

## ROSY CHEEKED HEALTHY WOMEN

Know the Full Value of Rich, Red Blood.

Robust, healthy, red-cheeked women seldom worry. Their condition of mind and body is such that they can rise above the causes that bring melancholy and brooding. It is the woman with weak, watery blood who is thrown into nervous unrest by little annoyances that grow so great in the imagination that it seems as if she must scream to relieve her feelings.

A woman's health quickly fails her when her blood becomes thin and weak. The stomach is disordered and all appetite vanishes. The nerves lose their strength and so sleep is not regular and does not refresh the body. A state of weakness arises that increases gradually and gives further cause for worry. Good blood is necessary to every woman who has grown pale and weak, and in this condition Dr. Williams' Pink Pills will be found of great benefit, because they enrich and purify the blood. Women who are anaemic, suffer from indigestion, palpitation, headaches and nervous attacks will find new strength through a fair use of these pills. Among the women who have proved the value of this medicine is Mrs. Enos Levy, Hackett's Cove, N.S., who says: "About two years ago I began to fail in health and was very weak. My constitution was all run down, and my blood was weak and watery, as was manifest every month. I had heard of Dr. Williams' Pink Pills and what they would do for the blood; and being in such a low condition I decided to try them. By the time I had finished the fourth box, I found to my great delight that I was a great deal stronger, and my blood a deep red color. I have a lot of work to do besides taking care of my little one, and with my good health I enjoy it, and I can truthfully say I owe this condition to Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills can be obtained through any medicine dealer, or may be had by mail, post paid, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

## Surnames and Their Origin

**MacCAUSLAND**  
Variations—MacCasion, Caslon, Mac-  
Casion, MacAnselan.  
Origin—Scotish.  
Frase—A given name.

You would not think, perhaps, that family name of MacCausland had nothing to do with the given name of "Fras." But it has.

The forms MacCausland and Mac-  
Causland appear to be the ones most fre-  
quently met with to-day, though you  
will often run across the others. These  
names are all derivatives of the Gaelic

name of "Anselan," which is equivalent to "Anslem," the latter be-  
ing the Teutonic form, with "Anslemus" as the Latin rendition.

It is interesting to note in this con-  
nection that many given names have been developed independently in the  
Gaelic and Teutonic tongues, but along  
virtually parallel lines, and when you trace back the connection, you do not find it until you arrive at that prehistoric and misty speculative period be-  
fore the Celts and the Teutons branched off from the parent Aryan stock and subsequently split again into many races and nations. For comparative analysis of Celtic and Teutonic tongues, as well as the Latin and Greek shows that a large proportion of their fundamental vocabularies, stripped of their variations, inflections and changes, are from the same word

roots. In other cases, however, given names have been imported from one language into another, and subsequently have developed into different forms.

The family name of MacCausland or "MacAnselan," which is the Gaelic form, appears to have developed in the Clan Buchanan of the Scottish Highlands.

**PRYOR**  
Variation—Prior.  
Origin—English.  
Source—A title, or a nickname.

Here is another of the type of family names which cause the evil-minded of limited knowledge concerning medieval social conditions to smile knowingly and refer to what is termed "the bar sinister," in short, to illegitimacy.

What the origin of a family name is in the specific, individual case, only a dependable genealogical tracing of it back to its source will establish.

About the family name of Prior or Pryor this much is certain: It was in most cases founded upon the word "prior," with its well-known meaning in religious life. The explanation that the name was first borne by actual children of priors, assumed to have been bound by vows of celibacy, is plausible, but it doesn't bear deep analysis, any more than does the shallow theory that all kings are de-

sended from kings, all earls from earls, or all Keyers from kaisers. There weren't enough kings, even if you counted in those of Ireland, to account for all the kings among English-speaking races to-day.

The alternative, and undoubtedly the true explanation in the vast majority of cases, is that men were given such nicknames as "the prior," "the king," and so on, either from peculiarities of bearing or from taking part in the very popular "mystery plays" which in medieval times were held in every little village.

*He beat the train to the crossing  
a good many times*

"It's never touched me yet," he explained when they pointed out the risks.

That's the answer a good many people make when they hear that the drug element in tea and coffee often harms nerves and health. They say it's never touched them yet.

Sometimes they only think it hasn't.

Wakeful nights, drowsy days, headaches that keep coming more frequently—often are blamed on bad luck when the blame belongs on bad

judgment in taking needless chances with harm.

Over on the safe side is Postum, a pure cereal beverage, delicious and satisfying—containing nothing that can harm nerves or digestion. Thousands who used to try their luck with tea or coffee are enthusiastic over having found safety and satisfaction in Postum.

It's worth your while to make the test with Postum for ten days. Postum is a delightful drink for any member of the family, at any meal.

Your grocer has both forms of Postum: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

## Postum for Health

"There's a Reason"

Made by Canadian Postum Cereal Co., Limited, Windsor, Ont.

## Avenging Kitchener.

The London Times tells in a recent issue how the British steamship Palmbranch—laden most inconsiderately for her name, with ammunition, poison gas, and high explosives—destroyed in the Arctic Ocean the submarine which sunk the cruiser bearing Lord Kitchener.

It was a quarter to four of a clear, sunny afternoon. Land had already been sighted about fifteen miles distant. Captain Malling, the master, had received no warning that submarines were about. But he was an alert officer who left nothing to chance, and had his ship and crew organized to a man-of-war's pitch. The gun's crew were standing by the gun, an American 13-pounder, with a cartridge inserted but the breech open, and they were ready for anything.

Suddenly one of the gun's crew saw a stationary periscope sixty yards distant on the port beam. At the same moment a white track of bubbles revealing a torpedo's course raced towards the ship. The track passed two or three feet from her stern; the torpedo had gone under the ship, running too deep to strike her. The men at the Palmbranch's gun slammed to the breech and laid their sights to zero. As they did so, the conning-tower of a submarine rose on the port quarter, barely forty yards away. Then the deck itself emerged from the water.

Naval gunners are rarely gifted with such a target at point-blank range. They accepted it with due thanksgiving. A flash, a roar; the Palmbranch's first shell struck the U-boat at the base of the conning-tower, just where it joined the deck, and tore great gashes and rents. Five seconds later a second shell burst against the waterline forward. Two rounds with a small gun. They sufficed. The submarine, which appeared to be stopped, rolled slightly. Then, taking heavy list, and tilting on end with stern high out of the water, she sank vertically out of sight.

Point.

Teacher—"William, what is income tax?"

Willie—"It is when you sit on a tack."

Teacher—"No, I'm afraid you don't see the point."

Willie—"You don't sit, you feel it."

## Ice Can Now Be Compressed.

Experiments recently made with enormous high pressures—up to 20,000 atmospheres, or the equivalent of 300,000 pounds per square inch—have developed results as remarkable as they were unexpected. Up to now 3,000 atmospheres was the maximum tried. Under a pressure of 6,000 atmospheres mercury passed through walls of massive steel.

Hitherto water has been supposed to be an incompressible substance, but under 12,000 atmospheres it was reduced 20 per cent. in volume. Nor was it previously known that liquids could be made to freeze by mere compression. Water, when the pressure is pushed high enough, turns to ice, no matter how high the temperature. Water at 180 degrees Fahrenheit will freeze under a pressure of 20,000 atmospheres. Ice, under a pressure of only 2,000 atmospheres, collapses 18 per cent. in volume, assuming a different appearance and new physical properties. A piece of it will sink in water. If more pressure is applied another kind of ice is produced. Phosphorus under 12,000 atmospheres turns black and assumes an appearance resembling graphite. Under the same pressure soft rubber becomes harder than mild steel.

Inasmuch as all materials far down toward the centre of the earth are subjected to tremendous pressures, the laboratory observations above quoted must be particularly interesting to geologists.

## KEEP LITTLE ONES WELL IN WINTER

Winter is a dangerous season for the little ones. The days are so changeable—one day bright, the next cold and stormy, that the mother is afraid to take the children out for the fresh air and exercise they need so much. In consequence they are often cooped up in overheated, badly ventilated rooms and are soon seized with colds or grippe. What is needed to keep the little ones well is Baby's Own Tablets. They will regulate the stomach and bowels and drive out colds, and by their use the baby will be able to get over the winter season in perfect safety. The Tablets are sold by medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Payment Deferred.

Alice, the five-year-old, entered the general store of Mr. Smith, with whom she was a great favorite, and announced that, to make her dolly a dress, she needed "some red, blue and yellow."

When Mr. Smith had brought out the required amount of material she asked how much it was.

"That will cost you just one kiss," replied the storekeeper.

Whereupon Alice answered: "Mamma will come in and pay you to-morrow."

The human brain contains 300,000,000 nerve cells.

Cape Horn was so named by the Dutch navigator who discovered it in 1616, and called it Cape Horn after his birthplace.

From kings, all earls from earls, or all Keyers from kaisers. There weren't enough kings, even if you counted in those of Ireland, to account for all the kings among English-speaking races to-day.

The alternative, and undoubtedly the true explanation in the vast majority of cases, is that men were given such nicknames as "the prior," "the king," and so on, either from peculiarities of bearing or from taking part in the very popular "mystery plays" which in medieval times were held in every little village.

## BLUNDEN IS BACK ON JOB EVERY DAY

### DARTMOUTH CITIZEN FEELS YOUNG AND ACTIVE AS A BOY.

Was Losing Much Time From Work Because of Stomach Trouble But Eats Anything on Table Now.

"Think of it, a short time ago I could hardly push a plane or use a hand saw and to-day I feel as young and active and vigorous as I ever did in my life," said Harry J. Blunden, well-known carpenter of Hester St., Dartmouth, N.S.

"For three years before I started taking Tanlac I didn't know what it was to have a single day's good health, and for the last two years my stomach has been in such a disordered condition that I was just in misery all the time. Nothing in the world will pull a man down as quick as not being able to digest what he eats, and I lost weight and strength all the time."

"I am on the job now working every day and feeling fine all the time. I certainly enjoy making the shavings now. Tanlac has just made a brand new man out of me."

Tanlac is sold by all good druggists.

—Advt.

### Tone Producer for Violins and Similar Instruments.

It is said that a modern violin, of any ordinary make, can be converted into the equivalent of a Stradivarius, or other violin of Italy's golden days of string-instrument making, by the attachment to it of a newly invented tone producer. The device is applicable to any kind of string instrument, is made of specially prepared wood, and is so constructed that it conforms to the shape of the instrument to which it is attached.

Mother, Quick! Give  
California Fig Syrup  
For Child's Bowels

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste from the tender, little bowels and gives you a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful-to-day saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Green.

"Your grandfather lived to a green old age, didn't he?"

"I'd certainly eat it that. Why, the old gentleman allowed himself to be outrageously swindled a dozen times after he was seventy."

It is always safe to send a Dominion Express Money Order. Five dollars costs three cents.

The harp is believed to have originated from the hunting bow, the tightly stretched string of which will emit a musical note.

Minard's Liniment prevents Spanish Flu.

Here is a Useful Tree.

Probably no other tree in the world, unless it is the bamboo, is useful in so many different ways as the carnauba, a species of palm that grows in northern Brazil. Not only is the tree pretty, says Mr. Harry A. Franck, but it is useful from root to crown.

Fibres and wax from the leaves were used to make the first phonograph records, and some of the first electric-light filaments. The wax indeed is on of the important exports of Brazil. To get it the natives thrash the leaves until the wax falls from them in the shape of a white powder. The powder is later worked up into many forms, from seals to shoe polish. The natives make their candies of it.

The fibres of the leaves they weave into hats, mats and baskets. They also make brooms of them, and they use the leaves to roof their houses and to make palm-leaf fans. Useful fibres also come from the inside of the trunk, the iron-hard wood, of which they use to make many things, from musical instruments to water pipes. From the roots they make a purgative and a kind of farinha that is of inestimable value to them in times of famine.

The pulp of the fruit has an agreeable taste; and from the seed, which is of agreeable taste when roasted, comes a saccharine substance that can either be used as food or turned into wine or vinegar. Finally they use the seed as birros; that is, the knobs to which the lace makers tie the ends of their threads. The clickety-click of the birros can be heard all over northern Brazil.

No one is useless in the world who lightens the burden of it for anyone else.

The coast of Heligoland, which measured 120 miles in A.D. 1300, had been reduced to three miles in 1900 by coast erosion.

SO WEAK  
COULD HARDLY  
DO ANYTHING

Now Looks After Home,  
Thanks to Lydia E. Pinkham's Vegetable Compound

Meaford, Ontario.—"I was so weak I could hardly do anything and my back seemed the worst. I read so much about Lydia E. Pinkham's Vegetable Compound for women that I thought I would try it. I feel that it did help me for I am looking after my own home now and seem quite strong again. I have recommended your Vegetable Compound to quite a few friends and you can use my name if you wish to do so."—Mrs. H. PORTER, Box 440, Meaford, Ontario.
