association was held recently at
Sunderland, when it was agreed
upon to raise the price of bread, and
it had gone up considerably in the
city it was decided to hold the next
meeting in the second week in Janu-
ary instead of March as formerly.
The place at which it will be held was
not decided upon, but will probably
be Stouffville. Mr. Wurts was pres-
ent at the meeting.

It is stated that a new steamer for
Lake Simcoe, and Simcoe waters
is now being built in Orillia, and
is expected to be ready for the sum-
mer trade on those lakes—open for
excursions of all kinds. The vessel will
be seventy-five feet long and twenty
foot beam. She will be thoroughly
modern in all her appointments—
lighted by electricity—fitted with
electric fans—supplied with opera
seats, etc. Lake Simcoe needs a boat
of this kind, and weekly excursions
from Orillia to Port Hope, and
Orillia to Simcoe Point, and Orillia
and Barrie will be taken advantage of
by campers and summer tourists dur-
ing the coming season.

Reports of threatening have been com-
ing in from Argentina for some time
past, and a pretty fair estimate of the
crop is now to hand. Damage has been
done by hail storms and frost, here
and there, and there has been a good
deal of damage in one or two of the
districts, but, in spite of that, it is
said that the crop will be nearly, if
not quite, as large as that of the pre-
ceding year. The quality is reported
to be excellent on the whole, and prices
are good. However, as a result of
strikes just now are afflicting Argon-
tina as badly as they have the north-
ern part of the American continent.
There have been strikes both at Bue-
nos Ayres and Rosario, among other
places, which account more than any-
thing else for a shortage in the ex-
ports of wool this year of about sev-
enty thousand bales. In the meantime
however, exports of wool may lessen
because of the great increase in cat-
tle in Argentina, and the decrease in
sheep, it having been found by the
pastoralists that cattle raising and
cattle feeding is more profitable than
wool growing. The point for the Can-
adian to note, however, is that Ar-
gentina is going to be a more terri-
ble rival to us in the future than in
the past. It is true that Argentina
has only about a third of our area, or
1,211,000 square miles to our 3,742,-
374 square miles, but our country
grows broad towards our Pole while
hers grows narrow towards theirs,
and the country in general enjoys an
equable temperature and peaceful
climate. The population, too, is large,
amounting to four and a half millions
as compared with 3,774,282 of the
Commonwealth of Australia and our
3,371,516. The country is rich in
minerals, and the population is grow-
ing appreciably by immigration—
which amounted to 90,000 odd in
1902—although the emigration, too,
is large. It is a progressive country,
however. It has already eleven thou-
sand miles of railways in working or-
der connecting the principal cities of
the republic with the capital, and it
has 98,000 odd miles of telegraph,
postal, government lines, and is con-
nected by cable with all the cities in
the world. A country such as this
with a population more stable than is
usual among the Spanish republics,
which are mostly tropical, with a ter-
rible import trade (gold) of 108 million
dollars odd, and an export trade of ap-
proximately 179 and a half million dollars
odd, is not to be disregarded when the
world's food supplies are being taken
into consideration—with a view to
quantities and prices. And Argentina
is, as it is to-day compared with what
she will be if all goes well.

The New HARDWARE

A GREAT
SLAUGHTER

—IN—
STOVES

To make room for a car load of new stock
arriving next week we have to offer

4 only Oxford Campus Ranges
at \$24, regular \$30

1 only Dutchess of Oxford
Range and High Shelf \$25
regular \$32.

1 only Oxford Colonial Range
\$35, regular \$42

All these are new and up to date stoves, and
if not sold during the next two weeks
will be returned to the factory to make
room for a full line of IMPERIAL OX-
FORDS which will be our leader and
only LINE.

See our LONDON FENCE MACHINE &
build your own fence. It will save you
money.

Aitchison Bros.,

Successors to Mammoth Fair Co.

The honey crop is likely to be very
short this season owing to the severity
of the past winter. It is said that
about half the bees will die and that
many are already dead. Lack of prop-
er ventilation is one great cause of
the extensive mortality.

It should be satisfactory to the British
taxpayer to reflect that the torpedo
"vessels" which played havoc with
the Russian fleet at the outset of the
war in the Far East are nearly all
English built, when circumstances in-
terferentially, seems to be a guarantee
that the home government is getting
its money's worth, and has a ready-
reusable first line of defence. In all
Japan's first twenty vessels, specially
constructed for torpedo work at the
close of the last official return seven
of eight months ago, and seventeen
of these torpedos had destroyed
two of these were built in Japan and
the other fifteen in Great Britain.

The Dominion Government is send-
ing out an exploring party to the
Peace River District, of which so
much is being heard lately, and which
holds out so much promise of comfort
and convenience to the industrial set-
tler. Preparatory to opening the
lands for colonization in the Western
portion of Athabasca the survey party,
now being sent out will run line
in that part of the territory compris-
ing between the 6th initial meridian
and the British Columbia border. It is
reported that this strip of
country consists largely of good
wheat growing land of the very best
quality, and will afford valuable home-
steads for thousands of settlers.

The Premier speaking recently of
the securities which the Government
will issue for raising the "Bee" in-
dustries, said:—"The securities may be
guaranteed to the guarantee of interest
on two million dollars which the
government proposed to take. There
must be no incurrence of any duty
whatsoever about any part or phase of
the program. It must be as sure a trans-
action as a loan to the Bank of England.
We propose to take no risks, and will
not ask the House to take any. The
ground is clear in some respects but
not in others. I hope to be able to sat-
isfy the House that it is clear and en-
tirely before asking it to proceed with
the bill."

The Hart's Mountains in Germany
are the centre of the canary-bird in-
dustry. The birds raised there leave
schools for the training of their voice.
The best voices are carefully se-
lected, and their owners set apart in
a class by themselves. A canary with
a faultless voice and long experience
in singing is chosen for a "teacher."
When the time comes to train the
young birds they are suffered to hear
and imitate only the pure notes of the
leader of the school. The St. Andrew-
berg canaries are reckoned the finest
singers in the world. Singing schools
for birds also exist in New York
where imported German birdkeepers
are trained with the aid of a flute,
a reed organ and the human voice. The
trainers are marvellously expert. Wis-
doms, Baffinches can be taught to
pipe the tunes of popular songs and
operas.

A NEARLY SHOWING —OF— New Things

Spring will be here before you know it. Don't let other
get ahead of you in selecting your spring goods. Our
stock is arriving every day now from all parts of the
country.

Our first consignment of **NEW PRINTS** is in. The
Patterns are all up-to-date, none of last years leavings
and off colors; but all new goods, bought at old prices
we are therefore independent of the use in the cotton
market.

ALL THE NEWEST THINGS

In Dress Goods, Suitings, Silks, Linen Affects, Cambrics

Ginghams, Dress Lining, Ribbons.

Watch our adds for particulars.

concessionary, at
Witchurch.

STUART CAMPBELL.

The Russian Government spends
more money on its press censors than
on its schools. Last year 83 papers
were suspended for various reasons,
and 20 were forbidden to accept ad-
vertisements, while 209 editors were
sent to jail. They could have a short
vacation in Siberia if they continued
their discussion of public questions.

Interesting experiments with the
odors of herbs have from time to
time been made, and it has been found
that many species of microbes are
easily destroyed by various smells. For
example, cloves has been known to de-
stroy microbes in 35 minutes; cinna-
mon will kill some species in 12 min-
utes; thyme in 35 minutes. In 45
minutes common wild verbena is
shown effective, while the odor of
sassafras has destroyed various forms
of microbes in 55 minutes, and it is re-
garded as the most effective of all odors
as an antiseptic. It is now be-
lieved that herbs which have been
used in Egypt in the past were placed on
the bodies more for their antiseptic
properties than as mere ornaments or
objects of equipment.

Promoters and investors interest-
ed in electric lines will not find con-
solation in the last report of the
Railroad Commissioners of Massa-
chusetts. Out of 105 companies in
that State no less than 85, new and
gentlemanly of very large experience
old, declared and paid no dividends. A
company interested in electric lines
operations in Massachusetts recently stated
that electric lines do not pay except when
operated within densely populated cit-
ies, districts or within a short radius
thereof—like Boston and its immedi-
ate suburbs. Judged by this stand-
ard electric lines in Ontario outside of
those operated within cities, will not
be able to earn dividends at least for
many years to come, when the popu-
lation of that Province becomes more
dense than Massachusetts, where so
many electric lines are not profitable.
At present there is in Massachusetts
a population of 849 per square mile,
against approximately ten per square
mile in Ontario, or roughly 84 to 1.
Aside from this indication as to On-
tario being an unfavorable field for
electric line operation, it is interest-
ing to note that Ontario now enjoys
three lines as large steam rail way
miles as Massachusetts to each one
thousand of population.

ing, country boy preferred. Apply to
LEVI ARMSTRONG,
Stouffville, Ont.

An edict for the extermination of
the innocent and welcome robin has
gone out from the Michigan State
Horticultural Society, which has sus-
tained him as a cherry and straw-
berry pest. Of all the insectivorous
and grub-eating birds in Onta-
rio the robin is by far the best. We
have no adequate idea of his usefu-
ness in these lines. Get rid of the car-
ly spring robin and our farms and gar-
dens would soon be overrun with a
multitude of pests of various kinds,
which would battle all the ipseum
of man to keep in subjection. Leave
the robin alone and afford him and
his nests every protection. Encour-
age them to harbor in the orchard
and don't deprive them a breakfast
of cherries or strawberries.

The cause of the present low price
of hogs is attributed to the large in-
crease in the shipments from Den-
mark and Ireland. As many as 10,000
a week are being shipped from the for-
mer country. Many of the Canadian
packing houses are discharging a
large number of their men as the price
paid for hogs are higher than the
present condition of the trade war-
rants. It is just possible that low
prices may prevail here for some con-
siderable time. The best trade will be
so peculiarly affected. It may be
that we have reached a point when
the English market is not able to con-
sume all the meats offered for sale.
The time has come when farmers will
be obliged to raise the best of every-
thing for export and ship their prod-
uce in the most attractive manner so
as to make it acceptable to the Brit-
ish consumer.

While out for exercise in the ad-
yard at Whitby on Monday afternoon
Norman York, a prisoner, who was
tried here a short time ago for horse-
stealing, made his escape, getting over
a 20 foot brick wall by planting a
step-ladder on a snow pile several
feet high, which was near the wall.
He was missed a few minutes after
the break for liberty, and Jailer Le-
vey and High Constable Calvert started
in pursuit. They traced the fugi-
tive through adjacent fields and over
the railway tracks. Here he doffed his
convict uniform, which his pursu-
ers found. Eventually they cornered
him in Farmer Vauton's barn on
the bare land, where he was captured,
having hidden under a seed cart,
which was completely covered by
grassbage and from which they re-
trieved him by poking fence rails into his
retreat. When captured he was found
to be clad only in his underclothes,
and the farmer had to lend him a suit
of clothes to wear back to jail. He
will now have to stand a trial for jail
breaking.

When the dahlia was first introduced
to us it was a vegetable. The plant is
said to be really akin to the potato,
and it was thought that it would
prove an important addition to our
food resources. It came from Mex-
ico, the Spaniards having, it is be-
lieved, found it in Mexico, some daring
adventurers appear to have made a
trial of it as an edible root, but it
never proved an easy matter to popu-
larize a new article of food, and the dahlia
did not become popular. If
it had done so the probability is that
we should never have been troubled
much about its cultivation as a flower.
The double dahlia was a later pro-
duct than the single, and for many
years almost entirely superseded the
simpler flower, which not many sum-
mers ago came into vogue again with
the interest of a new discovery. To a
considerable extent they are gone
out again now, and the double ones
again to the front in popular favor.

If the government should ever
yield to the protectionist demand for
a revision of the tariff it might be
well to consider the wisdom of a heavy
duty on products of the imagina-
tion. Canadians, we are convinced, if
protected against dumping, would
develop a very large class of home pro-
duct; but the dumping process has
grievously hurt the local industry to a
low ebb. In protectionist campaign argu-
ments, for instance, we have the sur-
plus product of the United States
thrown upon our market to
cheapen the present practice is to
import the staple materials from
Russia and put a little local ven-
uer on them. Then as to sea serpen-
tines. The fisherman down the Gulf
who assures the newspaper men that
he has seen the writhing wonder, re-
quires only courage, not originality.
How can such inventions hope to com-
pete with such a magnificent product
as that of an Iowa man, who is peti-
tioning his State to give him money
to go out to sea catch thirty whales
and bring them through the Gulf of
Mexico and the Mississippi river to
the World's Fair at St. Louis. He pro-
poses to take them to a flooded pas-
ture, and milk them twice a day. Each
whale will, he says, give 600 gallons
of milk a day, which can be sold at a
dollar a gallon, so that thirty whales
would, in three months, produce al-
most two million dollars worth of
milk. That beats the roller boat that
was to roll across the sea regardless
of the wind.

Whitchurch Council.

Met at Megaffin's Hotel, Ont. Wed-
nesday, March 30th, members being all
present.

Communications, from Frank Buck-
indale, re bill for attending upon Oc-
car Woodard and wife while quaran-
tined with diphtheria.

Dr. Wesley, re medical attendance
Scott family.

The Reeve and Treasurer were em-
powered to invest Clergy Harvey
Funds-Capital.

Walter Robinson was appointed
pathmaster in lieu of W. Young,
who is removing.

Richard Rogers in lieu of Robert
Millard.

Albert Gear in lieu of Thomas Moo-
dy, removing.

David Wideman in lieu of J. J. Collard.

The Treasurer was instructed to
make the following payments:

To Stewart Walker \$50 amount of
legal costs re collecting taxes 1901.

To D. W. Megaffin, use of Hall for
Council \$1.00.

To T. Skinner, Jr., shovelling snow
R. D. 6, con. 7 \$29.62.

To A. B. Davidson, a proportion
Clergy R. F. interest to schools \$2.

For cutting and grading: bills be-
tween 107 and 71, con. 1 \$100.

For playing bill between 105 and 80
and 21, con. 8 \$100.00.

The clerk was instructed to notify
Frank Buckindale that the Council
refused to pay his full bill for attend-
ing Ocas, Woodard and wife.

The Reeve was instructed to pur-
chase bonds to manufacture culvert
pipe.

Concensor Skinner was instructed
to interview N. T. McCormack, Ex-
Member of the Board of Health, re-
specting bill presented by Dr. Wesley
for attending the Scott family.

Council adjourned to meet at Jones'
Hall, Bellentras, on April 27th.

Curing that Grip Cough

1
Grip leaves the lungs in a sensitive
condition. "Grip Cough" is the
symptom of a sudden, stubborn in-
flammation of the air passages that
should be cured as quickly as possi-
ble.

2
There's no question as to the kind
of remedy needed. It must be heal-
ing, soothing, building, strengthening
preparation that will remove the
cause of the trouble. Ordinary nar-
cotic cough syrups will not answer.

3
White Pine Expectant has just
the action that any remedy must
have to thoroughly cure Grip cough.
It has a direct, specific effect on the
mucous membrane of the air pas-
sages. We know of nothing better
for coughs of this class, or for that
matter, for any kind of cough. We
will refund your money if the re-
medy fails. Price 25c.
