

LOCAL HAPPENINGS

Found—Sweater Coat on Kennedy Road north of Cashel. Owner Phone 3903, Stouffville.

The hydro electric peak load for Stouffville is running at 85 h.p. per month, which is an excellent showing.

Potatoes were being shipped from Goodwood station last week at \$1.20 per bag. There is said to be a slight on the early varieties.

The local raspberry season which is just closed was one of the best in years. The crop lasted longer than usual by about ten days.

Constable Harry Perry is now decorated with the badge of his position, and being armed with such an important breast plate, we may expect to hear of some speeders being hauled before the beak charged with insane motor driving as under the act.

The cauliflower market took a sudden drop last week. Up to that time local growers about Stouffville who produce thousands of heads, realized as high as \$2.50 per dozen, but the drop of last week reduced them as low as 50c per dozen. It is hoped and expected that the market will rally considerably from such an unprofitable level.

B. E. Beebe welds new steel points on worn cast plow shears. Try 022.

Lost—License Plate No. 28-577. Finder notify R. English, Bloomington.

The man who wrote three thousand words on a post card ought to be able to do wonders with a few acres of land.

Mr. Chris. Micklensen, butter maker for the Stouffville Creamery Co. will change his position next week, having taken a similar job with a dairy in the east end of Toronto.

James Hackney, a farmer living south of Goodwood, suffered a fractured and dislocated right wrist, while cranking a car on Monday of last week. The dislocation was soon corrected by a local physician, but it will take a little time for the fracture to knit.

Stouffville bowlers made a good showing at the Aurora tournament last week. An Aurora rink captured the first prize, while F. L. Button's rink from here took up the second prizes which were leather bags for carrying bowies. D. Rusnell's rink also did well, and although not getting in the prize ring, they stood fourth in a long list of contestants and had the honor of winning the most number of games on the green that day. The four teams winning the most points were: Aurora 23, Button's 22, Aurora 20, and Rusnell's 18.

Little Edna Burkett gave a birthday party for her young friends on Tuesday.

Read the label on your paper, and see that your subscription is paid. It's only a small matter individually but collectively these accounts mean much to The Tribune.

A number of leading Liberals went over to Sutton on Thursday to meet the Premier, Hon. W. L. M. King, who spent a day or two in the riding.

An unauthorized report has been circulated to the effect that Dr. F. A. Dales of this town is discontinuing his country practice. The doctor wishes it understood that such a report is untrue and unfounded, and warning is issued against the continuance of such misstatement.

Many residences in town have been greatly improved this season by a fresh coat of paint. Other improvements are constantly being made. At present Mr. James McCullough, barrister, is erecting a fine double garage on his property on O'Brien Avenue. Mr. Benj. Doten has erected a verandah at the rear of his residence on Main street, and Mr. Murray Hill is constructing a new wall under his house on Mill street.

For the production of early table corn this year, Mrs. Albert E. Paisley has established a record. She has been using cob corn from her garden in the east end since July 26th. The seed is from Western Canada, but Mrs. Paisley is unable to name it. It produces a short white cob of good flavor, and we regret that we were absent when a sample was sent to our home to enjoy last month. It is a rare thing to have corn mature so early in the season in this section of Ontario.

Stouffville people were well represented at the Sutton horse show last week, and they were pleased to see Mr. Michael Wallace of Lemonville, carry off the second prize for best gent's turnout in a large class of drivers. Also S. J. Boyd, who formerly resided just south of Stouffville was awarded the red ticket for his team of draught horses. That people admire the noble horse, and a good race, was evinced by the big crowd on all three days of the fair, despite the fact that it was held in one of the busiest seasons for the farmer.

The over-abundance of public school teachers is having a backward effect on salaries. The trustees of Glasgow school, Messrs. Harry Wellman, Jas. Alsop and F. Paulikat have just engaged Miss Copper of near Elgin Mills at a salary of \$800, to handle this school which has an attendance of 40 pupils, one of the best in Uxbridge Township. Cedric Watson of Goodwood, the retiring teacher received \$1200 for his services. J. S. Latcham, the secretary, was so rushed with applicants, personal and by letter, that he could scarcely get on with his harvesting, there being 150 to apply.

One of our citizens, D. H. Rusnell, said the other day that he was never so near stung to death as one day last week, while working among bees, although he had worked with them for 35 years. Extracting honey for Mr. Simeon Stouffer, he just nicely started when a bee stung him on the hand, and immediately a whole army attacked his hands and wrists. One or two others attacked his throat, and at the same time one backed up hard against the point of his nose. With such inoculation, the object of the attack felt a little sick after making his retreat, and the soreness which followed can only be imagined. The only bright spot about such an experience which friends can offer Mr. Rusnell is that such inoculation is a sure cure for rheumatism, but D. H. feels that the remedy has taken all the sweetness out of the possible cure.

Next week the council will proceed with the erection of a small extension to the south end of the council chambers where the electrical supplies of the town will be stored, after which the clerk's office is to be moved into the council chambers. This will relieve the town from renting Mr. Urquhart's building on Main street which has been in use as a clerk's office for years. It will no doubt be available for some other business when the council give up possession.

Any section of the country will claim that it possesses the most beautiful and finest women to be found, but notwithstanding this claim they all had to take a second place at Herb. Lennox's picnic where a prize was given for what was termed a mothers beauty competition, and the winner over the fifty contestants was Mrs. Harry Paisley of the 9th concession, just north of Stouffville. Mrs. James Wesley Sabine of Gormley was given second prize. We are glad to have the most attractive looking mothers in this out-of-the-possible cure.

The hydro electric bills for the consumption of electricity for the months of June and July were issued this week to the householders of Stouffville. They contained not a few surprises owing to numbers of users all over the town installing various contrivances in order to use the amount of the minimum bill which is \$1 monthly. In some cases where bills advanced more than was expected, they were not really bad when all things are taken into consideration, such as the convenience of electricity and the saving in coal-oil or other fuel which would have been used. One of the greatest surprises came to a lady in the west end, who in an effort to use a dollar's worth of energy in the month, undertook the unheard of task of doing down her fruit on the electric toaster. Naturally the waste of heat was great and the time consumed in cooking was almost everlasting. The bill at that was only \$2.50 for a month, but it was a shock none the less. Next thing we will hear of someone trying to make toast over the electric curling tongs.

James A. Stewart, Jr., and his son Jas. Fred Stewart passed through Stouffville on Saturday enroute for Kingston after visiting at the home of Capt. Augusta Law in the 7th of Whitchurch. The Stewarts travelled in their Ford car all the way from Maryland, U.S.A., carrying camp supplies in the rear of the car which is virtually a cross between a Ford, a Maxwell and a truck; for the engine was made at Henry's factory, the radiator was a Maxwell, and the body was a contrivance between a runabout and a truck. Mr. Stewart and his son are thoroughly enjoying their trip and the camp life.

Threatening rain kept a number from attending the ice cream social at Bethesda on Thursday evening of last week, but notwithstanding the total proceeds amounted to \$30.

Dr. Dales has purchased a new Flint car of the coach model. This is a beautiful production of the automobile art, and is the only car of the make in Stouffville. Baker Bros. are the local agents.

The town reservoirs from which we get our domestic water supply are now well filled with water, the supply being almost above normal. Samples were sent to Toronto on Monday by the local health department on which a good report is anticipated as to the quality.

Rev. Wm. Pugsley, a well known and highly successful evangelist, conducted the services in the Baptist church on Sunday. In the evening the Sixth Line Baptists united with the local congregation, for a profitable service. A number responded to the powerful address and pleading of the evangelist to reform their way of living by leading a Christian life.

All officers of the Stouffville branch of the Bible Society, including the ministers of the various churches, or their representatives, are requested to attend a meeting in the interests of the Society at the Mennonite church on Friday evening of this week, at 8 o'clock, to consider a program for Sept. 6th, when Rev. P. G. McLaren from the Provincial headquarters will be available for several addresses.

Last week we advertised the loss of \$100 belonging to a farmer's wife at Lemonville, and when the lady came to our office in great despair we tried to console her by suggesting that the money might have been left at home, as she could not give any account of bringing it with her. Happily enough, it turned up this week as predicted, and in a very different mood we were informed over the phone on Tuesday to cut the advertisement.

The Women's Institute are holding a picnic in Memorial Park, Stouffville, on Wednesday, Aug. 17, commencing at 2 o'clock. There will be sports and prizes awarded, also a refreshment booth on the grounds. This is an ideal spot for a picnic. Come and bring your baskets and enjoy the afternoon. Everybody welcome, this includes your husbands, children and sweethearts. Members are requested to come sharp on time to discuss some important business.

Next week the council will proceed with the erection of a small extension to the south end of the council chambers where the electrical supplies of the town will be stored, after which the clerk's office is to be moved into the council chambers. This will relieve the town from renting Mr. Urquhart's building on Main street which has been in use as a clerk's office for years. It will no doubt be available for some other business when the council give up possession.

Mr. Baldwin has got rid of the coal strike problem. Mr. Rodes likewise, but we in Ontario are still worried about that motto of "Keep Cool with Coolidge".

Freeman Ramer of Mount Joy threshed one hundred bushels of Alisike seed, the yield of ten acres, for the Geo. Robb estate last week. This is a big yield and at present market prices will bring over \$700.

At the Sutton Horse Show last Saturday we noticed a "Toronto beauty" dressed in knickers, with short cropped hair, holding a cigarette between her fingers. Things are getting so that it takes a keen sighted man to discern whether it is a boy or girl one is looking at sometimes.
