

Spectacle Frames

OUR SPECIAL FOR MARCH AND LAST WEEK OF FEBRUARY

White Gold Filled Spectacle Frames of The Very Latest Designs at Less Than Half Price

I have just purchased a bankrupt stock from London, Ontario, consisting of White Gold Filled spectacle frames of the latest designs which I am going to sell at less than half price while they last. Frames that retail for \$10.00 and \$12.00 will be sold for

\$4.75 and \$5.75

I have also obtained large quantities of other spectacle material consisting of All Shell frames, combination Schell and Metal frames and yellow gold filled frames and am now able to supply first quality spectacles from \$2.50 up, including a scientific examination of your eyes. My repairs are also the lowest in price.

When you come to me for eye service you get, first quality material at the lowest possible prices and have the services of the only Barns Gold Medalist and Hermant First Prize winner in the Province of Ontario at the present time.

Markham Mondays Uxbridge Wednesdays

The Farmers Information

(From Dept of Agriculture)

Produce Men Approve Broadcasting
A report of the annual meeting of the Eastern Canada Fruit and Vegetable Jobbers' Association held recently at St. John, N.B., includes the following:

"The effect of the radio advertising conducted by the Ontario Department of Agriculture is reported by the trade to have had very satisfactory results in moving fruit and vegetables this past fall, particularly during periods of heavy receipts, and an extension of this program is being urged. Press advertising and the publication of timely and attractive bulletins and pamphlets by the Dominion and Provincial Departments of Agriculture dealing with the use of fruits and vegetables is also urged.

Successful Dairying
"Factors essential to success in dairying" was the subject discussed by M.C. McPhail, of this Department before a recent convention of cheesemakers. His analysis of the situation resolved itself into four divisions, as follows: (1) Diversification of farm enterprises: too many dairy farmers are so intensely interested in their cows that they forget to look around for money making sidelines that can be operated without any great additional outlay. (2) High yielding crops are important. All feeds must be grown on somebody's farm and on most farms they can be produced more cheaply than they can be purchased. (3) Efficiency of live stock. The efficiency of the individual animals to utilize feed is a big factor in determining profit. (4) Operating costs. Keeping expenses at the lowest point consistent with efficiency.

Agriculture Prominent
Plans for improving agriculture throughout the Province occupied a prominent place in the speech from the Throne at the Ontario Legislature opening last week. Legislation was forecast to implement many of the recommendations, including creation of a Provincial Marketing Board, which appear in the Somerset inquiry report. Notice of plans for the improvement of herds in regard to milk production was given. There was the suggestion of early introduction of remedies to protect livestock against the ravages of parasites, and finally the intimation that Hon. T.L. Kennedy, Minister of Agriculture, will sponsor this coming summer an exhaustive inspection of Ontario's agricultural pursuits by all the institutional heads within his jurisdiction. Special attention will be paid to farming possibilities in Northern Ontario and a scheme devised to utilize the many homesteads which have stood idle for several years in good farm country of the North.

Clean Seed Pays
In stressing the importance of using good seed, Prof. W. J. Squirell of O.A.C. in a recent address quoted results obtained from extensive experiments which showed invariably an amazing increase in yield per acre from clean, plump, tested seed of a good variety over the other kind. In making purchases, the buyer is strongly advised to demand tested seed. Much of the gamble can be eliminated from farming where the field is thoroughly cleaned of weeds and put into a fine state for sowing by cultivation and good seed used.

Cod Liver Oil For Poultry
When hens are shut in during the long winter months an abundant supply of vitamin D is required to keep them producing and healthy. It is the presence of this vitamin which assists assimilation of the minerals calcium and phosphorus in the production of eggs and eggshells. As the value of cod liver oil for poultry feeding depends entirely on its vitamin content, only reliably tested brands should be used. Crude cod liver oil is suitable for poultry and is not expensive. In the dry mash, one pint to each 100 pounds of mash is a good ration, while with a wet mash or other feed, one or two teaspoonfuls to each 12 birds has been found adequate.

Values in Home-Grown Vegetables
While Ontario vegetable growers report large quantities of carrots and cabbage still in storage, importations of these vegetables from the south continue to arrive in considerable volume at the larger markets of the province, where they are reported as meeting with a good demand in spite of their comparatively high price. Mr. George Rush, Fieldman for the Ontario Vegetable Growers' Association, stated in a recent meeting that a survey of retail stores showed that many storekeepers gave preference in display to the imported vegetables, and offered as an explanation for this that there was greater profit in handling imported carrots and cabbage. The Markets Branch of the Ontario Department of Agriculture has pointed out that the added revenue from the handling of these imported goods comes from the consumer's readiness to pay a

considerable premium for imagined values. Recent investigations show that the Ontario carrots and cabbage that have been stored under proper conditions have, pound for pound, food values equal to those supplied by the imported vegetables. Ontario shoppers are being warned by the Department of Agriculture that in purchasing imported carrots and cabbage they are paying three times the amount of money needed to obtain equal vegetable food values.

Will Take Evidence
With all possible speed the Ontario Government is moving to relieve distress among farmers of this province. The Agriculture Committee has already begun its deliberations and will likely function as an evidence-taking inquiry body. Premier Henry has intimated that farmers of districts particularly hard hit by the depression period might be asked to appear before the committee to state their cases. All parties in the House have agreed that relief of agriculture is of paramount importance and no small part of the present session will be devoted to consideration of measures aimed in that direction.

Corn and Seed Show
After having been in abeyance for years, the annual seed show of the Southwestern Ontario Corn Growers' Association was revived, last week with a splendid exhibition in the city of Chatham. The quality of the corn exhibits was exceptionally fine, even if not quite on a par with that of displays before the corn borer did its work. Other classes, including cereal grains, small seeds, tobacco and potatoes was keen. The 1930 corn crop in Southwestern Ontario was the largest and best since the borer's invasion and affords concrete evidence that the havoc wrought by the borer has been materially reduced in the last two or three years.

Recommendations Made For Fruit and Vegetable Industry
Establishment of fruit and vegetable growers' market council for the province and drastic changes in general marketing conditions are recommended in the report of Commissioner W. B. Somerset to Hon. T. L. Kennedy, Minister of Agriculture, following extensive inquiry into marketing problems of the fruit and vegetable industries. It is suggested that this market council should have a permanent paid secretary, with a local secretary for each district and an executive committee, with power to appoint committees to study and deal with problems. Registration of all commercial fruit and vegetable growers is suggested so that they must place their registered number on all packages they market. Licensing and bonding of all shippers, truckers and commission men is recommended, as well as establishment of sales promotion offices in Western Canada and in Quebec and the Maritimes during the selling season. Other recommendations are as follows: That surveys be made each season of crop conditions and the sales possibilities of the markets; that Government assistance be given in establishing central packing plants and cold storage or pre-cooling facilities; that by-product research be made into the commercial possibilities of the disposal of low grade fruits and vegetables; that steps be taken to prevent the marketing of immature fruit and vegetables; that the collective purchase of fertilizers and other supplies be fully canvassed; and that as a means of improving the quality of grade and pack for all markets the question of establishing an Ontario brand be considered.

In addressing the London city-council dinner of the Chamber of Commerce, Hon. Thomas L. Kennedy stressed three main needs for agriculture in Ontario today:
1st.—The need of growing quality products; second-rate products have little market in these days of keen competition.
2nd.—Better grading of products so that Canadian products will be known always as A1
3rd.—Adoption of modern marketing methods to meet a changing world. The Minister quoted facts, figures and statistics to show the need of progress along all three lines. The Department has done much in this direction and under the present regime it is prepared to do more.

GOODWOOD
Howard Harper is recovering nicely from his recent operation.
Mr. and Mrs. Freeman Slack and grand-daughter Lily were guests at Victoria Corners over the weekend with their son Edgar.
This Friday evening the members of the L.O.L. will meet in the hall as usual, when a busy evening's work will be put on.
Well done hockey players! Surely you put Goodwood on the map, although you went down to defeat when up against Almira. Next year our team will be ready for the watches and Stouffville arena will not hold us. They say the only man left in Goodwood the night of the match in Stouffville was Isaac Wagg and Henekiah Roach. Anyway, we didn't see that many, so the boys got good support from the fans.

BLOOMINGTON
Mr. N. Smith is under the care of the doctor.
Mr. Bush of Aurora visited at Wm. Hill's on Sunday.
Miss Elsie Hill was visiting in Peterborough last week.
Football Players, Wanted—Those wishing to play send your names early to G. H. Saunders, Stouffville.
Mr. and Mrs. Heels of Waubesa and Mr. Ed. Swales of Midland, also Mr. and Miss Paisley of Orillia attended the funeral of the late Philip Lemon on Thursday last week.
There was a gloom cast over the community on Tuesday last at the passing of Mr. Philip Lemon, one of our life-long and highly esteemed residents. Much sympathy is extended to Mrs. Lemon and sons in their sad bereavement.

New Prices Appreciated

The hearty response to the new low prices for meats sold at our store is being appreciated by the public. Watch our display window for specials, but keep in mind that the following are a sample of regular prices now established by us.

Here and There

(704)
K. G. MacKay, senior, dairy produce grader for Western Canada, states that Manitoba's creamery butter production in 1930 showed an increase of 84.6 per cent over 1921.

About 10,000,000 pounds of fish are caught annually in the large and small lakes of the province of Saskatchewan and approximately 1,400 men are employed in the industry.

Aggregate value of field crops grown in Canada in 1930 is officially estimated at \$631,592,000 and total area sown to crops was 62,214,670 acres, an increase over 1929 of about 1,000,000 acres.

In a final estimate of the wheat production of Canada in 1930, the Canadian Government Bureau of Statistics places the total yield at 397,872,000 bushels, an increase of over 2,000,000 bushels compared with the previous estimate.

From end of September 1930 to January 15, 1931, over 26,000,000 pounds of sugar was produced at the beet sugar factory at Raymond, Alberta. The industry has grown to substantial proportions in that province of late years.

From Winnipeg a radio fan writes:—"Melody Mike" is talked around the offices and warehouses in Winnipeg as though he were a real Canadian Pacific official. The reference is to the Canadian Pacific radio offering on Monday nights across the Dominion.

Vancouver will have a team of fine golfing calibre on the fairways of the Oak Bay course where the third annual mid-winter Empress golf tournament for the E. W. Beatty trophy will be staged February 23-28. Entries are in from Victoria, Seattle, Portland, Tacoma and cities of the prairie provinces.

Grain marketed along the western lines of the Canadian Pacific Railway from August 1 to January 31 amounted to 165,793,000 bushels of which 140,928,000 bushels were wheat. The total marketings of grain along Canadian Pacific lines represent 84 per cent of the total grain marketed in western Canada to that date.

Canada now has more than forty bird sanctuaries specially reserved for bird protection purposes. These are scattered across the country from Nova Scotia to British Columbia. Some of the provincial governments also maintain similar reserved areas for the benefit of native bird life. A census of ten such sanctuaries, not including young birds hatched in 1930, was 100,836 of 16 different species.

Over 97 per cent of the assets of the Canadian Pacific Railway are in Canada, and in drawing attention to this fact some months ago, Mr. E. W. Beatty, Chairman and President of the Company, went on to say that he would be glad to see an increase in the Company's shareholders in this country. Since that time the increase has been most marked, as is shown by the following statement of Canadian Pacific common shares held in Canada now and at the end of the two previous years:

Dec. 31, 1928.....	69,719
Dec. 31, 1929.....	77,348
Dec. 31, 1930.....	91,339
Increase in two years....	21,620

Water rates in Oshawa will be reduced ten per cent. We understand the idea is to popularize the Saturday night bath.

Premier Bennett has announced that Parliament will meet on Thursday, March 12. The coming session is expected to be an extensive one and much legislation will engage the members during the coming months.

BINDER—M.I.L. 6 ft cut, new, also Pea Straw Stack, and a quantity of cedar posts. Lot 7, con. 3, Whitechurch, Geo. Noble.

CEDAR POSTS—A large quantity posts, anchors and braces, on lot 33, third line, Uxbridge. Phone J.W. Widdfield, 9817 Uxbridge.

FOR SALE—6 rowed White-Barless Seed Barley, grown from Wisconsin Pedigreed No. 37, certificate No. 40-7578, grade 2. In Wisconsin this variety has outyielded the rough strains around 10 bus. per acre for a 6 year period. The smoothness of the beards make it more pleasant to handle and the straw more valuable for feeding. Yielded over 60 bus. per acre this year and tests 52 lbs. per bus. Price \$2 bus, bags included. Send for sample.
