SILVER FOXES—NOTES FROM MY DIARY
(Booklet) Five years' experience teaching foxes to read. Dr. McCall, Toronto, Ont.
WASHINGTON HAND PRESS
WE HAVE AN ENQUIRY FOR A WASHINGTON HAND PRESS that will take a page of a column, long or short, in any paper, at a reasonable rate. W. Toronto.

The Father Who Is Not Loved or Respected

One of the bitterest things in many a man's life has been the discovery after he has made a fortune, that he has lost his hold upon his boys.

I have been in homes where the relations between father and sons were so strained and formal that the latter would no more think of making a confidant of their father than they would of a stranger.

The mother is sometimes responsible for this unfortunate state of affairs. I know mothers who have deliberately prejudiced their children against their father. They seem to be jealous of him, and do all they can to poison the young people's minds against him, to undermine their love and respect for him. Sometimes this is done by speaking slightly of the father. Perhaps he is not much of a business man, and the mother will criticize his methods before them, and find fault with him regarding his way of financing the family. Or she will magnify every weakness and imperfection of his character, make him appear weak and contemptible in their eyes.

There are multitudes of mothers who, while they have no intention of injuring the father in the children's regard, unconsciously do so by the methods they adopt to control them. Just as many ignorant people will frighten small children by telling them that they will call in a big policeman to arrest them and put them in jail, thousands of mothers will encourage fear of the father by making them believe he is cruel and hard, and that he will punish them severely for every little mishap or misdeed of which she threatens to inform him.

This is very unfair to the father, for it robs him of his most precious possession—the love, admiration, and respect of his children. It helps to build a barrier between him and his children, a prejudice which may last a lifetime, and deprive him of them of much possible happiness. To know that his children love him dearly and want to be with him, that they are always delighted to have him at home, to have him join them in their play, is a great compensation to him for the sacrifices he makes for them.

It is a most unfortunate thing for a child to look upon his father as a cruel task-master instead of a companion, to dread meeting him because he always expects criticism or scolding from him instead of sympathy and companionship. Unfortunately some fathers encourage this feeling. They will constantly nag and find fault, and never think of praising their children or expressing any appreciation of their work, even when they do it well.

A father should regard the confidential relation between himself and his son as one of the most precious things in life, and should never take chances of forfeiting it. It costs something to keep it, but it is worth the price. I have never known a boy to go very far wrong who regarded his father and mother as his best friends, and kept no secrets from them. O. S. Marden.

Would Signal Mars by Flashing Light

Dr. A. M. Low, an English inventor, believes it possible to get into communication with Mars by means of light signalling.

There are several known chemical means of producing a light screen of sufficient size which would last long enough to be noticed by the Martians, if such exist," he said. "I think a suitable screen could be set out on a high altitude by airplanes, to eliminate as far as possible the effect of air and clouds, which combine to make difficult any observation of the earth itself."

Dr. Low considers wireless waves less practical, as they travel in curves, making it difficult to gauge the target. He holds it ludicrous to expect to find the Martians' life similar to our own.

"Some years ago we thought that animals and plants were the only things which lived," he said, "but now we know there is life in everything. I have never seen anything yet which was not alive."

"The Martians might be able to see by heat waves. A small difference in our physical makeup would revolutionize our world and ideas of living. If we were born with eyes having only slightly different lenses to normal we would see the air around us full of life and our bath water a mass of horrible, looking creatures."

Dr. Low disagrees with those who assert the Martians are more advanced than earthlings. "If they were, they would have found some means of communicating with us," he said.

The only trouble with "the height of fashion" is having to wear it a long time after the "height" has changed.

Women in Egypt are appealing for a law to be passed raising the marriage age for girls to sixteen.

A FINE COMPLEXION

Can Be Had Through Keeping the Blood Rich and Pure.

A girl's complexion is something more than a matter of concern to her vanity. It is an indication of the state of her health. Pallor in a growing girl means a thinning of the blood. Eruptions mean impurities in the blood. Mothers should be watchful of their daughters' complexions and see to it that these signs are corrected—not covered up.

When a girl in her teens becomes pale and sallow, especially if, at the same time, she shows an inclination to tire easily, a listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements that Dr. Williams' Pink Pills can supply, but the physical signs are plain. The girl with a bad complexion, or who suffers from occasional headaches, who is easily tired and breathless after slight exertion, should begin taking Dr. Williams' Pink Pills at once. A good appetite, sparkling eyes and rosy cheeks follow the fair use of this medicine.

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

When Tin Catches Cold.

You would scarcely suspect a metal such as tin of being able to catch cold, but it can do so for all that. In countries like Northern Russia all sorts of utensils are apt to become useless in winter time.

A tiny greish spot makes its appearance on the surface of the tin. It grows in size, and then others appear. In course of time the metal crumbles into a dark-colored powder.

Some years ago a whole shipload of blocks of tin, stored in the Customs House of Petrograd during the winter, was found the following spring to have crumbled into dust.

What really happens is that the cold causes tin to change from one of its forms to another. Tin is often found in mines in the grey powder form which is quite useless. When it is heated it turns into a well-known shiny metal, but under the influence of cold it may return to its other form.

Finger prints of criminals are sent by telegraph all over Italy by a simple invention, involving the use of from 300 to 400 numbered squares.

Salamanders, small creatures not unlike newts, have been made to change their sex by alternately feeding and starving them.

Common sense is not a common thing.

Stories About Well-Known People

Royalty Gets a Diploma.
When the Wharton School of Business administration at the University of Pennsylvania held its graduating exercises this summer many foreign students received diplomas and none showed more pride in the hard-earned bit of sheepskin than a scion of Oriental royalty, Vira Virakorn, who is a cousin of the King of Siam.

By very ancient tradition the business activities of royal persons have been limited to the narrow but not unfruitful fields of imposing taxes or receipting for the contents of the privy purse voted them by their adoring subjects. Common report has it that Siamese royalty has also kept up a herd of white elephants to let off its excess energy.

Whether Virakorn will stick to the good old days when he gets back to Bangkok, or branch out for himself in some new line, has not been indicated. It may well be that the Siamese monarch has a good many cousins to keep up, and that the young graduate's thorough acquaintance with American methods in commerce, industry and finance will not prove unacceptable to his exalted uncle.

Cars by the Dozen.

The Boy of Tunis, who is now on an official visit to Paris, is well-known as a teller of good stories, and figures himself as the hero, or perhaps the victim, of many a true one. The most amusing of those about himself is per-

Railroad Man Gives Out Surprising Facts

"If any in my family were sick with stomach trouble or run-down condition, I would rather have one bottle of Tanlac than all the other remedies put together." Is the positive statement of F. A. Barrowcliff, 8 Locomotive St., Hamilton, Ont., well-known yardman for the Grand Trunk Railroad.

"My wife's health was restored by the Tanlac treatment in such short order it was astonishing, for she suffered so terribly with nervousness, headaches, sleeplessness, and loss of appetite that I thought she would break down completely. She went meal after meal, without eating, and was so

Surnames and Their Origin

LOCKYEAR
Variations—Lockyer, Lockman, Locke, Lockerman.
Racial Origin—English, also Dutch.
Source—An occupation.
Lockyear, Lockyer, Lockman and Locke are all only different forms of the same family name, which in its original use was but descriptive of the callings of its first bearers.

Lockyear is really not a "true" form of the name; it is a changed spelling of Lockyer. The "lockyer" of the Middle Ages in England was, as you might opine, a locksmith, as was also the "Lockman," the two forms of the word being interchangeable, with the former, perhaps in wider use.

Originally this name, like all others which have been derived from trades, was preceded by a "le" (meaning "the") under the influence of the French tongue of the Normans. But even before such names lost their descriptive sense, and virtually always afterward, the "le" was dropped.

The family name of Lockman, however, is sometimes a contraction of that of Lockerman, which is not English at all, but Dutch, the true form being "Loockerman." And though this family name also is based upon an occupation, it is not the same from which the English names have developed. The "loockerman" among the Dutch was a man who raised or dealt in leeks.

LARDNER
Variations—Lardiner.
Racial Origin—English.
Source—An occupation.

Lardner is by no means an infrequent family name, though probably it is most widely known when it has a "Ring" in front of it.

You might suspect from the first syllable that the name originally had something to do with the word "lard." In many cases when you suspect things like this about a family name you are wrong. But in this case you would be right. There is a connection. In fact the name is founded upon it. But the trade or occupation, through which the connection was made is no longer referred to, as it was in the Middle Ages at the time when family names were formed.

In medieval England the "lardner" or "lardiner" (for you will find both spellings) was a specific kind of swineherd. His occupation was that of fattening or "lardening" pigs for the market or for the tables of the feudal lords. He had to be a good bit of a forester, for he took his herds into the woods to fatten them upon acorns and nuts, and very often he also held a commission as a forest warden from his overlord.

Originally, of course, the name was descriptive of the individual's occupation, and in the old records you will find many entries of such names as "Hugo le Lardner" and "Roger le Lardner."

A GOOD MEDICINE FOR THE BABY

Nothing can equal Baby's Own Tablets as a medicine for little ones. They are a laxative, mild but thorough in action, and never fail to relieve constipation, colic, colds and simple fevers. Once a mother has used them she will use nothing else. Concerning them Mrs. Saluste Pelletier, St. Damas des Aulaines, Que., writes:—"I always keep a box of Baby's Own Tablets in the house. They are the best medicine I know of for little ones and I would not be without them." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Robert Burns.
Visitor—"Dear me! Fancy your being called Robert Burns—why, that's a very well-known name."
Native—"Nae doot it is; I've been blacksmith in the place for nigh on forty years."

The worker bee lives six months, the drone four months, and the female bee four years.

Measuring Things You Cannot See.

We are accustomed to hearing of measurements of tremendous distances, such as those between the earth and some of the stars, which run into thousands of billions of miles. But what do you think of measuring accurately the 500,000,000th part of an inch?

The most accurate of ordinary instruments can measure the 500,000,000th part of a mile, which is less than three 10,000ths of an inch. To measure the 500,000,000th part of an inch an instrument must be 50,000 times more delicate; yet it has been done.

The appliance used is nothing like the tuning circuit of a wireless valve set. You know that if you turn the knob of the condenser the wave-length is altered. We can make a condenser by placing two plates of metal one above the other with an air space between them.

If the tuning circuit is a delicate one, an almost infinitesimal bending of one of the plates will make a difference in the wave-length. It is easy to calculate how much bending causes any given difference.

The measuring appliance employs a condenser of this kind, by means of which the tiny distances mentioned can be measured with ease. If a half-inch bar of steel is placed in a vice and connected with the apparatus, the distance it sags when a fly settles upon it is instantly and accurately recorded on a dial.

If a fly walks on a piece of iron the pointer records how the whole mass quivers under its weight, and it will even measure the expansion of the iron caused by the heat of the insect's body!

The invention will be of great use to scientists, who hitherto have been baffled in their work when very tiny measurements were needed.

Ask for Minard's and take no other.

Although some kinds of fungus are imbued with a deadly poison, no insect or bird ever falls a victim to them.

Perfect evaporation and exact proportioning of gasoline and air are claimed for a new carburetor.

Shampoo With Cuticura And Have Healthy Hair
Regular shampoos with Cuticura Soap will keep the scalp clean and healthy. Before shampooing touch spots of dandruff and itching, if any, with Cuticura Ointment. A clean, healthy scalp means good hair.
Sole 25c. Ointment 25 and 50c. Tablets Sold throughout the Dominion, Canadian Depot: The Canadian Manufacturing Co., Ltd., 344 St. Paul St., W. Montreal.
Cuticura Soap shaves without mug.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all.

Genuine

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
Toothache Neuralgia Neuritis
Earache Lumbago Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoacetic acid ester of Salicylic acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their special trade mark, the "Bayer Cross."

MRS. DAVIS NERVOUS WRECK

Tells Women How She Was Restored to Perfect Health by Lydia E. Pinkham's Vegetable Compound

Winnipeg, Man.—"I cannot speak too highly of what Lydia E. Pinkham's Vegetable Compound has done for me. I was a nervous wreck and I just had to force myself to do my work. Even the sound of my own children playing made me feel as if I must scream; if they did not get away from me, I could not even speak right to my husband. The doctor said he could do nothing for me. My husband's mother advised me to take the Vegetable Compound and I started it at once. I was able to do my work once more and it was a pleasure, not a burden. Now I have a fine, bouncing baby and am able to nurse her and enjoy doing my work. I cannot help recommending such a medicine, and any one seeing me before I took it, and seeing me now, can see what it does for me. I am only too pleased for you to use my testimonial."—Mrs. EMILY DAVIS, 721 McGee Street, Winnipeg, Man.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to the Lydia E. Pinkham Medicine Co., Cobourg, Ont. This book contains valuable information.
