

RHEUMATIC PAINS DUE TO THIN BLOOD

Relief Comes Through the Use of Dr. Williams' Pink Pills.

The most a rheumatic sufferer can hope for in rubbing something on the swollen, aching joints is a little relief, and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thin and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears.

There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these, Mrs. W. F. Tait, McKellar, Ont., who says:—"I am one of the willing ones to tell you of the great benefits I received from the use of Dr. Williams' Pink Pills. After lying in bed for seven weeks suffering untold agony with inflammatory rheumatism, relief finally came through the use of this medicine. I could not move in bed only as they lifted me, and I could only sleep when opiates were given me. The medical treatment I was taking seemed of no avail. Then I was advised to try Dr. Williams' Pink Pills, and soon I began to get relief. After taking six or eight boxes the rheumatism was banished and I had never felt better in my life. It is several years since this happened and I have had no return of the trouble since I may add that I recommend the pills to two of my friends who were suffering with rheumatism and the pills were equally effective in both cases."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canada's Great North

Baltimore Sun: North America, one must assume, has got its affairs into very good order when, as a matter of routine administration, the Canadian Government imports reindeer to supply food for Eskimos in danger of starvation in the distant and desolate regions along the Mackenzie River. Not the remotest part of this vast territory lies outside the attention of authorities. Very little time has passed since Eskimos of the North or Indians of the great plains starved on occasion or died of disease without notice, but now even the nomads along the Arctic Ocean are under observation.

Beavers For Scotland

Canada has donated a pair of live beavers to the Zoological Society of Scotland. These little animals, captured and conditioned in Jasper national park, were transported to Montreal and placed aboard the ss. "Cairnisk" when she cleared on May 18. Their destination is the Zoological Gardens at Edinburgh.

Don't Make a Toy Out of Baby

Babies Have Nerves

By RUTH BRITAIN

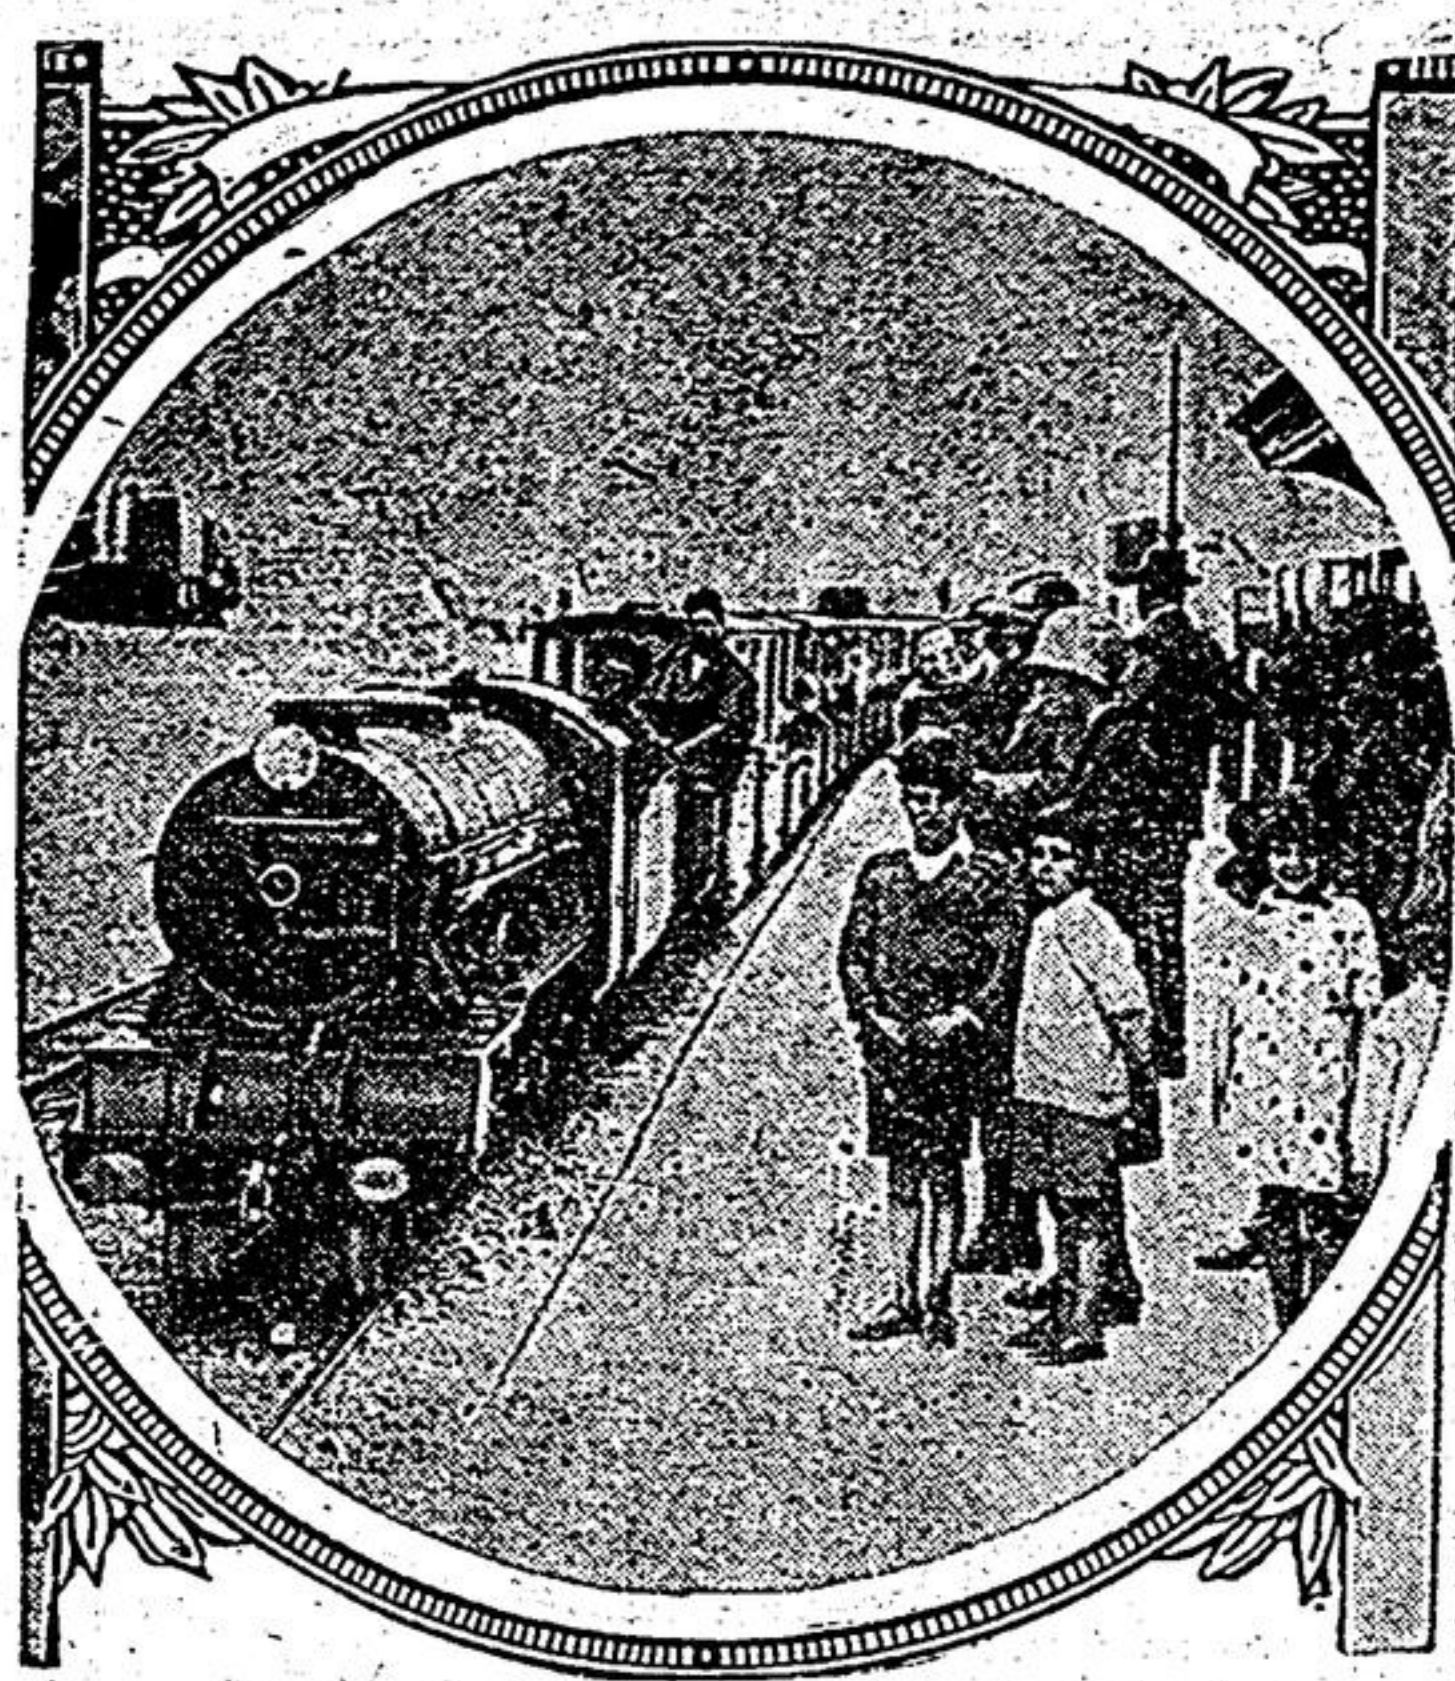

Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

SMALLEST RAILWAY IN THE WORLD

Great numbers of holiday visitors have travelled on the world's smallest public railway, which serves Romney, Hythe and Pymchurch. Picture shows the tiny train steaming into Romney.

Says British-Born Not Welcomed

Bishop of London Claims
Dominions Cold to Old
Countrymen

CANADA'S FUTURE

Dr. Ingram Found Foreigners
Preferred in North-West

London.—Addressing a meeting of the Church of England Council on Empire settlement yesterday, Right Rev. Arthur Foley, Winchester-Ingram, Bishop of London, declared that he was disappointed in his recent tour of the British Dominions. He had failed, he said, to find an enthusiastic welcome for a Briton in any part of the Empire. That was not what he had expected.

"I tried to point out at Toronto, on my trip through Canada," he said, "that we were filling the North-West with Russians and Poles and people from God knows where and that statement got me into considerable difficulty. I found Southern Europeans were welcomed perhaps even more enthusiastically than Britons."

"It is disheartening to our fellows to be called a 'so and so Tommy' when they arrive in Australia," continued the Bishop in referring to British immigration to the antipodes. Our young men are not keen to go out there and the tone of East London is "keep out the Jews and let us have the country to ourselves."

Rev. M. Dixon, of Calgary, said continental emigrants to Canada were successful there because they went out as families and not like many English peoples who went out to Canada to see how they liked "this God-forsaken country."

Keep Canada British

Toronto.—Right Rev. Arthur Foley, Winchester-Ingram, Bishop of London, visited Canada in the summer of 1926, and arrived in Toronto on August 17. He explained on his arrival that he was visiting the British Dominions mainly in the interests of the Church of England Empire Settlement Scheme. During his stay in the city he addressed several gatherings and on each occasion emphasized the necessity of keeping Canada British.

Speaking at a luncheon, tendered him by the civic authorities, the Bishop of London said he believed Canada was one of the future great nations of the earth.

"You have the right outlook across the Rockies," he declared, "but you have not the people to develop the resources of the country. You need people of British stock and should not depend upon immigration from continental Europe."

Addressing the Empire and Canadian Clubs of Toronto, on August 19, the Bishop of London spoke of the ties which held together the component parts of the Empire and stated his anxiety that Canada retain its British stock. He said he realized the necessity for filling the open spaces of the broad Dominion, but appealed to Canadians to guard against allowing foreign population to outnumber their own people.

Records Show Differently

Ottawa.—Canada continues to attract more British settlers than any other country, according to an official bulletin issued by the Overseas Settlement Department in London. The British records show that during the calendar

year 1927, British subjects leaving the United Kingdom to take up permanent residence outside of Europe numbered 153,505, of whom 52,916 came to British North America.

The next largest movement was to Australia, which received 40,991. New Zealand received 7,841, British South Africa 7,572, India and Ceylon 6,476, other parts of the British Empire 6,937. The United States received 25,662 and all other foreign countries 5,110.

In the face of a general decrease in British emigration, Canada was the only important country which showed an increase in 1927 compared with 1926 and easily led all others in the total number of Britishers received.

Fear of Poorhouse by Aged Lacking in Saskatchewan

Ottawa.—Old age without fear of the poorhouse is an actuality in Saskatchewan. As a result of an agreement between the Provincial and Dominion Governments, persons of seventy years and more who have resided in the province for at least twenty years and who are British subjects will be paid a \$200-a-year pension, it is announced in a bulletin of the Department of Colonization and Development of the Canadian Pacific Railway.

Half of the amount of the pension is paid by the Dominion Government and the other half by the provincial. Saskatchewan is the second province actually to begin old age pension payments. British Columbia has been paying them since last September and, up until the end of March of this year, has disbursed about \$240,000. Yukon Territory has also accepted the scheme, but it is not so far in effect. Manitoba has passed the necessary legislation to take advantage of the old age pensions act, and it is expected that payments will begin there during the summer.

Alberta, another prairie province, and several of the Eastern provinces have the matter under consideration of paying their old-time citizens a stipend annually to ward off the wolf of poverty.

THE EXCEPTION

"There, never was a married man without a mother-in-law, you think?"
"Of course, there never was."
"Don't you think Adam was a married man?"

Imperial Preference and the U.S.A.

Providence Journal: (The growing tendency of American shippers to use Canadian ports is attributed partly to the British system of imperial preference. The United States Shipping Board is investigating the question.) Obviously we cannot change the British imperial preference system unless we have something substantial to offer in return. The Shipping Board's report will be awaited with deep interest not only for an explanation of the conditions that are said to exist but also for recommendations concerning ways and means to recover our proper share of the traffic.

Excited Boy—"Come on, quick! The old man is battin' the old woman again." Policeman—"Why don't she come herself if she wants to make a complaint, or have him arrested?" Excited Boy—"She's too busy. She's got 'im down and is bumpin' 'is head on the fure."

Canadian Per Capita \$16.50

Figures for 1927 Also Show
Expenditure Averaged
\$16.01

Ottawa.—Total ordinary receipts per capita for the nine Provincial Governments of Canada were \$16.50 for the fiscal year 1927. Total ordinary expenditures per capita for the same period were \$16.01.

By provinces ordinary receipts per capita were:—British Columbia, \$35.23; Alberta, \$19.88; Manitoba, \$17.92; Ontario, \$17.67; Saskatchewan, \$15.61; New Brunswick, \$12.40; Nova Scotia, \$12.00; Quebec, \$11.88 and Prince Edward Island, \$9.65. Ordinary expenditures of each province for its fiscal year ended 1927, according to the Dominion Bureau of Statistics, were:—British Columbia, \$33.75; Alberta, \$20.23; Manitoba, \$16.16; Ontario, \$17.50; Saskatchewan, \$15.51; New Brunswick, \$11.28; Nova Scotia, \$12.09; Quebec, \$11.17; and Prince Edward Island, \$10.04.

GREAT HELP TO YOUNG MOTHERS

Baby's Own Tablets Have Many
Uses and Are Absolutely
Harmless.

To have in the house a simple, harmless remedy for the minor ills of babies and little children is a great boon to young mothers, and this is exactly why Baby's Own Tablets have been found in thousands of households. The Tablets regulate the stomach and bowels, break up colds and simple fevers, allay the irritation of cutting teeth, yet they have no drug taste and the children like them.

Concerning the Tablets Mrs. Ruthven Crommiller, Ruthven, Ont., writes:—"Kindly send me your little book on the Care of the Baby. I have two children, one four years of age and the other a year and a half. Both are in excellent health and the only medicine they have had is Baby's Own Tablets. I always keep the Tablets in the house and am happy to recommend them to other mothers."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"A woman has been known to shoot a man for a hat."

A distinguished and well beloved bishop is so absent-minded that his family is always apprehensive for his welfare when he is away from them. Not long ago, while making a journey by rail, the bishop was unable to find his ticket when the conductor asked for it. "Never mind, Bishop," said the conductor, who knew him well, "I'll get it on my second round." However, when the conductor passed through the car again the ticket was still missing. "Oh, well, Bishop, it will be all right if you never find it," the conductor assured him. "No, it won't, my friend," contradicted the bishop, "I've got to find that ticket. I want to know where I'm going."

Many a fellow who's big noise at the office is only a little squeak at home.

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are overstimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one, harmless, tasteless, dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Fighting Moths

U.S. Bureau of Entomology
Outlines the Best Plan for
the Annual Treatment
of Winter Clothing

When a succession of mild days indicates that heavy winter clothing and coverings may be discarded for the summer, the housewife has a busy day making blankets and cloaks safe from moths. Furs, Persian rugs and other valuable objects are packed off to cold storage, while everyday household and personal effects are taken care of in the house.

For generations housewives each year have taken up the cudgels against these destroyers. Many of their old-fashioned remedies are accepted still by science, such, for instance, as sunning clothing to kill the larvae. But other science has pronounced worthless-tobacco extracts and tobacco powders, lavender, fowers, cayenne and black pepper, dusts of allspice, of air-slaked lime, of salt, of eucalyptus leaves, hellebore, quassa chips, angelica root, pyrethrum stems, powdered sulphur, borax, colocynth pulp, sodium bicarbonate, lead carbonate and lead oxide are specified in this category by the United States Bureau of Entomology. Cedar chips and shavings are said to be only partially effective.

The first essential in battling moths is to make sure that no larvae are hidden away along the eams, in deep folds or in pockets of the clothing to be packed away, and then that all containers are absolutely tight. Beating and brushing and cleaning must precede laying away, and furs suspected of being infested must be gone over with a fine tooth comb. Larvae lodged on material to be put away may be killed by ironing, by exposing in superheated rooms or by leaving several hours in the sun. Or the fabric may be dipped for ten seconds in water heated to 140 degrees Fahrenheit. A strong solution of neutral laundry soap also has a killing effect.

The Bureau of Entomology considers naphthalene in flakes or balls the best preventive of destruction from moths, provided the clothing is closely confined and not packed on closet shelves or in drawers where the fumes may readily escape. Paradichlorobenzene, gum camphor and pyrethrum powder are also pronounced effective.

For Hay, Fever—use Minard's.

Playgrounds for Children

Le Canada (Lib.): Never a day passes by but we read in the paper that children have been struck by motor cars or heavy lorries. The accidents are, alas! too frequent in the summer, especially while the school holidays are on. Parents should impress on their children that they must not play in the streets. They should be sent to the parks and playgrounds.

The "star" soprano of the village made a brave attempt to sing "I'll hang my harp on a weeping willow tree," but her voice broke on the top note. After three unsuccessful tries, a voice from the back of the hall suggested kindly: "Try 'anging' it on a lower branch, Miss!"

The Master—"Sambo! you good-for-nothing scamp, where have you been loafing all day. Didn't I tell you to lay in some coal?" Sambo (indignantly)—"Yes, sar, Ah's been laying in de coal all day, though there is a lot more softer places where ah'd rather lay!"

Crawls Four Days With Leg Broken

Courage and Scout Training
Save Life of 12-year-old Boy

San Francisco.—Crawling on hands and knees for four days from the rim of Half Dome to Mirror Lake on the floor of Yosemite Valley and part of the way with a broken leg, 12-year-old George Monheit, of Piedmont, fought a herculean fight for life—and won.

The boy, missing for about a week, and for whom all hope had been abandoned, was found alive, collapsed on a rock at the edge of Mirror Lake to-day, according to reports here. He was virtually naked, his face and lips torn and bleeding and sun-cracked, his body covered with bruises and one leg broken. The boy had, in four days, crawled on his hands and knees from the rim of Half Dome down an almost perpendicular cliff, a feat probably never attempted before and believed impossible.

But his courage and boy scout training saved his life in this, one of the most heroic of boyhood episodes. Young Monheit disappeared while on a hunting trip near Vernal Falls.

Since his disappearance and searching parties have hunted all Yosemite without success. They never believed it possible for a mountaineer, let alone a boy of 12, to crawl a cliff nearly a mile high from Half Dome, where he was last seen. (Mail and Empire.)

TIRED, WEAK, NERVOUS WOMAN BENEFITED

Praises Lydia E. Pinkham's
Vegetable Compound

Asbestos-Mines, Quebec.—"After the birth of my second child, I was always feeling tired, nervous and weak and had headaches, backaches and terrible pains every month. I suffered two years before I tried Lydia E. Pinkham's Vegetable Compound. I got four bottles at first and it did me a world of good. I would not be without it in the house now, and have another six bottles in. I recommend it to every woman I know."—Mrs. T. BARRITT, Box 114, Asbestos Mines, Quebec.
