CAMPERS

ONTARIO'S forest wealth is dwindling. Every year forest fires take disastrous toll. Careless campers cause eleven per cent of Ontario's forest fires. Last summer 112 cases of neglected camp fires were reported. This summer be careful.

Save Ontario's Forests They're Yours

DON'T

DON'T take chances with fire in the woods.
DON'T throw away cigarette or match stubs.
DON'T build your camp fire on a stump, or in a hole, or on a log, or on a rock, or on a pile of brush, or on the edge of the water.
DON'T throw away the upper layer of ground in the forest, consisting of partially rotted wood, which will burn.

When you build your fire to make tea, fry bacon, or add cheer to pipe and story-telling time, use a woodsman's precautions.

The real woodsman builds his fire on an old fireplace, if there be one handy. Failing that he scrapes away all litter, moss and fibrous rotted wood down to the mineral soil, or the bare rock, and preferably some place close to the water. He knows that if fire gets into the moss or the upper woody layer of forest soil, or in a half-rotted log or stump, it "holds over" burns away unnoticed underneath, and unless followed up and carefully put out, is liable to break into a flame later. He knows how hard it is to put such deep-smouldering fire out. So he makes his cooking fire surprisingly small and compact, and chooses a spot that is absolutely safe.

It is a mark of his finished woodsmanship, how thoroughly he drowns his fire out with plenty of water when he is through with it. Save the forests. You may want to camp again.

YOU'LL GET GOOD ENSILAGE

With a **TORONTO Silo**

HANDLE the Toronto Hip Roof Silo because I want to give my customers the biggest value. You can't have good ensilage unless you have a good silo. And Toronto Silos are good silos. Made of wood—the best non-conductor of heat and cold. Sturdily built from double

tongued and grooved staves of selected spruce impregnated with creosote, they give adequate protection against air and frost. Their special Hip Roof provides more space for filling. I can show you where a Toronto Silo will mean more productive cattle, bigger profits, a more valuable farm—dollars in your pocket. Let's talk it over.
