

WESTERN CROPS FINANCED BY CREDIT PROVIDED BY CANADIAN BANKS

A despatch from Calgary, Alta., says:—Canadian banks are once more prepared to come forward and provide any credit required to finance the harvesting of the crop in Western Canada this fall, according to a statement made here by J. A. C. Kemp, of Toronto, chief inspector of the Bank of Commerce, who is at present on a tour of Western Canada in company with G. W. Rowley, of Winnipeg, Western inspector of the bank for Western Canada.

"The banks have the best feeling for the farmers," said Mr. Kemp, "and bankers still have plenty of confidence in the West. All that is necessary for people to be a little bit careful, work hard, use what they have to the best of their ability and by practising the same spirit of economy as has been evident during the last few years and things are bound to come out for the best."

Mr. Kemp said that conditions in Ontario were good and this also applied to Quebec, the Maritime Provinces and British Columbia. There was every reason for the people of the West to be optimistic.

"Crops throughout the prairie provinces on the whole are satisfactory and there is every indication that the return will be better than was expected a few weeks ago," he said. "All the Western towns I have visited so far appear very active."

N. ONTARIO'S WEALTH SHOWN TO SCIENTISTS

Touring Members of British Association Visit Mining Camps.

The silver mines of Northern Ontario interested the delegates to the British Association for the Advancement of Science while on their way to Vancouver in two special trains over the Canadian National Railways.

Both Cobalt and Sudbury were visited, and in both places the mines, the mills and everything else that goes into the development of mineral wealth in these sections were thrown wide open for their inspection.

Cobalt was reached during the morning, the trains arriving 20 minutes apart, and arrangements were so perfect that large fleets of automobiles were waiting at the station for both trains. The visitors were driven about the town, and were then distributed among the various mines and mills in small parties so that each member was afforded ample opportunity of seeing exactly the manner in which operations are carried on, and of asking such questions as he found necessary.

To the geological section particularly the program proved of unbounded interest. Their eagerness was unlimited, and it is doubtful if so many people ever accumulated so much authentic information in such short time, and it should be a matter of considerable pride and satisfaction to Canadians to know that, with our exception, these experts, who have studied and visited mines and mining in all corners of the world were outspoken in their enthusiasm of the mineral wealth of this district and in their approval of the methods of its development.

The party was enlarged during the morning by thirty members of the botanical section, who joined the train at Timagami. They had spent the week-end in the Timagami Government forest reserve as guests of the Ontario Government. Guides took them over the entire district, and, in addition to collecting valuable specimens of Canadian plant life, they had the opportunity of inspecting several areas of virgin white pine. They were all much impressed with the variety and the virility of the flora in the Canadian woods.

GERMANY TO SIGN LONDON AGREEMENT

Chancellor Marx Announces This Decision Following Debate in Reichstag.

Berlin, Aug. 25.—Chancellor Marx appeared unannounced before the Reichstag late to-night and announced that the German Government would sign the London agreement next Saturday. This was his answer to the refusal of the Deutsch National party to make clear its intention either to accept or reject the agreement, as evidenced by the cloudy pronouncements earlier in the day of the party's leader, Hergt.

In revealing the Government's intention, Marx said the Government did not take the reactionary viewpoint into account, because the reactionaries had not offered any alternative to signing the Dawes report.

The action of Chancellor Marx leaves no doubt that the German Government will do everything in its power to make good its word given the conferees in London, in justifying this promised action, Marx said:

"Not only will the Ruhr be freed in a year, but the Allies indicate that the right bank of the Rhine will be returned as well."

The honey crop of the Province of Manitoba is returned at 3,041,712 pounds for the year 1923, with an average market value of 15¢ per pound on the farms, making a total return to the keepers of Manitoba of \$456,266.

Influx of harvesters to the province caused unemployment to increase from 636 to 932 during the last week, according to the weekly report just issued by Walter Smitten, Commissioner of Labor. This condition was shown in spite of the fact that the placements made during the last week doubled those of the previous period. The placements last week totalled 636.

The local situation on Thursday showed no material change. There are plenty of men available to take care of the first big call for help in the harvest fields of the district, and this is not expected for another week or ten days. The rain on Wednesday lessened the demand considerably.

According to local officials, harvesters from the east are being advised not to come to Alberta unless they first get in touch with the Alberta representative at Winnipeg. The object is to eliminate any possibility of the province being overrun by more harvest hands than there are jobs.

A despatch from Winnipeg says:—While general rainfall has prevailed over the Prairie Provinces during the past two days, prospects are for more settled conditions and rising temperatures. Although the mercury dropped considerably at many points during the night, there were no reports of frost and it is generally believed that the danger from this agency has passed.

Viscount Grey

of Fallodon, who has retired from the position of leader of the Liberals in the House of Lords.

RAILWAYS PREPARE FOR BIG WHEAT RUSH

Cutting is General and Yield of Nearly 300,000,000 Bushels is Predicted.

Winnipeg, Man., Aug. 24.—With wheat cutting general this week throughout the prairies, the railways have massed thousands of cars for the big rush. With the pool granting dollar advance, Fort William basis number one, the bulk of the grain is expected to get on the market this season in record time. It is considered by all classes of the grain industry that the yield will be close to 300,000,000 bushels, with one and two grades leading in quantity, so good is the general condition. No difficulty will be experienced in the matter of labor. Just at present Canadian exporters find it difficult to make any progress owing to world conditions.

Wheat is making fast and is in most cases beyond the stage where it can be seriously hurt by rust or frost. Harvesting operations will commence quite a big scale on Monday, but it will be September 1 before the later fields come in. Some very fine samples of wheat have been sent in to the grain exchange and one or two also that were seriously affected by rust. Southeastern Manitoba seems to have it the worst.

General conditions have been fairly satisfactory and it is extremely doubtful if there has been any considerable frost damage, although temperature were dangerously close to freezing early in the week, and there has been if anything too much rain.

Winnipeg, Aug. 25.—The first car of 1924 wheat to be shipped was moved to-day from Altona, Man., consigned to Keewatin, Ont. It was a first-class sample of Ruby wheat, weighing 64 pounds to the bushel, and grading No. 1 Northern.

Montreal, Aug. 25.—Of the nine and half million bushels of grain now in store in the harbor elevators, seven million bushels will move in September, it was promised to-day by grain brokers at a meeting held in the Harbor Commissioner's office to consider the present congestion in the Port of Montreal. After considerable discussion between the parties interested, it was considered that the situation would soon remedy itself.

Oldest Inhabitant Dies in Province of Alberta

A despatch from Edmonton says:—After an illness of only two days, Mrs. Anna Jones, aged 104, Alberta's oldest inhabitant, is dead at her home near Gainsford. She was in full possession of her faculties and was proud of the fact that she never had to wear glasses. She was born in Russia.

The botanical section of the British Association for the Advancement of Science carried their search for floral treasures deep down into the Niagara Glen. Prof. Ostenfeld of Denmark is leading the party shown.

HOUSE OF DEPUTIES ENDORSES DAWES PLAN

French Government Secures 26 Votes More Than its Normal Majority.

Paris, Aug. 24.—The Chamber of Deputies has given its approval to the London Conference methods for putting the Dawes plan into execution and has voted confidence in Premier Herriot's Government, 336 to 204, some 26 more votes than its normal majority. The debate began Thursday afternoon and ended at 4:30 this morning. Thirty-five hours of the time was spent in speech-making.

After the Communists had succeeded in disturbing the first day's debate by noisy rowdyism, the discussion maintained a high level, devoid of unseemly incidents which so frequently mar the Chamber's proceedings.

The impassioned tone of M. Herriot in his speech last night was in marked contrast to the matter-of-fact statement which he made in the opening.

Premier Herriot defended the Dawes plan and the London agreement in a two-hour reply to his critics. He took as his theme: "France must do what is right."

M. Herriot, frankly admitting that "we bring you the first-fruits of hope," and not "complete peace," told the Chamber that any of the Deputies would have done as he did under the circumstances. Throughout the Premier tried to keep the defence on high moral grounds and endeavored to show that he could not use the Ruhr as a club at the London Conference because

M. Poincaré, in behalf of France, had given his word that it was not a military occupation, but merely protection for the economic mission. So when the mission was withdrawn, why should the soldiers stay?

YOUNG AUSTRALIANS ON EDUCATIONAL TOUR

Trip Across Canada Forms Part of Arrangement for Benefit of Fifty-four Boys.

Quebec, Aug. 24.—Fifty-four young Australians of ages ranging from 18 to 21 arrived here to-day for a trip through Canada. They are members

of the Young Australia League and their trip forms part of a scheme of education by travel which has been in vogue in Australia for the past 15 years under which city boys are transported to the country and vice versa, but it has never before been attempted on a scale such as is here being done.

The party, after a series of entertainments by the Quebec Rotary and Kiwanis Clubs, and the I.O.D.E., visiting of the cruiser Adelaide, St. Anne de Beaupre Shrine, with a reception at Spencerwood, the Lieutenant-Governor's official residence, will go to Montreal to-morrow, where similar entertainments will be given them.

The party will then go right across Canada to Vancouver, whence they will sail for home September 24. The boys will stop at Ottawa, Toronto, Niagara Falls, Sarnia, Port Arthur, Winnipeg, Regina, Saskatoon, Calgary, Edmonton and Jasper National Park. The party left Sydney, Australia, in February and have arrived here from England.

Most Powerful Single-Plane in World Takes Initial Flight

A despatch from London says:—The Cubarco, Great Britain's new aerial dreadnaught, had its first trial flight on Thursday, at Brough Aerodrome.

It is the most powerful single-engine plane in the world, measuring 88 feet from wing tip to wing tip, and 54 feet from nose to tail. It carries a new 1,000-horsepower Papier Cub engine.

One staircase connects the central cabin with the pilot's cockpit, while another gives access to a compartment behind the wings, which will be the machine gun's tower.

The giant bomber will carry three tons of explosives. The stairways allow the crew to work in shifts during the flight.

Canadian Appointed Engineer of New Zealand Railways

A despatch from Wellington, New Zealand, says:—Percy Simms, a Canadian engineer, has been appointed assistant chief mechanical engineer of the New Zealand Government rail-

ways.

RECORD CROWD AT OPENING OF BIG FAIR

Vice-Admiral Sir Frederick Field Takes Salute as Ex-Service Men March Past.

Toronto, Aug. 25.—The greatest opening day the Canadian National Exhibition has ever seen.

Such is the story of Saturday at the Big Fair, the story of Warriors' Day of the Exhibition's Empire Year—a day which will live for long on the annals of Toronto. All day the busy clicking of the turnstiles told of the advent of the eager thousands, and when the day was done a record had been established which brought wonderment even to Exhibition officials.

Attendance figures for the first day stand at \$2,500—an increase of six thousand over last year, and the largest number of persons to attend the Exhibition on opening day in its entire history. Early in the day experienced Exhibition visitors had begun to predict a new record and to make estimates, but the official figures exceed even the most optimistic guess of the onlooker.
