GARDEN SUPPLIES

PLANTS—We are again prepared to supply you from our large number of Garden Plants of all varieties, good healthy stock to select from. Percy Brilling, Phone 185, Stouffville. 15

ORIGINALITY KEYNOTE OF LLOYD'S TRIUMPHS

Harold Lloyd insists that his pictures contain two things—an expressive title and a fadeout gag that has originality and cleverness. "Welcome Danger" Harold Lloyd's latest comedy, is a rapid fire story of an amateur sleuth who invites trouble and accepts it in huge laughable quantities. Throughout "Welcome Danger" at the Auditorium Theatre, this week, Lloyd does little else than shake hands with danger. Out of one tough situation, he jumps right into another. That's what makes "Welcome Danger" such a comedy success!

MOUNT ALBERT

Mr. and Mrs. John Crowley spent the week end at Markham. Mr. John Wesley of Toronto is spending a few weeks at Mrs. D. Cook's.

Great preparations are being made for the annual sports day on June the 3rd. Miss Ellis and Alma Hayes took a motor trip to Prescott to visit their brother Evert Hayes.

Mr. Hutchinson of Huntsville, brother of Rev. H. O. Hutchinson gave a talk on the St. Lawrence waterways at the Young People's meeting on Monday evening.

CARD OF THANKS

Mr. and Mrs. George Staley and family wish to take this opportunity to thank their many friends for their kind help and sympathy in their recent sad bereavement.

PASTURE—150 acres of First-class Pasture for cattle, at reasonable price per month. Plenty water and shade. Apply J. H. McGillivray, Con. 2, Uxbridge, Phone 7609

INFORMATION FOR THE BUSY FARMER

(From Dept. of Agriculture)

An Enormous Loss
A prominent authority has estimated that twenty-six million dollars is the price paid by farmers and poultry raisers for loss through diseases in poultry flocks in Canada in the past year. Most of this loss is caused by internal parasites and much of this is preventable. A good deal of it can be avoided by keeping the young chicks away from the adult birds and on absolutely clean soil.

Campaign Against Weeds
The provincial authorities are leaving no stone unturned in their campaign against weeds. Many of the highways have the usual prolific crops along the sides of the road. Some of the farms throughout the country have crops of weeds which will soon be ripening and spreading their seeds to the four winds. Delinquents in this respect will be given an opportunity to explain the reason for their contempt of the law as soon as the weed inspector makes his rounds.

Still Time to Plant
There is still plenty of time to get in corn or roots and both crops are essential for feeding all kinds of live stock, taking the place of green grass in the ration long after the season for grass is over. Corn is planted any time after danger of frost is passed. Mangels should be put in fairly early so that the seed will have the early moisture. Turnips are not planted before the second week in June and many go in until about July 10. If planted too early they are liable to become tough and make less palatable feed than those which make most of their growth in early fall.

Low Producer a Liability
The dairyman, and for that matter the owner of any class of live stock, has enough to contend with without putting up with a bunch of low producers. The burden of the low producer is felt most in time of feed scarcity and low price of dairy products. She is a liability, but yet it is rather difficult for the dairyman to make up his mind to send her to the block and take his loss. This question of keeping records of milk, cost of feed and getting rid of poor cows has been discussed times without number, and yet many low producers continue to occupy a stall and consume as much feed as its stablemate which the records prove has returned a substantial profit over the cost of feed and labor.

Buckwheat Very Useful
In speaking about weed control it is a good plan to put in rape or buckwheat, two crops that can go in right up to the middle of July. The first named makes a splendid sheep pasture while the latter, of course, is unexcelled as a producer of feed grain. Both can also be plowed under for enriching the soil. Buckwheat is one of the most popular crops to sow in the orchard about the first of July, controlling the weeds, and surplus moisture and furnishing splendid feed and a run for poultry and hogs.

Warm Weather Helpful
Continued warm bright weather during the first two weeks of May did much to improve the appearance of Alfalfa, clover and fall wheat, and new seeding recovered to some extent, according to reports coming in from all parts of the province. There were many crops plowed under this spring, but many farmers reported that new seeding which they had intended to plow under, made wonderful recovery during early May. Many sections reported that the land has never worked better than during the present month of seeding.

Fruit Needs Moisture
An adequate supply of moisture in the orchard is of great importance in the growing of a good crop of fruit. If the soil is low in moisture in the early part of the season, the fruit is not likely to set well. If there is a shortage of moisture during the summer and autumn the fruit will not size up well and if the soil is dry when the winter sets in, the danger from root-killing is much greater, hence the importance of conserving moisture when there is any likelihood of there being a shortage. What is known as the sod-mulch system of orchards management is an excellent conserver of moisture. Grass is spread over the soil under the trees, preventing the growth of weeds and grass and saving the moisture.

One Bushel Per Acre
Speaking in Saskatchewan recently, Hon. John Bracken, Premier of Manitoba, declared that an increase of one bushel per acre, which could easily be obtained if only the most casual attention were paid to the seed, would add to the value of Saskatchewan's grain crop, roughly speaking, about thirty million dollars.

BIRTHS
McKuen—In Stouffville, on May 16, 1930, to Mr. and Mrs. Samuel McKuen, Mill street, a daughter.

The choice of Tens of Thousands

Appearance alone has sold Rib-Roll roofing to thousands of farmers... but it is economy, fire protection and permanence that keeps it sold. Wherever you go in Ontario these handsome roofs are familiar landmarks... protecting millions of dollars worth of crops, stock and property. Rib-Roll's success has caused it to be widely imitated—but Rib-Roll alone has the rigidity, ease of erection, durability, low cost and absolute fire protection which make it the foremost roofing value in Canada today.

An Unbeatable Combination
Rib-Roll Roofing and Preston LED-HED nails make a roofing combination impossible to beat. The cost of laying Rib-Roll is lower than nearly all other types of roofing. When you use LED-HED nails you get a rigid, handsome, tight-jointed roof that defies fire and weather. The nails are specially designed with lead heads which completely seal the nail hole. There are no awkward washers... no threading or punching. Write for samples of Rib-Roll and Preston LED-HED nails.

Preston Metal Ceilings
The enduring quality and beauty of Preston metal ceilings have made them one of the most popular types of ceilings for stores, homes and offices. Preston METAL CEILINGS are permanent. They retain their good looks indefinitely.

Economy Metal Lath
At left is shown close-up of the famous Economy Herringbone (double-etch) Metal Lath—a metal lath that can be supplied, erected and plastered as cheaply as No. 1 Wood Lath. It gives 100% perfect key as against 15% key of wood lath... eliminating streaks, cracks, falling plaster, and providing great fire protection.

Preston Steel Truss Barns
the greatest barn value today.

They Thought it Would Never Happen

A FLYING EMBER from a nearby burning house set their roof ablaze. Just a cruel prank of the wind and in a twinkling Fire, the Destroyer, had taken an unshakable grip.

No matter how careful you are to safeguard your home from the inside it will not help you when your inflammable roof is threatened by a nearby fire. Turn that over in your mind NOW, when there is still opportunity to rid yourself of the old-fashioned fire-inviting roof.

Brantford Asphalt Slates give positive protection against sparks and wind-blown embers. They reduce insurance premiums and protect your house and family against the ever-present fire hazard.

Brantford Roofing designs are renowned for their

colour harmonies and handsome appearance. Their beauty adds immeasurably to the value of your home.

Permanent resistance to the weather under the most varying climatic conditions is another famous feature. Brantford Asphalt Slates will not peel, warp, shrink or bulge, and give years of hardy service.

For summer or town homes—for schools, churches and public buildings, Brantford Roofs are equally desirable—not only for security but also for economy and easy application.

Write for a copy of the booklet "Beauty with Fire Protection". It suggests to you what the proper type, design finish and colour of your roof should be.
