### EDITORIAL COMMENT

When canvassers call on you for magazines and papers, remember, that all the deadbeats are not dead.

In 1923 the Ontario Government received in motor license fees \$4,000,000. During the present year it will receive \$5,000,000, the increase being due to more cars being sold. The new licenses with yellow background will be issued about February 1st.

Those who take interest in finance will note that Greece has paid Canada \$450,000 interest during 1923 on her \$8,000,000 debt. By the end of 1924 Belgium will have paid in full the \$3,000,000 balance of her debt and France \$5,500,000 debt.

The Country Gentleman says, "A shortage of blacksmiths is apparently near at hand." Yes, we believe it. As a trade it does not seem to attract young fellows nowadays. The garage attracts the mechanically minded ones. This tendency will ultimately affect farming, and it is regrettable from other standpoints. The real old-time blacksmith was and is yet a capable craftsman, and often a picturesque character. He was a handy man, frequently a sort of combination of blacksmith, carpenter and possessing veterinary knowledge. Nevertheless we cannot get along without the services of the blacksmith, despite the garages and filling stations that dot the landscape—there is still a useful niche for the country blacksmith. It looks like there is an opportunity for an occasional husky young fellow who isn't afraid of hard work and a little grime on his hands.

War breeds terrible enemies and weapons. The last war—so far—produced the deadliest fighting methods yet known to man; and the next war will be worse. Some days ago we read of the new French 'ghost airplane' the invention of a captain in the French army. "The ghost plane flies without a pilot and may be directed through Hertzian waves by an order keyboard from hundreds of miles behind the fighting lines. And it is not only pilotless, but invisible and invulnerable. That is to say, it is constructed to rise to such heights as to be out of sight and out of range of the biggest anti-aircraft guns when it drops its devastating bombs on enemy positions. Military enthusiasts already picture squadrons of ghost planes pouring death and destruction out of an empty sky on the helpless and bewildered enemy, whose long-range guns will have become as obsolete as the arrows of the Middle Ages." The great war was supposed to be waged to end wars and still we have inventions of the devil going on to make prospective future wars which will be fought from the air more infernal than the death-dealing mustard gas.

#### BETHESDA

The movers have all got settled in their new homes.

We are sorry to report Mrs. Ernest Steckley is on the sick list.

Sunday night was the coldest this winter. Twelve below with a stiff wind.

How to get over the ice seems to be the biggest question of the day just now.

Wesley Sherrick of Richmond Hill was calling on old friends one day last week.

Miss May Sanderson spent the week with her friend Mrs. Wesley Theaker, Mount Albert.

Mrs. J. Steckley celebrated her 93rd birthday on Thursday, Jan. 17th. Congratulations to you, Mrs. Steckley.

#### LEMONTVILLE

George Hood is in Toronto serving on jury.

Mr. and Mrs. Kellington visited in Claremont on Thursday.

Rev. Dr. Williamson has returned home after spending a few days in Toronto.

The young people are enjoying the skating on the pond these winter moonlight nights.

Mrs. Orville Drewery of Dixon Hill spent Friday the guest of Mr. and Mrs. T. Drewery.

The Ladies' Aid which was held at the home of Mrs. Talbot, 6th line on Wednesday last week, was well attended. Mrs. Talbot served dinner in place of the customary tea, which was much enjoyed by all the guests. Proceeds amounted to nearly \$12. The next meeting will be held at Mrs. Kellington's.

Our clubbing offer with any of the daily papers will save you money and time of sending in your own renewal, whether in town or country.

### A Statement in Detail as to HOW THE MILK IS BOTTLED

The Process of Washing and Sterilizing the Bottles.

The bottles are put into a tank of hot water, heated by steam, free from any odor such as coal oil or any other fuel which may be used for heating the water. A quantity of special soda is added to the water, and after the bottles are thoroughly washed, every bottle is then turned over on a steam nozzle. The live steam is then turned on into each bottle, and no germ of any kind is left. After cooling the bottles, they are then ready to be filled.

The Bottling of the Milk

On the delivery of the milk, samples are drawn from every can, and tested as to the butter fat it contains and the taste. If same is satisfactory, the milk is strained through a double cloth into the bottle filler, the cases of empty bottles are placed under the valves of the filler, and filled without human hands touching same. All this is done in a bright and airy room of the Creamery building, which is not attached to other buildings or stables. The milk is delivered immediately after filling.

By using this milk your conscience can rest that you are doing your duty to yourself and your family because you are getting the safest milk available. The health of growing children is not to be trifled with. If you are not using our milk yet, call us up and we will be pleased to have our driver call at your place as well.
