ODDFELLOWS HELD IMPORTANT NIGHT

The local lodge of the Independent Order of Oddfellows held a very unique gathering in their lodge rooms on Monday evening of this week. It was observed as a past master's night when the offices and work of the evening were conducted by Past Grands of the order. W. R. Sanders was the presiding officer in the absence of Dr. Dales. A part of the evening's work was the exemplification of the second degree on behalf of two candidates from Brougham Lodge.

At this meeting voting took place for the Grand Warden and Grand Lodge trustees. Mr. Clayt Baker was also selected as delegate to Grand Lodge, which convenes in Hamilton in June.

Following the work of the evening, lunch was served to the members and visiting brethren from lodges in the surrounding district, and a happy social time enjoyed.

HOARDED CANS ARE NOW DISPOSED OF

The council's announcement that last Friday would be observed as garbage or tin can collection time, brought them more business than all the town teams could handle during the day, consequently the work had to be carried on the following day until all the rubbish, mostly tins, was conveyed to its final disposal in the town dumping grounds. The manner in which the citizens heaved great piles of tins from the rear of their premises and deposited, ready for the collectors, was in itself, sufficient justification for the undertaking on the part of the council. All these rubbish piles would each be a breeding spot for flies, hence the community is in that much more sanitary condition by having them assembled in the dumping ground. As much of this material had accumulated for years, the undertaking next year will not be so great. As the dumping ground presents an unsightly view from the north of O'Brien Avenue, the council will take steps to have it shut in with a cedar hedge. Also it may be possible to apply a chemical to the old tins that will hasten their departure into nothingness.

The Tribune is in receipt of several letters concerning the "Tin Can Day" held last Friday. Only communications that bear the signature of the writer can be published. Each letter, however, which we are unable to print, were of a jocular nature, and one writer says that after visiting the dump, they realized that it must have been disheartening for some to part with old relics of almost a life time. Please sign your letters when sent to the editor.

REFUSED BAIL

Thomas Slee, Zephyr, who was sentenced by Justice Riddell to 12 years' imprisonment for arson, made application to Justice Smith for bail pending appeal at Osgoode Hall today. It was refused.

ELECTED OFFICERS

The members of the Methodist Ladies' Aid, Stouffville, met on Tuesday evening at the home of Mrs. J. A. Heise, for the annual election of officers. All the former officials were re-elected with the exception of the president, Mrs. H. W. Sanders being placed in this office to fill the vacancy caused by the removal of the former president, Mrs. W. J. Thompson, to Newmarket.

Convener Chairman of meet'g

HEALTH REPORT BY MISS R. HALLY

I beg to submit the following report regarding the demonstration of public health work in the town of Stouffville, commenced March 2nd and ending April 23rd, 1925.

This work is being done in all countries of the world today: First, because there is a very high infant and maternal death rate. Second, war statistics showed 50% of the men unfit for active service. They had defects that could and should have been corrected in early life. Dr. Thos. D. Wood statistics show that about 40% enter school life with defects; 64% with defective teeth and 31% with defects other than teeth. It mental and physical development go hand in hand, many children start life handicapped.

There are four divisions of this preschool, prenatal, school and adult. Each phase of this work has one ultimate object in view, the building up of healthier, happier Canadians.

Prenatal is one of the most important. In spite of all our education today, the greatest single cause of deaths in infants, is due to prematurity. In 1923, Toronto, there were 923 deaths under 1 year of age, 257 due to prematurity, 148 within the first week of life, 41 within the first month, and 18 over 1 month. Regular visits to a doctor and dentist are essential in this period, and a well balanced diet. The diet and nutrition of the mother, very largely determine the strength and vitality of the first teeth of the child.

Preschool period is also very important; for it is in this period, death and disease pile up their biggest score. Dr. Arnold Gesell, of Yale University says: "There are ten times more deaths in the preschool than the school period. Susceptibility to communicable disease is greater in the younger child. 80% of deaths from diphtheria occur under five years of age. 3% of all deafness 1-3 of all cripples and considerable portion of blindness occur in the preschool period. Our educational failures, the maladjustments and the behaviour disorder of the school beginner are symptoms of what we left undone.

The work done in Stouffville where there were children, also to any home needing advice or instructions regarding health matters, or bedside nursing.

Total population 1086
Number homes visited 170
Number people seen 570
3 Mothers' Conferences were held, total attendance 37
Preschool 4
School 3
Adults 26
At these conferences health posters and a model layette were displayed and literature distributed. Children were weighed and measured and advice given re diet, hygiene and general care. 2 Home Nursing classes for adults were also held, general care of the sick was demonstrated.

Out of the 14 babies seen, 11 were breast fed. It is a well-known fact that the breast fed baby has the best chance of survival and healthy childhood. The next best substitute is cow's milk, for the child's proper growth and development. It also has considerable effect on the preservation of the first teeth. In my visits to 92 preschool children, I think incorrect feeding is the outstanding defect and the cause of some cases of malnutrition. Faulty nutrition will also result in dental caries through its effect upon the saliva. Regular visits to the dentist are necessary for the care of the temporary teeth.

In the preschool period the child forms habits which influence his whole future life, so too much emphasis cannot be placed on the four essentials to good health. Proper food, rest, exercise and fresh air day and night. Correction of defects are a problem. For instance, an orthopedic case was found that needed medical and perhaps surgical care at the earliest possible moment or it would be too late to have a successful correction made. No doctor was being consulted.

Dr. W. J. Bell held a children's clinic in Stouffville, March 25th and the following is the report given:

There were 54 in attendance, and 75 defects located, as follows:

Adenoids	12
Tonsils	12
Teeth	13
Enlarged Glands	13
Malnutrition	5
Goitre	12
Orthopedic	4
Heart	2
Infantile paralysis	2
Infants	7
Preschool	11
School	36

One third of the preschool children only are vaccinated. Number preschool 106, (under six years of age)

School work is divided into three groups, prevention, correction, and health promotion.

Prevention 1—Sanitation and ventilation. 2—Daily inspection by nurse or teacher for cleanliness or communicable. 3—Examination for physical or mental defects.

Health Promotion 1—Weighing and measuring the best method in interesting a child in its proper growth and development. 2—Class

BOARD OF TRADE

At a meeting of the Board of Trade on Monday evening in the Council building, the first step towards improving Memorial Park with the funds so generously donated by the citizens, was taken. The sum of \$75 was voted to the grounds committee with which to erect swings, teeters and seats. Also the grand stand is to be painted on Friday afternoon by any citizens willing to lend a hand.

A unanimous vote of appreciation was extended to Mr. Harvey Lawson chairman of the canvassing committee, for the indefatigable manner in which he conducted the recent campaign, resulting in getting sufficient funds to pay off the park mortgage and leave a snug balance for park improvement. N. M. MacLean was appointed chairman to complete the collections promised until the funds are all in. It was announced that the team collecting the most money in the campaign was that of Messrs. T. W. Klinck and H. W. Sanders, with Messrs. F. W. Silvester and F. W. Marshall coming second.

The President, Dr. Sangster was accorded a unanimous vote of thanks for his donation of land to the park property.

The First of July program was discussed at some length and the executive delegated to push ahead with arrangements.

room teaching, stories, health plays and songs. 3—Home nursing and first aid lessons.

Total number of school children examined by the nurse	249
Total number defects suspected by the nurse	568
Out of the 249 examined only 136 belong to Stouffville, and 63 to the country. The number who have had:	
Measles	203
Diphtheria	11
Whooping cough	108
Chicken Pox	129
Mumps	118
Scarlet Fever	23
Rheumatism	4

Total	613
Number Vaccinated were 156, and 93 not vaccinated.	
Suspected defective vision	58
Suspected Adenoids	56
Suspected disease Tonsils	98
Defective Teeth	192
Enlarged Glands	67
Goitre	68
Malnutrition	47
Orthopedic	2

To total 568
264 school visits were made to the homes and it was found that 28 tonsillectomies and 29 cases adenoids had been removed in the preschool period or shortly after entering school. There were also an unusually large number of children attending the dentist regularly and having both temporary and permanent teeth filled. Notwithstanding these facts, there are still 69% with defective teeth, 39% with diseased tonsils, 18% underweight for height 27% with goitre.

The children who are underweight for height, or malnutrition may be due to physical defects or faulty health habits. Regular visits to the dentist for the care of temporary or permanent teeth are also essentials to good health. Proper food, rest, exercise and fresh air day and night have also considerable effect on the general health of the child.

There are 23.2% with defective vision. This would not only have an effect on the general health of a child, but would make considerable difference in their progress at school. Ventilation of a room is also very important, children study very much better in a properly aired room. On the basis of 180 days in the year, the average child misses 11 days from school, 6 out of these are for illness, 2 out of these are for common colds.

After completing my survey of the school, the teachers very kindly took charge of the daily classroom inspection for cleanliness, and communicable. An individual health record was made out for each child and stars given where the health rules had been kept. Only those records which the child is responsible for himself were taken into account. However, the most important health habits take place in the home, and this method of keeping a record at school, acts as a stimulant to practicing health habits at home. This should be a pleasure to the child and is only meant to be encouraging and interesting.

Five Home Nursing and First Aid classes were held for the High School girls with a total attendance of 125. These classes included instruction in bathing baby, night and day clothing, bed making, care of the sick, such as preparing a tray and serving it. Treatment in simple emergencies, and first aid, also bandaging.

Before concluding, I would like to make three recommendations: 1—Dental and medical inspection periodically for the schools. 2—More time spent on physical exercise and out-door sports encouraged. Sports teach children courage, co-operation and control of temper. 3—Pupils be encouraged on a knowledge of health habits and all round living.

I wish to express my appreciation of the co-operation and assistance I received from those whom I was brought in contact during my demonstration in Stouffville.

Respectfully submitted
Rose Hally,
Public Health Nurse

PERSONAL NOTES

Rae Perry is home from Midland on a two weeks' holiday.

Miss Darrach of Toronto, is visiting with Dr. and Mrs. Rowan, Church street.

Miss Alma Mowat has returned home from a month's visit with her grandparents here.

Mrs. F. W. Marshall and two children are spending a couple of weeks with relatives in Oakville.

Mr. and Mrs. Delos Morris of Tilsonburg, motored here on Tuesday to spend a few days in the old home locality.

Mr. Harvey Lawson of Church street, went to Toronto this week, where he expects to be engaged for some time.

Over the week end Miss Helen Gardener of Toronto, visited with Miss Guardhouse of the Continuation school staff.

On Monday, Mrs. Burwash, a resident of the east end, left for Owen Sound to attend the funeral of her daughter, who died suddenly.

Mrs. Bertha Irwin of Warsaw, N. R., has been visiting with Mr. and Mrs. S. Irwin. During her visit here the three were guests of Aurora friends Thursday last.

Miss Gansby of Toronto, has returned home after spending two weeks with her friend Miss Dorothy Lawson.

Robt. Dales who has been on an extended trip through the Eastern provinces of New Brunswick and Nova Scotia, as inspector for the Bank of Nova Scotia, spent the week end with his parents, Dr. and Mrs. F. A. Dales.

WITH THE CHURCHES

MENNONITE CHURCH
A. G. Warder, Pastor
Sunday, May 3rd

10 a.m.—Sunday School.
11 a.m.—Subject, "Faith in His Blood."

7 p.m.—Missionary Service; Bro. Fred Story of San Pedro Mission, South America, will address the meeting. Come and hear of the neglected continent.

CHRISTIAN CHURCH
Edgar Morton, pastor

Sunday, May 3rd

In this season of so much house cleaning, it is worth while to have that prompt our minds toward the words of the Master: "Blessed are the pure in heart, for they shall see God." "The blood of Jesus Christ, God's Son cleanseth us from all sin" 1 John 1: 7. That is the most wonderful cleansing in the world.

We are always pleased to see strangers at any of our services. Our aim is to be helpful.

PRESBYTERIAN CHURCH
Rev. R. Young, pastor

Sunday, May 3rd

10 a.m.—Sabbath School, from this time forth Sabbath school will be held in the morning.

11 a.m. and 7 p.m.—Congregational worship.

Melville Church
1.15 p.m.—Sabbath School.
2.15 p.m.—Congregational worship.

METHODIST CHURCH
Geo. E. Coulter, pastor

Sunday, May 3rd

11 a.m.—Quarterly Communion service. Matt. 26: 29 "But I say unto you, I will not drink henceforth of this fruit of the vine until that day when I drink it new with you in my Father's Kingdom."

We invite those who recently signed Decision Cards to take communion with us, thus further acknowledging Christ to be your Saviour. In the fellowship service take a part.

2.30—Bible Study.

7 p.m.—The Pastor.

Monday, 8 p.m.—Young People's League with special program. Leader Mr. Robt. Silversides.

Monday, 8 p.m.—Official Board will meet in Bloomington Methodist church.

Wednesday, 8 p.m.—Prayer service.

THE DUMPING GROUND

Dear Sir,—
Since the council of last year purchased a piece of ground at the south east of O'Brien Avenue for a dumping ground, I entered a big protest, and there was a petition against it. It is somewhat of a surprise to find that some of those who signed the petition, have ignored it by putting out their rubbish for collection last Friday.

Since the "can collection day", my opposition is more than justified. Is the council going to disgrace our village by piling rubbish on the very door step of one of the best streets in town? The reeve and councillors should have more respect for themselves and others. Further, those who own lots in the locality and other property have suffered a loss.

Yours for fair citizenship
Amos Lehman.
