## I Can Save You 36 1/2 Days a Year

You know from laborious experience that you spend at least an average of one hour a day in pumping water for use about your farm. Stop losing this valuable time. Save your strength. Install a Toronto Windmill and see how quickly it will pay for itself. Toronto Windmills are quiet, efficient workers. Cost nothing to run. Require practically no attention outside an occasional oiling. And when linked up with a Toronto Pump and Toronto Water System, a Toronto Windmill will give you a city water service right on your farm.
