Man Originated In Kalahari Desert

Dr. Cadle of Cameron-Cadle African Expedition Claims Discovery of Humanity's Birthplace

Johannesburg—"I am able definitely to confirm that man emerged in the lap of this brooding Mother Earth in this strange, wild country," writes Dr. Ernest Cadle of the Cameron-Cadle expedition to the Kalahari Desert. "The expedition," he adds, "entered the desert at Kachechecha and traveled up the valley, which extends more than 300 miles to the Mobobo flats country, and obtained many interesting facts about the life of the bushmen."

From details of the teeth of these strange creatures, Dr. Cadle hopes to get a detailed story of the development of mandibles and human teeth, and he believes it will have great significance in the records of human evolution.

Professor Mannen and I have been wrestling with the mighty problem of the birthplace of man," the doctor states. "Professor Mannen, who is the geologist of the expedition, discovered that there has been no geological change in these parts since the age of man began."

"Professors Mannen and I have been wrestling with the mighty problem of the birthplace of man," the doctor states. "Professor Mannen, who is the geologist of the expedition, discovered that there has been no geological change in these parts since the age of man began."

China and Liquor

Dry Law Not Good for China, Says General Chiang, Abstainer

Shanghai—General Chiang Kalshek, the boyish looking general who led the southern forces from Canton to Shanghai and on to Peking, is a conservative revolutionist.

He also has views on prohibition of alcoholic drinks. In an interview with The Associated Press he disclosed an unexpected familiarity with the ideas, customs and manners of the West, which have been forcing their way into Chinese life. He admits their value and power, but clings unwaveringly to the customs and arts of his own country and in some instances resents the intrusion of Western ideas.

A teetotaler and a non-smoker, General Chiang is repelled by the American institution of prohibition. Indulgence or abstinence in regard to alcohol or tobacco is a question for each man to decide for himself, General Chiang believes. Personally he has decided for abstinence. But, he added, "I cannot be enthusiastic about your American prohibition, because it does not appear to me that the state can regulate every phase of the private life of an individual."

"We are a nation of individualists, and do not easily give up our personal inclinations." He also indicated a feeling that such interference is beneath the dignity of government. "There is so much for us to do that is elemental in the reconstruction of the country that we cannot afford time for what one must regard as secondary questions."

Protects Aged

In a report from Vancouver giving the total payments in old-age pensions in British Columbia from Oct. 1, 1927, to March 1, 1928, as \$262,904, of which the Dominion Government contributed half, it is noted that the idea of protecting aged citizens of the Dominion is gaining ground fast since the enactment of the Dominion pension law.

Saskatchewan began paying old-age pensions last May, and the Commissioner of the Yukon Territory has been authorized to do the same. Manitoba has passed the necessary legislation for old-age payments and they are expected to begin in October. The number of pensioners in British Columbia is 2,712 and the average monthly payment to individuals \$17.43.

Two Salad Dressing Hints

The vinegar saved from a bottle of sweet pickles makes a very delectable addition to French dressing, used in the same proportion and in place of ordinary vinegar.

"After a bottle of catsup or chile sauce has been emptied, a certain amount always seems to cling to the sides of the glass. Try pouring French dressing, just before serving, into the bottle and shake it vigorously for a few moments. The tomato sauce becomes blended with the dressing and adds very much to the flavor. It is especially good with sliced cucumbers and also adds to sliced, hard-boiled eggs served on lettuce.

LAUDS NEW MCINTOSH

Apple is Earliest of its Kind, Says U.S. State Horticulturist

Another step has been taken toward achieving our goal of a McIntosh apple for every day in the year with the development of 'Early McIntosh' in the orchards of the New York State Agricultural Experiment Station in Geneva," says Dr. U. P. Hedrick, station horticulturist, in commenting recently on work under way to create new varieties of fruit.

"The new apple is a McIntosh in every respect and comes into season in August," says this specialist, who adds that every one who has examined the new variety regards it as a distinct addition to the fruit industry and as having special promise for local markets for roadside stands. Early McIntosh was obtained from a cross between McIntosh and Yellow Transparent.

"Fruit growers in New York are in need of an early red apple of good quality," adds Dr. U. P. Hedrick. "Such an apple would sell well in all markets, and would be particularly valuable for roadside booths where so many early apples are now being sold. Nearly every one now knows McIntosh and likes it to eat out of hand or however served from the kitchen. It is hardly too much to say that it is about the best general purpose apple."

"Who can name an early apple with fewer faults of fruit than a McIntosh ready to eat in August? That is what early McIntosh is. Besides pleasing the taste, this early apple also pleases the eye. The red is handsome; the shape is the most attractive of apple molds and permits packing in various packages in which apples fit well and look well. Best of all, the appearance does not belie the flavor. It is similar to and quite the equal of McIntosh in flavor, which for most of those who eat apples is unsurpassed."

60,000-Ton Liner Building

White Star's New Vessel to Be the World's Largest.

The White Star Line London office officially announced on Sept. 8 that the new liner recently laid down for the company by Harland and Wolff, at their Queen's Island Yard, Belfast, is to have a tonnage of 60,000, and will hence be the largest vessel in the world.

Since the first announcement was made last April the plans have been considerably enlarged so as to surpass the dimensions of the new Cunard liner now building at Clydebank whose tonnage is estimated at 58,000. The largest ships afloat to-day are all Atlantic liners. They are the Majestic (White Star), 56,621 tons; the Leviathan (U.S. Shipping Board), 54,232 tons, and the Berengaria (Cunard) 52,226. The new White Star liner, with an estimated speed of 30 knots, is expected easily to win the Atlantic record which is now held by the Cunard Mauretania, which was built twenty-two years ago.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dumas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

An Act of Faith

Manchester Guardian (Lib.): The Pact does not automatically turn the world into a Garden of Eden. It does not even take us automatically out of Bedlam, but it gives statesmanship a new start; it gives mankind a new hope. It is like the League of Nations. Anybody can point out the weaknesses of the League; describe its failures, analyze its vices; but the League has put man's hope for peace and his nobler ambitions on a new basis is blind to the history of human institutions. The Pact is not a mere act of policy; it is an act of faith. Nobody, therefore, can measure its effect on the imagination of the world.

I venture to estimate that the knowledge that has come from experiments showing that this world has already existed for a billion years and that man has in all probability another billion years ahead of him; is likely to have, in the long run, a much greater influence on human conduct than the invention of either the airplane or wireless, important thought they may be.—Dr. Robert Andrews Milliken.

I am only the candidate's wife—the candidate is one who does all the talking.—Mrs. Hoover.

Veterinaries use Minard's Liniment.

Ladies Do Forget

Lady Esmonde Delays Liner Eight Minutes to Recover Jewels She Forgot at Hotel

The White Star liner Cedric was delayed eight minutes in sailing recently for Liverpool because one of her 250 cabin passengers, Lady Anna Frances Esmonde had left her jewel case in the safe of the Hotel Irving in Gramercy Park, where she and her husband, Sir Thomas Esmonde, of Dublin, had been stopping.

When Lady Esmonde arrived on board the Cedric and missed her jewel case she became anxious and told her husband that she did not wish to sail without it. Edward F. Mallon, head of the detective force on the Chelsea piers, solved the problem by sending Edward Cleary, one of his men, to the hotel in a taxicab. He returned in twenty minutes and the liner sailed at 11.33 instead of 11.30.

Sir Thomas declined to place a value on the jewels belonging to his wife, which he said were family heirlooms, handed down from the days of Charles II.

Sir Thomas was associated with Parnell in the nationalist movement in Ireland for many years.

WEAK AND NERVOUS

A Condition Always Due to Thin, Watery Blood.

Thin blood and weak nerves generally are found together. Red blooded people seldom complain of nervousness. The reason is that the blood feeds the nerves and keeps them toned up to do the work nature intended. When the blood is thin and weak it fails in this important function and nervous troubles follow. The following case will interest those who need a tonic for the blood and nerves. Mrs. D. Veno, Union Square, N.S., says:—"With a feeling of gratitude I write to tell you what Dr. Williams' Pink Pills did for me. I had become badly run down, and reached the stage when I could not do my housework. I was not only weak, but my nerves seemed completely shattered. The least noise would startle me and I was subject to nervous headaches. Worse still, I could not sleep at night. Perhaps I would get an hour or two sleep, and then lie awake for the rest of the night. I had reached a stage when I actually feared I would lose my mind. Up to the time I decided to take Dr. Williams' Pink Pills, nothing I had taken seemed to do me any good. I got a few boxes of these and soon there was no doubt they were the medicine to help me. As I continued the use of the pills I gradually grew stronger, ate better and could sleep at night, and now I am as well and strong as a woman could wish to be. I hope some other weak, nervous person will be benefited by my experience."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

SHOCKING

Scarecrow: Well of all the nerve. Those idiotic doves are billing and cooing right under my nose!

Amateurs Get Credit For Low Wave Advance

Hamburg.—Credit for development of short-wave transmission was accorded American radio amateurs in an address by Professor Rukop, of Cologne, before the Congress of German Natural Philosophers and Medical Men. It was pointed out that the development of high frequency channels has brought about television, photo-telegraphy and other technical features.

Signals from American amateurs, he said, are heard frequently better in Europe than some of the more powerful stations.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude herbs. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

FINANCIAL NEWS

JACKSON MANION DEVELOPS EXCELLENT ORE IN THREE LEVELS.

H. E. Harcourt, general manager of Jackson Manion Mines, reports that better than \$20 per ton over a minimum width of 8 feet is being opened up in the drift and that some assays over 10 feet widths have been remarkable. Over 100 feet of drifting has been done on the 125 and 210 ft. levels and lost on the 250 ft. horizon and it is the purpose of the management to carry working north to intercept ore indicated by diamond drills to be high grade. There is 200 feet to go. Developments to date indicate that the Jackson and Rowell veins are distinct ore bodies. Shaft-sinking to 500 feet is being speeded and it is anticipated that by February next stations will be cut at 275 and 500 feet when lateral work will be pushed to open up the ore at these two new horizons. The ore faces on all three upper levels look well, showing free gold.

RUMORS OF STOCK DIVIDEND FOR IMPERIAL OIL.

Rumors of a stock dividend have accompanied the recent upswing in Imperial Oil stock. For a considerable period steady accumulation of the stock had been in progress around the 70 mark without causing any special change in quotations. This was reported to have been for the account of interests who are confident the company will follow its usual policy of making a distribution in the form of stock, rather than paying a larger cash dividend.

No stock dividends or rights have been given since 1925, and it is figured that the steadily larger profits which have been earned in the interim makes it likely that a division of the resulting increased surplus in one form or other is an early possibility.

This belief has quickened the demand for the stock recently, and reduction in the available supply in the market has resulted in the advance in price assuming a more rapid pace than has usually been the case in Imperial Oil.

LARGE ORDERS TO BE PLACED BY CANADIAN NATIONAL.

Montreal.—Inquiries have been issued by the Canadian National Railway for certain equipment for both the freight and passenger service.

These inquiries are now being made for 1,500 50-ton box cars and 30 tank cars. These 1,500 cars, when purchased, will replace a certain number of older box cars, scrapped annually. For the passenger service, inquiries have been issued for 25 first-class coaches, two combination baggage-smoking cars, and fifteen sleepers. These latter are of the twelve-section one drawing-room type.

These orders will be placed during the autumn months.

The immensity of possible discovery contrasts with our feebleness in putting it into words; for that reason never throw away hastily any old faith or tradition because of some dogma of science.—Sir Oliver Lodge.

"We are making progress toward social peace and contentment with the preservation of private industry, of initiative and full development of the individual.—Herbert C. Hoover.

Importance of Punctuation

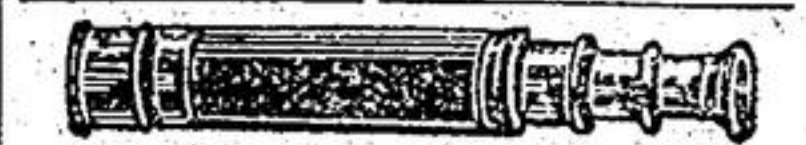

A semi-colon and a comma inserted in the right places will convert the following old rhyme from nonsense to sense:—"Every lady in this land Has twenty nails upon her hand Five and twenty on hands and feet: All this is true without deceit." Here is another rhyme of the same kind, which becomes sense if a semi-colon is placed correctly in each line: "I saw a pack of cards gnawing a bone I saw a dog seated on Britain's throne I saw King Edward shut within a box I saw an orange driving a fat ox I saw a butcher not twelvemonth old I saw a great-coat all of solid gold I saw two buttons telling of their dreams I saw two friends who wished I'd quit these themes."

—Stephen Lang.

Schoolmaster—"Now I want you to tell me which of those words are singular and which are plural. Tomkins, you take the first, 'trouser.'" Tomkins (after deliberation)—"Singular at the top and plural lower down, sir."

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant or babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

DON'T DO THIS! LEONARD EAR OIL

Improves Hearing, Relieves Head Noises

Nine out of ten cases of DEAFNESS and HEAD NOISES are caused by catarrh mucus (matter) in the Eustachian Tubes, which connects the nose and the ears. Leonard Ear Oil removes the MUCUS, OPENS UP THE TUBE and THE OTHER AIR PASSAGES OF THE HEAD, and the result is improved Hearing and relief from Head Noises. It is not put in the ears, but is "INSERTED IN THE NOSTRILS" and "RUBBED IN BACK OF THE EARS" and special instructions by a noted Ear Specialist in each package for different kinds of Deafness and Head Noises tell you exactly how to take care of your own case. Leonard Ear Oil is not an experiment but has had a very large and constantly growing sale since 1907, and every year it has relieved thousands of people of their Ear Troubles. No matter how long you have been deaf, nor how deaf you are, or what caused your deafness, or how many things you have already tried which have failed to relieve you, Leonard Ear Oil has relieved many such cases as your own. Why not you? The price is \$1.25. Leonard Ear Oil is for sale at Druggists, or direct postpaid upon receipt of price.
