MUSIC INSTRUCTOR NOW ON THE JOB

Will Teach the Art in All Our Public School Grades

Last week the teaching of singing as a regular subject in the local public school was commenced. The singing master is Mr. Arthur Lynde of Whitby who was introduced to the School Board and recommended by the School Inspector. Mr. Lynde will spend every Friday afternoon in the school giving one half hour to each of the five classes.

The cost of the newly undertaken work which is being taught in all larger graded schools, will be \$175 from November to mid-summer. This expenditure will be met by the board, but a grant of \$80 will be obtained from the government towards the work, while Mr. Lynde will have his singing pupils put on a concert sometime before the end of the term, the proceeds of which will also go to reimburse the board for their outlay, thus the actual cost to the rate-payers is very low.

The singing instructor comes very highly recommended. He is choir master of Whitby United Church, conductor of the Whitby Oratorio Society, supervisor of singing in the large school at Whitby, and also conducts classes in no less than 40 rooms of other schools, including Agincourt. He has been engaged until next mid-summer, after which if the work is to be continued a local instructor may qualify for the position by attending the summer school.

The school trustees met in the school on Friday evening to transact this and other business. The members present were Dr. Ball, and Messrs. Ambrose Stover, J. W. McMullen and A. V. Nolan, the latter being chairman. A grant of \$25 was made for books to augment the teaching of literature in the public school, while a number of accounts were passed for payment mostly for supplies and equipment from outside firms, also paying for long tables for use at luncheon time. This eliminates eating in the rooms.

Mr. Powell showed the members the newly acquired equipment for the science room of the high school which is rapidly being brought up-to-date with all the latest equipment for teaching that subject. The building is in a highly satisfactory state of repair, and the citizens may be proud of these fine premises.

NEW FACTORY TO OPEN MONDAY

Gold Fish Supply Co. Have Everything in Readiness —A Real Asset to Stouffville

The interior of the old vinegar factory at Stouffville is now transformed into up-to-date factory premises once again. About Monday next the Gold Fish Supply Co. a Toronto concern will commence operations here, by transferring a portion of their Toronto plant, and some of their "key" men probably half a dozen to Stouffville.

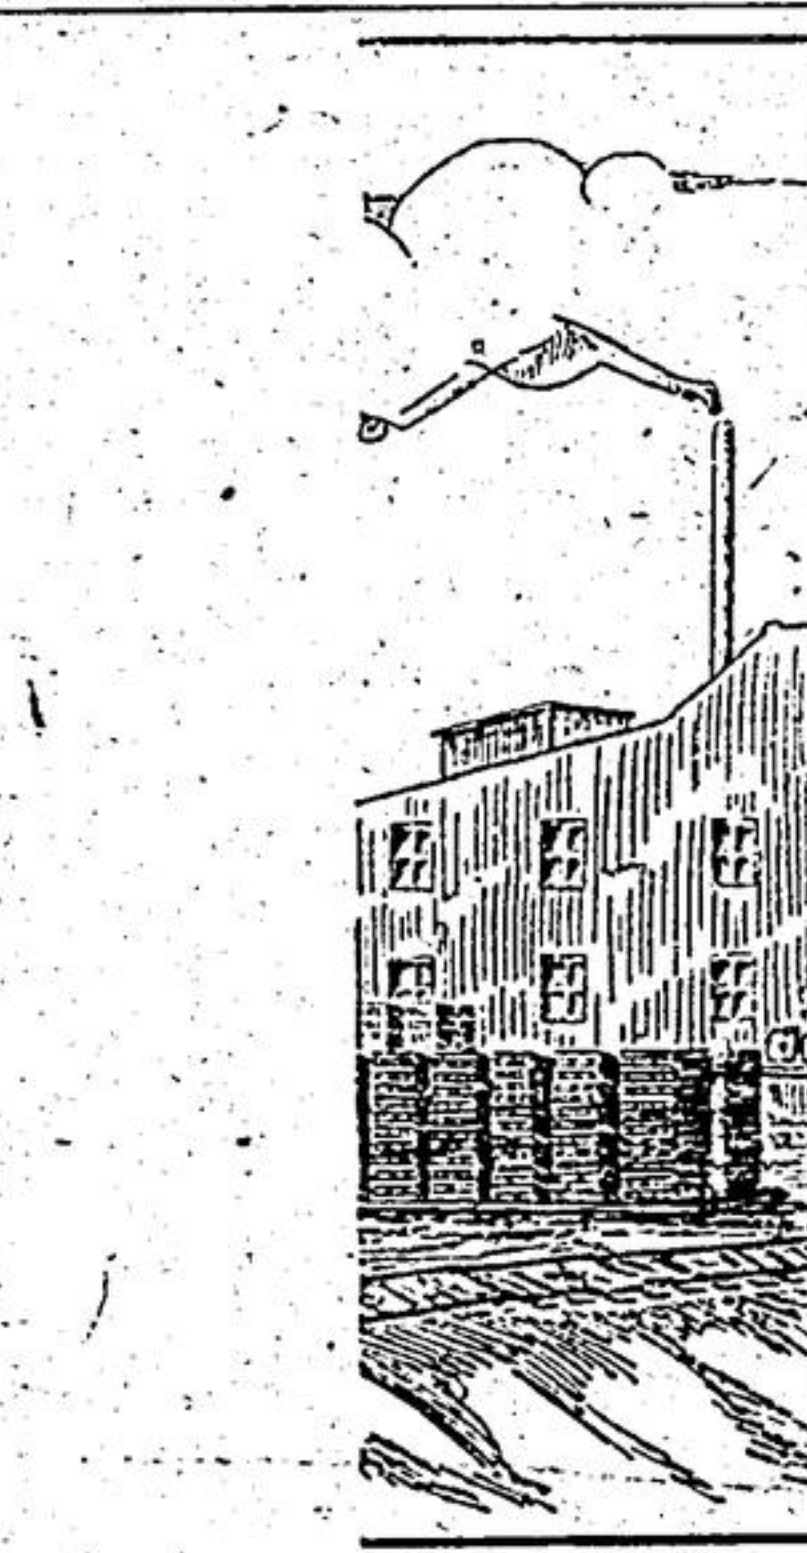

For eight weeks now a gang of carpenters and laborers have been busy repairing and remodelling the premises, erecting office space, and also installing the necessary plumbing including dozens of fish tanks in readiness for the new business. Mr. Astin who has charge of the work, and is the company's representative showed us over the plant on Friday. The basement floor is mostly occupied with tanks for holding gold fish, while the main floor will be used as a packing and shipping room.

Just how far the company will go in developing the industry at Stouffville is not yet decided, excepting that they will have here thousands of gold fish and this will become the main breeding and shipping centre. This is the concern that supplies the small fish for drug stores and other places to sell or give as premiums, but they also breed larger and much more valuable gold fish, some of them selling at \$5 and \$10 each and upwards. On occasion airplanes are used to transport a shipment that is to be rushed, but for the most part express cars are used, while the fish are carried in specially made containers. Many of these fish are pedigreed and Mr. Astin will tell you the parent fish of anything he has in stock, just as a horseman knows the breed of his animal.

A strong branch of the company's business is the manufacture of pottery goods. This is mostly out-of-door work. Clay from the Don Valley is used in the vessels made, while the dry kilns are operated much like the kilns in brick plants. It is not expected that this branch of the business will be moved here until next spring. Ample grounds are provided south of the factory for the development of the pottery industry.

Gold Fish are not the only things the company breed and deal in, but they handle various wild animals and if any local hunters locate cub bears and bring them back alive the Gold Fish Co. are in the market to purchase them. Snakes, lizards, monkeys and other wild life find a medium of sale through this firm, and they are frequently called on to fill orders for points all over Canada and the United States. We expect that when our readers learn of all this in their midst, the local lion tamers and snake charmers will come forward at once and make application for a job. Well, Mr. Astin says they will need some 20 men, a number already having applied and found employment. The new industry promises to be a big asset for Stouffville.

is wrapped in good mottoes and plenty of humor. Bright musical numbers and recitations, preceding the lecture. The Ladies' Aid will serve a supper to which everybody is invited to attend. Mark up the date in your hat and come to Lemonville on December 3rd. Admission 35c and children 25c

Beginning next week the Gold Fish Supply Co. whose headquarters have been in Toronto will commence to operate their newly acquired factory in Stouffville which was once used as a pork packing plant and as a vinegar factory, while at one time it gave employment to a number of men as a cooperage plant and it was while making the picture holding several box cars will be used by the Gold Fish Co. who expect to have added trackage provided shortly to take care of their extensive shipments. The building will house three quarters of a million fish, as well as providing space for other lines of the company's business. About 20 men will be employed when the company gets well underway.

ORIGIN OF SMALEY FIRE A MYSTERY

The disastrous fire on the Richard Smalley farm in which the barn was totally destroyed now looms as a mystery fire also. It was at first reported that the Kitchener Rural Construction Co. had been responsible for the blaze, by setting fire to some straw with a blow torch during the course of their work. Investigation however now shows that there was not a blow torch at work on the job.

Only three men were present when the fire was noticed. Mr. Chas. Nendick of Stouffville who is employed by the company was working in the cellar of the house, while Francis Judd, a former pupil of Stouffville Continuation school was working on the line between the house and barn, and first saw the blaze and gave the alarm, while a third man was engaged in the granary, and wasn't aware of the fire until warned by one of the other workmen.

It was evident that the fire started in the upper regions of the building, but no one can shed any light on the cause. While at work in a barn it is a rule that the men never smoke, so the whole thing adds one more mystery to the long list of barn fires in Ontario this last few months.

Mr. Smalley has since purchased a new steel barn, and has contracted with the Kitchener Rural Construction Co. to equip it for electric service.

HUNTERS HAVE VARYING SUCCESS

One Camp Returns With Full Quota of Deer—Wm Reesor Brings Back A Bear

The local deer hunters all returned home for the most part tired and foot-sore a few days before the season actually came to a close. Stories that deer were roaming like great flocks of sheep doesn't seem to have proven the case, as the local sportsmen found them very scarce, and as their luck was not good when they did sight the fleet footed animals, there will not be enough venison to go round to all their friends in the club.

The Stouffville Hunt Club pitched their camp as usual in the district out from Ardbeg. They were twelve in number but arrived back on Saturday with only three deer. Geo. Storey, Walter Ward and Delbert Holden did the shooting that brought down the only game they got. It was left however to William Reesor to provide a bear story, and he did it nicely when he landed a fat black bear just out of its cub years. Mr. Reesor came upon it suddenly and shot the animal as it ran through the bush. The bear did not appear to see him although there was but a few yards between them.

Another hunting party which ran into hard luck this season was composed of Robert and Don Ratcliff, James Ratcliff, Chas. Atkinson, Clarence Atkinson, and Clarence Bolender, Norman Cloughton, and Arthur Paisley. This double quartette hunted in the wilds of Haliburton county. Setting camp at a place called Crooked Lake they tried the "still hunt" which means they had no dogs. Their efforts were rewarded with but one deer, but the Stouffville merchant says the bush tramp was worth while, and he certainly looks better for the holiday.

It remained for the Stouffville and Sutton Hunting Society to demonstrate that deer are really plentiful if you go the right place for them. This joint organization is composed of twelve hunters, and they brought home twelve deer, the full allotment. In addition they had their portion for use in camp which accounted for two more. It is an interesting fact that this club has never gone north and returned without their full quota. This year they were the first to return home as they had their full allotment after seven days hunting. Their jumping off place is a railway siding called Zebra 20 miles north of Parry Sound. A five mile journey is made by wagon, then a five mile or more trudge to camp. But its worth while getting back into the great forest land where few hunters go, as is evidenced by the success of this camp. Those who compose the party are Sam Armstrong, Harvey Baker, Frank Baker, Ralph Flint and Sandy Stewart, the remainder being Sutton men.

Since the above was written 15 hunters of the Cedar Grove Club have returned with 15 deer and one bear. Clay Tarr, one of this party shot a red deer said to be the only one got this season.
