Farmers' Information

Plans are going ahead for the tenth annual Royal Winter Fair, termed the Commemorative Show, Nov. 18th to 26th, when the choicest of Canadian field products and livestock will be on display.

The International Flowering Match is being held near Peterboro this week, Oct. 13th to 16th. A good piece of land was selected a few miles south of the city on the highway running towards Port Hope. As the location was central for several counties, the usual local events were thrown open to residents of Peterboro, Durham, Victoria and Northumberland. The last three days of the competition are open to the world. This event never fails to draw a great throng of farmers and the present year is no exception.

Injurious to Wire Fence. Many times the advice is given in the fall of the year to "burn out the fence rows" to get rid of harmful weeds and insects. This, no doubt, is a good policy from those standpoints; but it should be kept in mind that it is distinctly harmful to any type of wire fence. Zinc melts at a comparatively low temperature and the heat from burning grass or weeds is often sufficient to scorch the protective coating and will probably shorten by several seasons the useful life of the fence.

The Hog Market. A review of the hog market situation states that there is no justification for the practice which has been all too general this season of trying to beat the market by selling off light-weight unfinished hogs to gain a few cents per pound at current prices. The principal effect of such practices has been to demoralize the market and force prices much below what they otherwise might be. With Canadian hog prices drastically realigned both to suit domestic conditions and export market prices the common sense practice at present is to finish hogs up to the proper weight, around 200 pounds. This is one effective way in which to develop a steady hog market, to regularize marketings and at the same time to improve quality.

Weekly Crop Report. Crop conditions throughout Ontario continue very satisfactory as far as yield is concerned. Excellent crops of potatoes, roots and corn, both for ensilage and grain, are being harvested. Sugar beets have been moving to market in good condition and tobacco growers were favoured with excellent weather for harvesting their crops. Now fall wheat is showing a greater amount of growth of top than usual and will

go into the winter in good condition. There is a fairly large yield of small seeds such as Red Clover. In most counties fall plowing and after-harvest cultivation is well advanced. Prices for such crops as potatoes, turnips, grains and the majority of farm products, as reported by representative, are very discouraging.

RINGWOOD

Miss Addie Pipher of Toronto was home over the weekend. Work is progressing rapidly on the new cement bridge in our burg. Mrs. Frank Bruels is visiting her parents Mr. and Mrs. Wm. Hare, Temperanceville.

Harry Baker of Toronto is spending a few days with his father, A.M. Baker. Mrs. J. M. Grove spent a few days last week with Mrs. James Harper at Newmarket.

We are sorry to report that our teacher's son was rushed to a Toronto hospital, Tuesday owing to the auto accident. The particulars of the accident will be found elsewhere in this issue.

ALTONA

Miss Lizzie Davis was home for Sunday. Miss Evelyn Reesor was home over the weekend.

Ernie Davis was home for the weekend. Mr. W. J. Madill is back at his sons Mr. O. Madill.

Miss Blanche Reesor spent the weekend with her parents. Some of the boys around Altona spent the holiday afternoon hunting Mr. and Mrs. Price Pugh spent the weekend with her parents here.

Miss Dorothy Pointon spent a few days with Miss Kathleen Steckley of Bethesda.

Miss E. Bunker which is engaged in work at Toronto was home over the holiday.

Be sure and get in before twelve o'clock some of you Altona young people.

Mr. and Mrs. A. Clarkson and family visited with Mr. and Mrs. W. Clarkson Thanksgiving.

Bruce Baine of Newmarket spent the holiday with Mr. and Mrs. F. Wagg and family.

Mr. and Mrs. Lorne Wagg and son visited with Mr. and Mrs. F. Wagg and family on Sunday.

The inmates of the Blind Institute in Belleville stated that Altona had some good looking school teachers.

We are sorry to report the very sudden death of Norman Bunker's mother. Our deepest sympathy is extended to the immediate family.

Mr. and Mrs. Wm. Burnham and grandson, Mr. and Mrs. Harshell and granddaughter visited with Mr. and Mrs. N. Bunker and family and made other calls around Altona on Sunday

Mulock's Orchard will Yield over 13,000 bbls.

On Thanksgiving Day the writer had the privilege of visiting the apple orchard on the Mulock estate just north of Aurora, and if the Garden of Eden presented any finer sight we can't understand why anyone should go astray in such surroundings. This Mulock orchard surpasses anything we have seen in the beloved Land of Evangeline. It is estimated by W. P. Mulock who is the directing head of the apple business that upwards of 13,000 barrels of luscious fruit will be harvested this fall, 70% of which will be Spy apples.

On arrival at the farm we first visited the packing plant consisting of a large shed where the apples are brought in barrels from the orchard and dumped into a polishing machine, then the fruit is passed over a series of rollers with felt or other covering which leaves the apples highly polished without the human hand touching them. Then the apples pass along to the grader where several dozen men are engaged watching for the slightest blemish. If he finds such fruit it is cast aside, and the perfect article permitted to move over the purveyor until it comes to the grade to which it belongs, when they automatically drop down gently into the barrels that await them. Mr. Mulock also showed us the new huge packing room cooled to a desirable temperature all the time. This building is mostly cement, and will take care of the fruit all winter if required.

One can only stand in perfect amazement before the heavily laden trees carrying from four to six and more barrels of spies of tremendous size, all of which are mostly high grade fruit. Here some fifty pickers were engaged and Mr. Mulock said many more would be required as the apples were not coming in fast enough to keep the packers at full capacity.

An export business was done with the early apples, but just now the home market is consuming the output of the orchard.

The quality of the fruit in this orchard, we are safe in saying could not be surpassed anywhere in Canada, and the crop is so bountiful that one could not see where another apple could be fastened to the branches, not only size and good color featured the spies, but experts declare that the flavor of this sprayed fruit is much above the average.

This new industry now sprung up in North York will be of great benefit to the unemployed in Newmarket and Aurora district during this fall season. The rate of pay is more than reasonable for this season, while the nature of the work is congenial, and almost any part of it could be accomplished by women and girls if necessity arose to engage them.

Wholesome BREAD

No matter how good the bread from your own oven may be, is there enough difference in pure wholesomeness to warrant heating up the home

Our bread is good bread. It is freshly baked every day. Large loaf 16c small loaf 8c

A. STOVER

Here and There

Total number of poultry on farms at end of 1930 in the Dominion was estimated at 60,755,000, of which 55,247,000 were hens and chickens. Value of this poultry was placed at \$54,852,000.

Radio is to be used to aid in forest fire protection in Northern Saskatchewan. The provincial forestry department has decided to establish a system of look-out towers equipped with short wave radio sending and receiving sets.

A catch of 244 salmon by three anglers in nine days has been reported recently from the Cain's River, New Brunswick; by G. W. Scott, of Keene, New Hampshire, who was one of the party, and himself netted 111 of the fish.

More United States branch factories are established in Canada than in any other country outside of the United States itself. At the beginning of last year over 500 such factories were in the Dominion, representing investments of \$540,590,000.

Shipping of all kinds entering and leaving Canadian ports has increased 60 per cent. in the last ten years. Total net tonnage, exclusive of coasting, for year to March 31, 1930, was \$9,438,789 tons. To this must be added net tonnage of 87,734,773 tons for vessels entered and cleared coastwise.

A gold-headed canoe was presented by the Montreal Harbor Commission to Captain A. Freer, master of Canadian Pacific Steamship Duchess of Richmond, on the occasion of the first arrival of the season at Montreal of a trans-Atlantic liner. The Duchess of Richmond reached port April 19.

Increased tourist traffic to Canada from the United States is foreshadowed by reports from Canadian Pacific passenger agents in the U. S., which show a much larger number of enquiries from would-be travellers than in former years. C. B. Foster, passenger traffic manager of the railway, stated recently in an interview at Saint John.

Canada said au revoir but not good-bye to Their Majesties the King and Queen of Siam at the border station of Portia, Saskatchewan, whither they had travelled by Canadian Pacific on their journey to New York. They were passengers on the Empress of Japan on that ship's record-breaking passage from Yokohama to Vancouver.

"It's not so much the captain as the chief engineer who makes speed records possible at sea," Captain Samuel Robinson, of the Canadian Pacific liner Empress of Japan, told the Vancouver Board of Trade recently, at a luncheon in his honor after his ship had clipped another speed record across the Pacific. She had averaged 22.7 knots over the 4300-mile course from Yokohama to Victoria, a speed hitherto unheard of.

Largest and most powerful locomotive of its kind in the world and unique on this continent, Canadian Pacific Railway "4900" type engine, product of Canadian brains and skill and composed largely of Canadian materials, has just been turned out by the Angus Shops of the company at Montreal, for use in the railway's Rocky Mountain territory. Engine and tender weigh together 392½ tons and it has a tractive effort of 90,000 lbs., sufficient to pull a mile-long freight train of 150 forty-ton trucks, weighing 6,000 tons, on a level track.
