

## Hunter, Wounded, Is Carried Eight Miles Through Dense Woods

Sudbury.—Seventeen hours after his leg was badly mangled by the accidental discharge of a rifle, Mike Sachasky, Creighton Mines, had the leg amputated in the local hospital and stands a fair chance of recovery.

The accident occurred far back in the bush, and companions of the wounded man were compelled to carry him by boat, truck and hand to the hospital. For eight miles of the distance they carried him through dense brush.

Saturday, Sachasky and six companions went to Trout Lake. They in-

tended to spend the week-end in a cabin there. One of the group, John Vranic, picked up a rifle. He tested the mechanism and the gun discharged, a mushroom bullet striking Sachasky in the leg.

One of the men walked to Blezard Valley, a three-hour hike, and notified the police. Constable Ernest Keen of the local provincial police staff, responded, taking a doctor with him. The wounded man was rowed across the lake, carried eight miles to the highway, and then brought the balance of the distance by truck.

## Rescues Recalled In 1931 Award List

All Parts of Canada Represented—One Posthumous Grant

Hamilton.—At a recent meeting of the board of investigating governors of the Royal Canadian Humane Association, the following awards were granted:

**Bronze Medals**  
William Dawson, 139 Frederick Ave., Hamilton, for his heroic action in the rescue of Mary McKenzie and Robert Bailey, from drowning at Port Maitland on August 3, 1931.

Albert Hill (deceased), 61 Wellington Street North, Hamilton, for his heroic action in the attempt to rescue Miss Dorothy Vanduzen from drowning at Lake Erie, Port Dover, June 20, 1931. Bronze medal posthumously awarded.

## 24 Italian Planes To Visit New York

Rome.—Italy plans to send a formation flight of twenty-four seaplanes commanded by Air Minister General Italo Balbo to New York next month. It was learned recently. The tentative date has been set for November 15. The planes will leave from Lake Arigo, the starting point of last year's iron flight to Brazil, and will fly via London and the Azores.

It was understood that General Balbo hoped to fly back across the Atlantic, but his plans for returning to Italy were not definite.

The seaplanes designated for the flight are of the S-55 type, which were used for the south Atlantic crossing to Brazil. Each machine will carry two pilots, a mechanic and a radio operator.

## 8,000,000 Trees to be Planted in Three States

Milwaukee, Wis.—Eight million trees will be planted on 12,000 acres of federal forest lands in Wisconsin, Michigan and Minnesota before the ground freezes this fall, H. Basil Walls, assistant regional forester, has announced here.

Wisconsin's share is 770,000 trees on 1,100 acres in the northern section of the state.

Since July tractors have travelled 12,000 miles plowing furrows in which the small two-year-old trees will be planted. These furrows are eight feet apart and the trees will be planted at intervals of eight feet in the furrows.

The infant trees were procured at nurseries in East Tawas, Mich., and Cass Lake, Minn.

It is easy to find fault, but it's hard to tell what to do with it.

## Firebug Quiet Over Week-End

No more Blazes Set—Farmers Still on Qui Vive

Hamilton.—The week-end having passed without further alarm, the farmers of Wentworth county were breathing easier Sunday night and believed that the firebug who fired 13 barns had departed for parts unknown.

County and provincial police officers had no new developments to report. The flood of calls regarding "suspicious characters" ended Friday. But there are many owners who are still standing on guard.

After investigating the series of blazes started two weeks ago, Provincial Inspector John Miller, sent here from Toronto for special work, expressed the opinion on Saturday that there had been undue alarm, and that the farmers had been too panicky.

Many of the fires were just accidents, he thought. A warning that farmers must not fire upon persons just because they regard them as suspects was the final word of the inspector.

A. W. Hillburn of Galt, secretary of the North Dumfries and South Waterloo Mutual Insurance Company, agreed that some of the fires could not be listed as being of incendiary origin.

After a conference at the Court House, Alfred Cuddy, deputy commissioner of provincial police, returned to Toronto.

## Five-dimension Universe Einstein's Newest Idea

New York.—A universe with five dimensions instead of four, is the latest conception of Dr. Albert Einstein, as announced in a statement written by him and made public by the Josiah Macy, Jr., foundation.

The German scientist's relativity theory will not be affected by this change in view, which was made necessary by recent astronomical discoveries disagreeing with Einstein's earlier idea of the universe.

## Early Financial Recovery Predicted for Great Britain

New York.—A note of confidence in the early economic and financial recovery of Great Britain was sounded by Sir Alexander Lawrence, former chief assistant solicitor of the British Treasury, in a recent address before the Canadian Club in New York.

"We shall know very shortly the result of the general election in Great Britain, and I feel certain that result will show an expression of confidence in the National Government," Sir Alexander declared.

"Today there is as great musical talent in England and America as in any other country in the world."—Edward A. Filene.

## Japanese Destroy Chinese Barracks

In addition to floods devastating large areas China also has scenes like this to face. Artillery wrought havoc with these barracks at Nanjing, Manchuria.

## WITH THE LONE SCOUTS

It is surely not too early to begin to think about that popular season to which we all look forward—Christmas. And to think about it from a correct Scouting standpoint.

For the past two years, in fact ever since Lone Scouting has been an organized branch of the Association in this province, the Lonies have "Done Their Bit" towards lightening the task of Santa Claus as Christmas time.

It is not necessary to remind you that in this year of financial and business depression, of unemployment and hardship, there will be many to whom Christmas will bring only memories of better times, and the greatest opportunity yet offered for Scout Service will be brought within your reach.

Think of the many children whose lives can be made happy because Santa Claus, through his Lone Scout Assistant, did not forget them! There are over 300 Lonies in Ontario, and if each one will look after just one unfortunate kiddie, what a splendid record that will make!

Lone Patrols can organize "Scout Toy Shops," and even isolated Lonies can do their share. Now is the time to hunt up those broken and discarded toys, dolls, books, etc., and get busy cleaning and repairing them. Remember two broken dolls often make one good one! How happy will be the little boy who can pull that old broken clockwork engine around on a string, after you have taken out the works, repaired the wheels and given it a coat of paint!

Make up your mind, RIGHT NOW, that YOU are going to do your Christmas Good Turn this year, and then get busy! Do little odd jobs to earn the money necessary to pay the postage on your Good Turn Parcel—Lone Scout Headquarters will send you the names, addresses and ages of children who will not have any good cheer this year if Lone Scout Santa Claus does not take care of them!

If you go about it in the right way, you will find people only too pleased to donate to you odd pieces of lumber and cans of paint to repair the toys with.

The Lone Scout Department is most anxious that this year all records are beaten in this great Christmas Good Turn scheme, and what better way can you have of living up to your third Scout Law, which says: "A Scout's duty is to be useful and to help others."

Write to your Scoutmaster immediately, and tell him that you wish to help. Have your name enrolled, and say how many children you are prepared to take care of. Then get busy and make up attractive parcels. Headquarters will send you the names and addresses of boys and girls to whom they can be sent.

Thus your Xmas will be happy because you have brought joy to someone as fortunate than yourself.

Lone Scout Question Box  
Are there Lone Scouts in any other provinces? (L. G. Linden). Yes, Manitoba has a Lone Scout Troop about 200 strong, and there is also a Troop in Prince Edward Island. The other provinces have Lone Scouts, but they are not organized into Troops, working individually under the respective Provincial Headquarters offices.

What is the "Silver Wolf"? (Lonie, Simcoe). This is the highest award in Scouting. It is the Chief Scout's personal recognition of exceptional services, and the number awarded is very small indeed. It is a Silver Wolf, suspended around the neck by a green and yellow ribbon.

Lone Scouts are invited to send questions to "Lone Scouts" c/o Lone Scout Department, 330 Bay Street, Toronto 2, who will endeavour to answer them through these columns.

If you are interested in the Boy Scouts, and unable to join a regular Troop, write to the Lone Scout Department for particulars of how you may become a Lone Scout. Boys between the ages of 12 and 18 are eligible.—"Loie E."

Calgary Votes \$277,000 For Bridges-Highways  
Calgary, Alta.—By-laws for the expenditure of \$277,000 on construction of a bridge and building of arterial highways, voted on by ratepayers of Calgary, were endorsed by large majority.

The bridge by-law, calling for an expenditure of \$45,000, was given 2,853 votes in favor and 615 against. Ratepayers favoring the highways by-law totalled 2,896, with 407 voting against. Appointment of a city manager was favored by only 948 with 2,814 against.

Peru Forbids Wage Cuts Also Discharges Forbidden  
Washington.—In Peru it's against the law to discharge a worker or cut his wages.

Mr. Julian D. Smith, acting commercial attaché at Lima, reported to the Commerce Department the Peruvian Government had issued a decree prohibiting all agricultural, industrial and commercial enterprises from reducing wages or discharging manual laborers.

Chilean Government to Cut Budget \$35,000,000  
Santiago, Chile.—The Chilean Government expects to cut 300,000,000 pesos, approximately \$35,000,000, from its budget for 1932 as compared with 1931, reducing the public expenditures from 1,000,000,000 to 700,000,000.

The Ministry of the Interior announced that economies have been effected in that department which will reduce expenses from 150,000,000 pesos to 130,000,000. The Foreign Office announced an estimate reduced from 14,500,000 pesos to 6,000,000. Other drastic reductions are expected to be announced soon.

German Farmers Invite Public to Pick Apples  
Weimer, Germany, Oct. 16.—The tragic comedy of the economic depression is exemplified by thousands of these signs attached to apple and pear trees in Thuringia, particularly in the township of Sonneberg:

"Help yourself to fruit, but take care not to damage the trees."

There is such a bumper crop of apples the limbs must be shored up to protect them from breaking, but prices are so low and the people's buying power so reduced that it does not pay to pick the fruit.

Germany to Stop Ships Sailing to Russia  
Hamburg, Germany.—A decision to cease dispatching ships to Russia was adopted by German shipowners recently on the grounds that recent strikes aboard German vessels in Soviet ports had been abetted by Russian authorities.

Advances received here indicated that 41 German freighters tied up at Leningrad, Odessa and other ports were involved in a sympathy strike related to labor troubles in Hamburg.

British Columbia Plans Extensive Road Building  
Victoria, B.C.—British Columbia is launching its extensive road building program, which will open up to the motorist hitherto inaccessible regions in the interior.

Work will start immediately on a new road to the United States boundary which will connect Vancouver with the Peace Arch at Blaine.

Gold Suspension Causes Revival in Britain's Cotton Industry  
Manchester, England.—Many Lancashire and Yorkshire cotton mills report increased activity as a result of an influx of orders since the gold standard was suspended.

Mills, in which the spindles had long been silent, are now humming with activity, executing rush orders, while the nearby Yorkshire district cotton doubling-mills are working overtime.

One large mill at Rochdale has started a night shift to fill its orders and at Haslingden another cotton mill will operate on a 55-hour week instead of the usual 48.

Trade union officials have objected to the overtime work, but the workers, it is said, are generally glad to earn the extra money.

The sudden business pickup is attributed to suspension of the gold standard inasmuch as the drop in the value of the pound sterling against other world currencies amounts virtually to a reduction in the price of manufactured goods making Great Britain a good country in which to buy.

Britain Buying U.S. Cotton  
New York.—Lancashire mills are selling more yarns and cloth than recently now that their cost in terms of foreign exchange rates has been reduced by the depreciation in sterling, the New York cotton exchange service reported.

Cables from England are more cheerful and an increase in mill activity has been noted. Margins have been improved and spinners are buying freely for both immediate and forward delivery. Liverpool is inquiring on an extensive scale for shipments from the south and is buying on a larger scale after doing almost nothing for weeks. A large volume of Egyptian cotton has been sold at Liverpool.

Advices from the Continent, the report said, are irregular with some increase in mill activity reported in some sections. The effect of British competition is being felt, but activity on the whole is averaging better than for some months past.
