## INFORMATION FOR THE BUSY FARMER

(From Dept. of Agriculture)

### Crop Diversity Helpful

Dr. G. I. Christie, president of the Ontario Agricultural College, in a recent address said that the recent gloomy talk about the price of western wheat was of minor concern to Ontario, where a diversity of products is grown and where it is possible to make a choice among half a dozen lines to specialize. The time has not yet come when the acreage of any crop can be regulated and an assurance given of highly remunerative prices. The element of chance must be reckoned with farming as on the stock exchange. Were it possible to fix the price of wheat at cost of production plus twenty per cent., there would be a rush to grain growing with a resultant surplus in a few years that the world could not use.

### Stresses Home Markets

In his first public statement, Mr. Jas B. Fairbairn, newly appointed Deputy Minister of Agriculture, gives expression to the following views: "My thought is that we should stress Ontario products. We should try to create in the minds of all housewives the desire to purchase Ontario products. We should also educate the dealer. We need the co-operation of city people, the Manufacturers Associations, Chambers of Commerce and service clubs. We have to stress before these bodies the fact that in order to bring about a reorganization of methods, we have to encourage them to think of Ontario products. My main thought is going to be to stress the purchase of Ontario farm produce. I want to stabilize the home markets for the Ontario producer. We have the very best quality of fruits and vegetables that can be produced anywhere."

### Current Crop Report

Many fields of fall wheat are being plowed up in York and Ontario Counties. Sufficient hay to carry all stock to grass is indicated in Bruce. In Dundas American buyers have been active and a number of grade cows have been sold for from \$85 to \$100. The top bull at sale in Carleton brought a price of \$225, while 250 stocker cattle were sold at the same sale. A large acreage of potatoes has been set out in Elgin.

Cold weather has effected little injury in Essex County except to tobacco plants, some of which are frozen. A poor growth of fall wheat and meadows in Haldimand has resulted in the plowing up of several fields. Many clover and fall wheat fields in Middlesex are said to be practically worthless.

### Honor Retiring Official

Heads of the various branches of the Department made a presentation on the last day of April to W. Bert Roadhouse, former Deputy Minister, on the occasion of his transfer to the position of chairman of the Agricultural Development Board. Mr. Roadhouse recalled that when he became Deputy Minister 18 years ago, the Department expenditures were in the neighborhood of \$750,000 annually whereas at the present time they are approximately \$3,000,000, apart from capital expenditures. The board of which Mr. Roadhouse now takes charge, has loaned more than \$27,000,000 to the present time.

### Soy Beans More Popular

Soy beans are coming more and more into use as an annual hay crop. For this purpose soy beans should be sown early in May at the rate of one and one-half to two bushels per acre, and the crop cut when the pods are about half grown. The seed may be sown with a grain drill in the same way as field peas. Any soil which grows corn well will produce a good crop of soy beans. They produce a large yield of palatable hay which is very rich in protein. The only objection to the use of soy beans at the present time is the high price of the seed.

### Of General Application

A townsman in Western Ontario recently wrote to the Ontario Agricultural college asking whether the Provincial Corn Borer Act had any application, in cities, towns and villages. Professor Caesar, who is in charge of the enforcement of the act replied emphatically as follows: "Growers of small plots of corn in villages, towns and cities must remember that the act applies to them just as much as to the farmers, and that sometimes their corn is more heavily infested than the corn on farms. All corn stalks on these plots and all coarse weeds alongside them must be gathered and burned as soon as they are dry and the ground then spaded or plowed."

## GOODWOOD

J. F. Reid and daughter Viola, visited friends in Lindsay on Sunday.

The Goodwood United Sunday School held their rally service last Sunday. The basement was crowded for the occasion.

The remains of the late John Parry were moved from the vault in L'Abadie to Goodwood cemetery on Monday.

Anniversary services at the Baptist church next Sunday afternoon and evening. Music by the United choir, while the Rev. John Best will preach at both services.

Keep in mind to clean your shoes before going into T. J. Poskett's dining-room as he has just laid a new hardwood floor, the finest in the town.

Joseph Cooper of the second concession is the owner of the line Clydesdale, Atlantic 2nd, which was the pride of Graham Bros. stables at Claremont prior to 1916. Atlantic 2nd will stand at his own stables for this season.

Parking space promises to be at a premium on Friday night for the evening in the hall under auspices of the baseball club. Don't fail to come to this box social and enjoy the drama, "The Road to the City" given by Sandford talent.

If you want to see a smile that lasts and looks like satisfaction call at C. W. Watson's store and note the beam on Charlie's face. He became the father of a son on Sunday.

Mrs. Barrand of Detroit and Mr. and Mrs. Punle of Toronto visited Mr. and Mrs. Thos. Dowsell on Sunday.

Mrs. Harriett James, one of our highly respected residents stumbled over a box in the cellar of her home last week, fell to the floor and sustained a fractured arm at the wrist. Mrs. James who is in her 77th year is wonderfully smart, but accidents happen of this sort even to the younger folk, and we hope for an early recovery. Her daughter Mrs. A. C. Burkholder of Stouffville has been here since the accident.

In the death of Mrs. Walter Baston which took place at the late home here on Wednesday, May 14, a life-long resident of this township, and a member of widely known family has passed on. She was a daughter of the late John Saxner, and since her marriage had lived in Goodwood being among our older residents. Besides her husband who has the sympathy of all, Mrs. Baston is survived by an only daughter, Mrs. Joseph Crawford of Goodwood. Afflicted for many years with poor hearing, Mrs. Baston also suffered several light strokes in recent time, which culminated in her final passing. The funeral service on Friday was largely attended, and was conducted by Rev. Mr. Baldwin of the Baptist church.

General regret was manifest here on Saturday in the loss sustained by a former citizen of this place, when it was announced that Mrs. C. McKay of Toronto had died at the early age of 26 years. She was one of three daughters of Mr. Alexander (Sandy) Brown, and was born in Goodwood, the parents leaving here when the deceased was a little tot. Mrs. McKay leaves a husband and one child about three years of age. The funeral here on Monday was attended by many old friends of the family, among the mourners being George Brown, Goodwood, Robert of Stouffville, Miss Annie Brown Goodwood, all uncles and aunt to the deceased. Two sisters are Mrs. Wylie and Mrs. Moore. Interment took place in the local cemetery.

Our citizen W. A. Henderson may be generally known as a musician of repute, and a school teacher of wide experience, but he is also a successful poultry raiser. His fine flock of birds kept in the village produce over 100 eggs per day, and they have been grading the best. Of course George Todd will grab the credit for the good grade and perhaps the many eggs as well for W. A. is feeding a particular line of poultry feed sold by the deputy reeve

## RINGWOOD

The announcement by Premier King last week of an early election brought out some discussion around the veranda of the corner grocery that morning, and everybody was discussing the tariff, although I am free to admit that I for one don't know a "dern" thing about it, and judging by the talk others knew less. One farmer from up the eight happened along and he told a little story which so deeply impressed me with the fact that tariff is humbug for many people that I pass on the story. This fellow went on to say there was once a farmer in Montana, who had plenty of hens, ducks, geese pigeons and turkeys, but no milking cows. So he used to go to his neighbors, who specialized in dairying, and trade fowl and eggs for butter and milk without doing any harm to the Stars and Stripes, to the democratic institutions of the United States, or to the Republican party. Now, this farmer moved to a farm immediately north of his dairying neighbor, and as it happened, found himself a resident of the foreign country of Saskatchewan.

So one day he walked south with a dressed goose and some eggs and wanted to trade them for some butter. But the dairyman was greatly shocked and grieved. "My dear neighbor!" he exclaimed, "I am astounded at such wickedness. Do you not realize that if I get eggs from you I shall be ruining the American hen industry, and if

## Here and There

(519)  
With a prepared acreage greater by 31 per cent. than that of 1929, a better moisture situation and other indications presaging general good conditions for the year, the Canadian West is now busy seeding, according to the latest report of the agricultural department of the Canadian Pacific Railway.

Nearly \$28,000,000 was voted by the Ontario Legislature recently for hydro-electric development work to be undertaken this year in the province for the Ontario Hydro-Electric Commission, a provincial government organization. Over \$18,000,000 is to be spent on the extension of the Niagara hydro system, upon which many millions have already been spent to provide cheap electric power over a wide area of rural and urban territory.

"There is a very large amount of capital in England ready for investment and it is felt in that country that it should go to Canada," said Major L. A. Jones, economic editor of the London Morning Post, who handed recently at Saint John from S.S. Duchess of Athol, on a trip to Canada for the purpose of fostering better economic relations between the Dominion and the Motherland.

# Presenting—new features

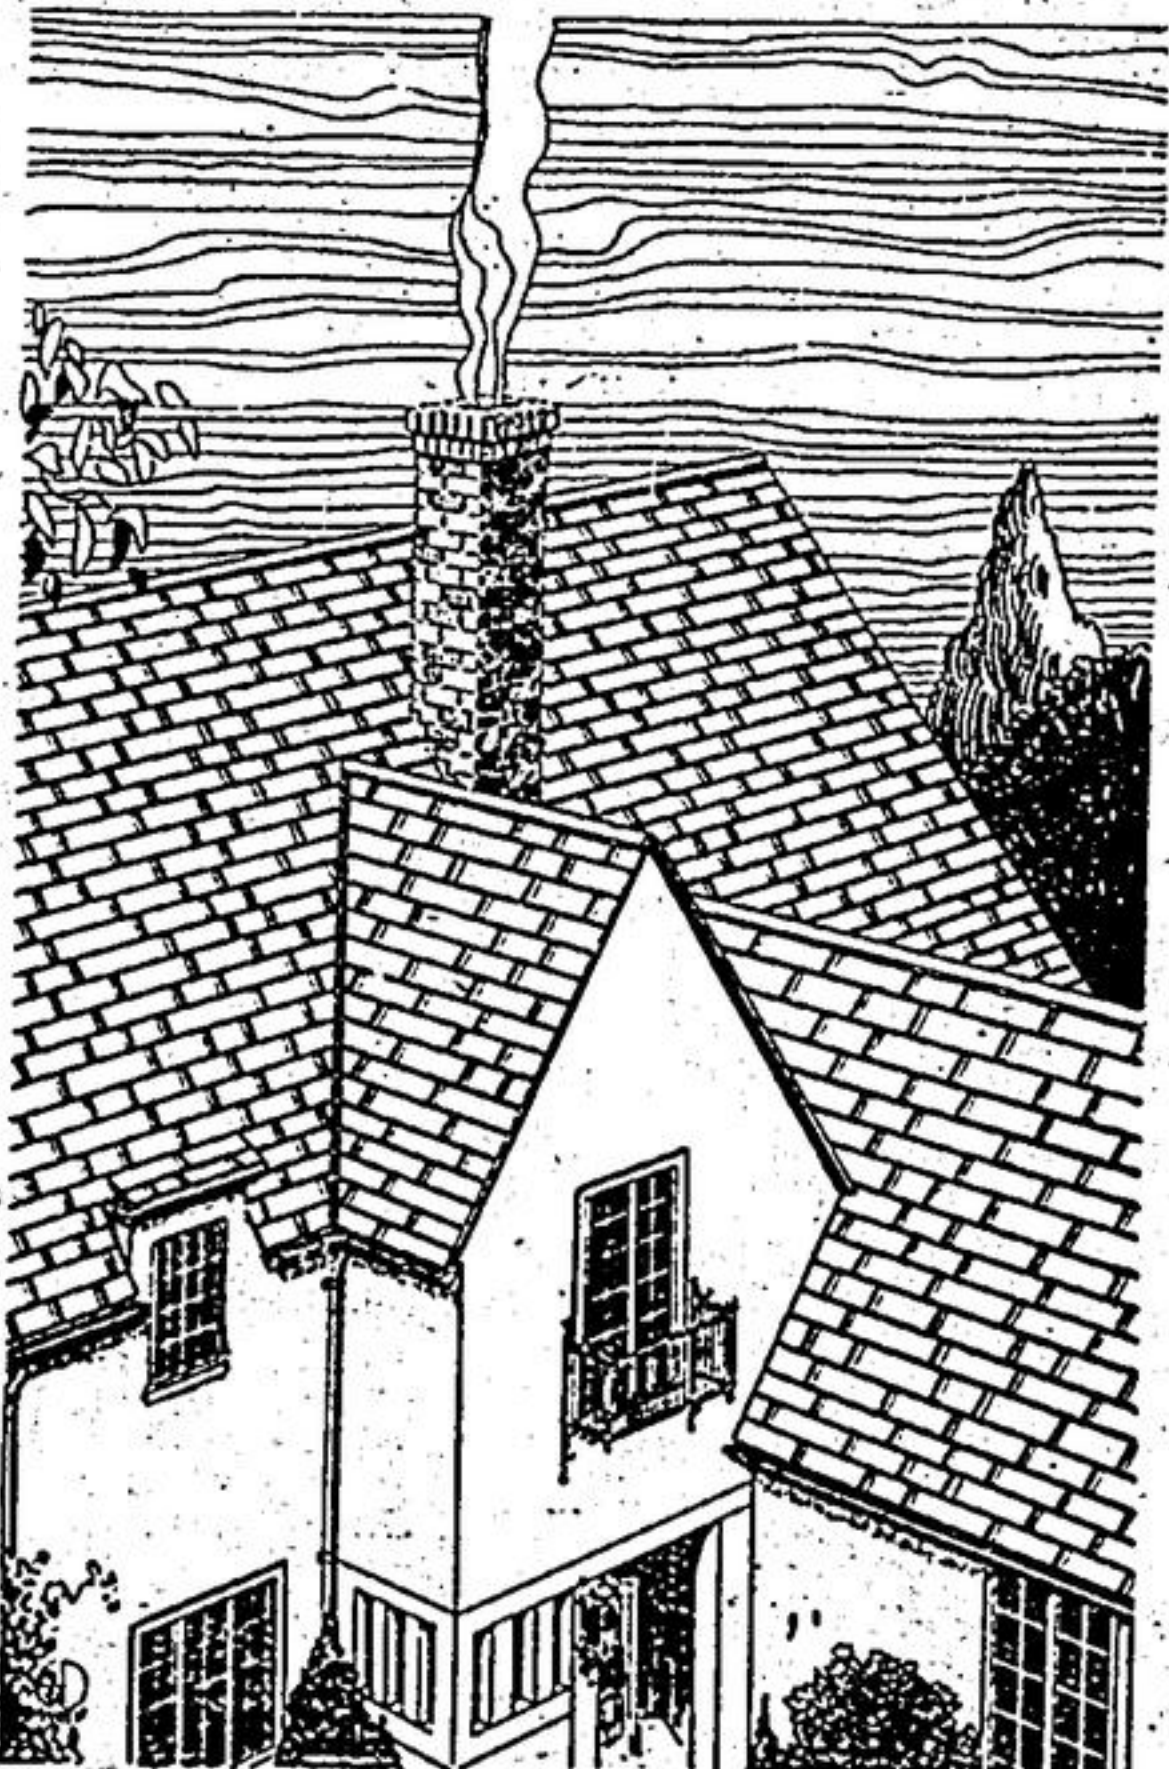

THE finger of progress has again written Brantford Roofing history. New and more beautiful colour harmonies grace the stage. New features of Brantford Asphalt Slates claim the spotlight of attention.

What are these features?

First—an almost unlimited variety of roofing designs in rich, ripe colour combinations that impart beauty and distinction to your home.

Second—Ninety-four to ninety-six per cent. super-saturation of asphalt assures permanent protection against teeming rains, driving sleet or melting snow.

Third—Improved manufacture which lessens the susceptibility to climatic changes.

Fourth—Extra resistance to fire and weather is found in the superior mastic coating with which each slate is treated.

Fifth—Improved laboratory facilities and finer manufacturing equipment have contributed to produce these slates of new excellence.

The basic material—felt—of Brantford Asphalt Slates is made in our new mill, one of the finest equipped mills in Canada, and where we are producing the highest quality product.

If you are building a home, garage, summer cottage, office or any other type of structure ask your Brantford Roofing dealer to go over your requirements and submit estimates of cost. Also write for free booklet, "Beauty with Fire Protection", which gives helpful and interesting advice regarding the proper type, finish, design and colour for your roof.
