## New Wardrobe Overnight!

Wear all the new shades as quick as they come in style! It doesn't take money—just a few cents worth of dye. Get out your old, dull or faded garments now—tomorrow you'll have a closet full of fashionable clothes!

Perfect results right over other colors. Dye your curtains, hangings, spreads, too. Give your underwear delicate tints. All easy, if you use real dye. Use original Diamond Dyes. FREE now, from your druggist: the Diamond Dyes Cyclopaedia, simple directions, wonderful suggestions. Ask for actual piece-goods color samples. Or big, illustrated book "Color Craft free, if you write DIAMOND DYES, Dept. N2, Windsor, Ontario.

**Diamond Dyes**  
Make it NEW for 15 cts!

### Good Reception.

Tides and volcanoes, it appears, are two of the latest culprits that have been caught in the act of disturbing the radio peace. At least this is the theory advanced by a man who has spent the last year investigating radio conditions south of the equator. But this does not mean that reception in South America is not in many instances of the very finest. "I found reception best," this man wrote in reporting to the concern for which he has been working, "in Saltillo, Mexico, a place 5,000 feet high. Here on a five-tube set were received the Canadian stations and North American stations from the Atlantic to the Pacific." There are not many radio enthusiasts in Canada who could report on any better success than this.

## GOD KNOWN BY SPIRITUAL SENSE

### Material Knowledge Alone In- terfere.

Christian Science Doctrine Explains  
its Growth in Favor.

The lecture broadcast from Massey Hall, Toronto, last Sunday afternoon, as advertised in these columns, was given by Charles L. Ohrenstein, C.S.B., a Jew, who saw that in Christian Science the teaching and practice of Christ Jesus should not antagonize Judaism. He said in part:

A great many people may now be said to know something about Christian Science. They know that many have been healed by it; that many have been made more useful men and women since becoming Christian Scientists; better husbands, wives, fathers, mothers, children, neighbors, friends, citizens. Many reputable doctors now acknowledge that Christian Science heals, and recommend it to patients whom they cannot cure. Many clergymen acknowledge that it is reforming a great many people, and that it is accomplishing great deal of good in the world. But because most people are still unacquainted with the method by which these good works are brought about, with the teachings and application of Christian Science, its good works are still quite frequently attributed to other causes than that of which they are the demonstration and result—to other causes than to the power of God and of His Christ. The reason, it is but fair to assume, is not always the desire to be unjust to Christian Science. For generations upon generations people have become so used to trusting only material means to overcome troubles and to restore and maintain health, and so disused to trusting God to help them that they find it difficult, if not impossible, to believe the Bible promises and assurances that God is a "very present help in trouble;" that He "healeth all thy diseases," and that in reality it is God who does so whether He is credited with doing it or not. Nor can the prevalent distrust in God be looked upon as strange when the training and customs of mankind through centuries upon centuries are taken into account, for as Shakespeare said, "Use almost can change the stamp of nature," and the true nature of man is to trust God.

The reflection of any of you here in a mirror must be obedient to you; or it could not be your reflection. Just so to the reflection of God, man—which means every one of us, must be obedient to God, to good, in order to be man. Obedience to God, then, that is, obedience to all that is right, and good, and beautiful, and pure, constitutes the true man, and no one can be nor is man without this obedience. It is by the true teaching as to what we really are, that Christian Science encourages and spurs us on to reclaim and to regain ourselves. It not only promises, it fulfills. Listening to it and obeying its demands, we mount higher, become more able, and more free; and through complete obedience to its teachings can that complete freedom for which we long, the kingdom of God on earth, be gained.

### A Composer.

A woman was taken the other day to see the composing-room of our printing works.

"This," said her escort, "is the composing-room."

The woman gazed around with admiration. Her eyes lighted on a burly composer.

"Do ask him," she said, "to play something of his."

### Still in the Distance.

A very small boy was standing in the middle of a country lane with a large shotgun, when a stranger came along and asked him:

"What are you hunting, little man?" "I dunno," answered the little fellow; "I ain't seen it yet."

Rub your scalp with Minard's Liniment

## RHEUMATIC SUFFERERS

### May Obtain Relief by Enriching the Blood Through the Use of

Dr. Williams' Pink Pills.

In the days of our grandfathers rheumatism was thought to be the unavoidable penalty of middle life and old age. Almost every elderly person had rheumatism, as well as many young people. It was thought that rheumatism was due to exposure to cold and dampness, and it was treated with liniments and hot applications which sometimes gave temporary relief but did not remove the trouble. In those days there were many rheumatic cripples. Now medical science understands that rheumatism is a disease of the blood and that with good red blood any man or woman of any age can defy rheumatism. There are now many elderly people who have never felt a twinge of rheumatism, because they have kept their blood in good condition, and there are many who have conquered it, by building up their weak, watery blood. The blood-enriching qualities of Dr. Williams' Pink Pills is becoming every year more widely known and the more general use of these pills has robbed rheumatism of its terrors. At the first sign of thin, impure blood protect yourself against the ravages of disease by taking Dr. Williams' Pink Pills. They have helped thousands—if you give them a fair trial they will not disappoint you. Their value in the case of rheumatism is proved by the statement of Mr. Finlay Beaton, Blackstone, N.S., who says:—"I feel it a duty to tell you of the wonderful benefit I derived from the use of Dr. Williams' Pink Pills. I suffered untold agony from rheumatism and a rundown condition. The trouble left me incapable of work of any kind, and for a part of the time I was unable to move without the assistance of a cane. I took different medicine from doctors, and also other remedies that were recommended, but did not improve and had about given up hope of getting better when a friend advised me to try Dr. Williams' Pink Pills. I did this with the result that within four months I was as well a man as ever I had been. I can say that I was a complete wreck when I began using Dr. Williams' Pink Pills and that this medicine completely built up my health. This was some years ago, and I have had no return of the trouble since. I give this statement hoping it will benefit others."

You can get these pills from any medicine dealer or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### "We Have Been Friends."

Caroline Norton, who wrote the following verses, was a granddaughter of Richard Brinsley Sheridan, the dramatist. When very young she married the Hon. G. C. Norton, but the marriage was unhappy, and ended in separation. This unhappiness led her to devote her life to literature and to the cause of women and children, and much legislation of recent years received its earliest impetus from her.

We have been friends together,  
In sunshine and in shade,  
Since first beneath the chestnut trees  
In infancy we played.

But coldness dwells within thy heart,

A cloud is on thy brow;

We have been friends together;

Shall a light word part us now?

We have been gay together,

We have laughed at little jests;

For the fount of hope was gushing,

Warm and joyous in our breasts.

But laughter now hath fled thy lip,

And sullen glooms thy brow;

We have been gay together;

Shall a light word part us now?

We have been sad together,

We have wept with bitter tears,

O'er the grass-grown graves where

slumbered

The hopes of earlier years.

The voices which are silent there

Would bid thee clear thy brow;

We have been sad together;

O, what shall part us now?

### The First Mirrors.

Into a pool of clear water a woman (probably the first woman) gazed with quite as much satisfaction as her daughter of later years did into a glass of crystal clearness. That was the first mirror. Because a woman demanded a looking-glass that would be satisfactory on cloudy, windy days as well as on quiet, sunny ones was no doubt the reason why polished metal became popular and looking glasses were fashioned of burnished gold, silver and bronze, set in elaborate frames incrusted with precious stones. These were, of course, owned only by persons of great wealth, while the poorer folk used looking glasses made of the base metals.

Glass mirrors were not introduced until the fifteenth century, and during this century steel and crystal were favorite materials, while mirrors of glass were occasionally made. At first glass mirrors were very expensive. They were always made small and were often carried as an accessory of dress on a chain or ribbon. Many were beautifully mounted and were given as tokens of friendship among persons of high degree.

## THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the  
Ideal Remedy for Babies and  
Young Children.

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Boats.

How lovely is the sound of oars at night  
And unknown voices, borne through

windless air.

From shadowy vessels floating out of sight

Beyond the harbor lantern's broken glare

To those piled rocks that make on

the dark wave

Only a darker stain. The splashing oars

Slide softly on as in an echoing cove

And with the whisper of the unseen shores

Mingle their music, till the bell of night

Murmurs reverberations low and deep

That droop towards the land in swaying flight

Like whispers from the lazy lips of sleep

The oars grow faint. Below the cloud-dim hill

The shadows fade and now the bay is still

—Edward Shanks.

Minard's Liniment relieves stiffness.

Withdrawn.

Judge—"What is your occupation?"

Tramp—"I haven't any. I just circulate around, so to speak."

Judge, (turning to clerk)—"Please note that this gentleman has been retired from circulation for 90 days."

Many who would give the world

to possess a certain article, fail to

purchase it because it costs a dollar or two more than they want to pay.

## RED ROSE "is good tea" TEA

Over 30 years a standard  
wherever good tea is liked.

### Famous Wax Works to be Rebuilt.

Madame Tussaud's Wax Works, in-

ternationally famous ever since Dickens wrote his "Old Curiosity Shop," which was burned out in a great fire more than a year ago, is to rise again.

The new company, Madame Tussaud's (1926) Ltd., which was formed recently to take over the century-old

interests of the show, has now actually

taken possession of the immense

building, which has been an empty

shell ever since the fire.

A new building costing \$1,000,000

is to be erected on the old site, and

in, addition to the wax figure ex-

hibition, is to hold a motion-picture

theatre and a restaurant. The famous

"Chamber of Horrors," which was in

the old exhibition, miraculously sur-

vived the fire, and the other wax

figures, representing the world's fa-

mous people, are to be reproduced.

Madame Tussaud's was originally

started in France during the French

Revolution. It came to England in

1802, traveled about the country and

about ninety years ago settled per-

manently in London. Since then it

has been the mecca of London's youth

and of young and old from the provinces.

A visit to London without seeing

Madame Tussaud's has never been

considered complete. A great grand-

son of the original Madame Tussaud

is one of the directors of the new en-

terprise.
