The Age of Bronze

Arms, furniture, jewelry and gems have come down to us from distant ages, to show their makers' skill in carving, while pottery in a hundred varied patterns and even bits of decorated plaster, have served to prove the cunning of the earliest Greek fingers with the brush; not to forget those more homely arts of the loom and embroidery-frame which Homer loves to describe and for which the Athenian women became so famous in the making of Athens' sacred peplos.

Although some of these products of art are unfortunately lost to us forever through the perishableness of their material, and others are not nearly so well preserved among the ruins of ancient Athens as they are at other places, existing chiefly in tiny fragments that have lodges in the crevices of rock, there are enough evidences to show that these arts did exist in Homeric Athens, and cempare quite favorably with those of Agamennon's princely abode.

If it is not going too far to draw one more illustration from the better preserved monuments of the Atreid capital, we may restore a scene upon the Athenian Acropolis with details borrowed from the ruins and the lines of Homer.

We must picture the lordly abode of the Athenian princes as something far more than an aggregation of massive walls and colonnaded courts. Those walls, severe and plain without, blazed within a revetment of curiously wrought metal or brilliantly colored plaster.

The doors, incased in beaten bronze, swung upon hinges of the same material; the handles, too, were richly wrought in gold or silver.

The walls were massy brass; cornice high Blue metals crowned in colors of the

Rich plates of gold the fading doors

The pillars silver on a brazen base: Silver the lintels deep projecting

And gold the ringlets that command the door.

If this famous description of the house of Alcinous, from Homer's Odyssey, were our only warrant for imagining this lavish use of beaten metal with enrichments in gold and ble. silver many would doubtless be disposed to say that the Homeric picture was drawn from the realm of ly, giving number and size of such pure imagery although the very patterns as you want. Discipline vs. Freedom in School

Soviet Tests "Dalton Plan-Founder Comments on Results

From Moscow comes word that there is to be an important departure from the plan of education which was introduced in Russian schools by the Soviet regime. That plan is said to have incorporated many features 20 minutes. But now that has all of the "Dalton plan," originated by gone, thanks to Kruschen. I have Miss Helen Parkhurst, headmistress lost 14 lbs. in weight, and am able to of the Dalton School of New York get about in comfort. I can work all City. Certain features are now said day and not feel tired. I feel so by the Soviet educational authorities mechanized Five-Year Plan, be re much better, and am so pleased to to produce undesirable habits in the

Miss Parkhurst has outlined her plan in a book, "Education on the There are six vital mineral salts in Dalton Plan." It has these outstanding characteristics:

1. The pupil is accorded a large organs to perform their functions amount of freedom in the performance of his tasks.

2. A large amount of individua responsibility is imposed on him. 3. Extensive group activity is un ents. Kruschen does not confine its dertaken to develop the social sense. 4. Subjects are taught by the laboratory method, the emphasis being more on the habits of work than on

the matter learned.

5. The child himself is made a recorder of his own progress, examinathe child the opportunity for self-disdren who are rated "slow" by intel- a harmonious, responsible being, able plined. and willing to lend himself conscious-

ports and information brought me by: Russian and American educationists. However, not a single report or interview has ever convinced me that the Dalton plan was really applied.

It seems to me that in all probability what has happened in Russia is that the school curriculum, adopted as an integral part of the Five-Year plan, has now been found to be inadequate. During the past five years the workers of Russia have become thoroughly indoctrinated and informed regarding their Five-Year Plan. They are now well able to inform their children regarding the Soviet program, and naturally demand that traces of illiteracy, as manifested by a lack of ability in the tools of learnings, and acquired under the moved.

Subjects vs. Experience.

A wholesale attempt was made to introduce this curriculum by means of the project method. The Five-Year Plan itself was the curriculum of the Soviet school system. Now, after five years, it is very possible that the Soviets find that the residume of the more formal school, such as reading, writing and arithmetic, provides, the necessary tools for every child's education.

These subjects, while not as important as experience in the development of personality, are nevertheless essential. A curriculum is not habits, nor is a curriculum tools. But the Improved by Diet tions being regarded as unimportant. manner in which a child lives while To Miss Parkhurst the plan gives doing the work provided for in the curriculum makes for either an inte- things my wife taught me was how cipline, rather than an imposed dis- grated or disintegrated individual, to darn 'em. physical conditions, and many chil- cipline, which makes him "grow into one either disciplined or undisci-

Seeing is Believing

The truth of the old saying "Seeing is believing" was strikingly exemplified during some meetings where animal parasites were being discussed and post mortems conducted. The animals offered for demonstration, proved to be very wormy and the sight of large quantities of tape worm being removed from the in testines brought forth the comment "this is surely an eyeopener", ". would not believe had I not seen it" That man that tried to raise the lambs that were used for post mortem demonstration, would not believe what had been told him about his lambs being wormy, on the previous day. But the sight of yards and yards of tapeworm being removed from his lambs thoroughly convinced him. If the-lambs in your flock are not doing well, there is a rea-Don't winter unthrifty stock help them get rid of the parasites, so that they can become profitable.

IMPERFECTION
