

# Check

up on your sale of cream, if you are not a shipper to the Stouffville Creamery, and compare your results at our creamery or with any of our customers, and you will find you have been losing dollars, as well as missing a Creamery Service that is unexcelled.

## An Indication

The fact that our make of butter at present is up 20% over last year is sufficient proof of how we use our cream shippers. It is always our aim to render to our shippers the best creamery service possible every day in the year. As to the price we pay, method of payment, method of receiving, and collecting the cream and in all other respects, nothing suits us better than to see our shippers pleased.

Equally are we pleased with the progress which we are making in the way of disposing of our butter, and the demand we have created for our butter. The delivery system we have established in Toronto to deliver our butter direct to stores, helps us to get the top price for our product.

As a convenience for those who deliver their cream we are also open Tuesday, Thursday, and Saturday evenings. From those whom we collect the cream by truck, we are making plans to collect twice a week

### HAVE YOU MISSED SOMETHING

If you have not tried Stouffville Creamery butter ask your grocer or get it at the creamery

It is always obtainable fresh and of the highest quality. Thousands of satisfied homes use only Stouffville Creamery Butter—look for our label on every pound.

Hard times or good times, it matters not,

the milk Cow is the farmers best friend

### MUTUAL BENEFIT

The fact that we are situated right among our cream shippers, and getting all our cream just within a few miles, plays a very important part in the quality of cream we get, and naturally in the quality of butter we make, which commands the top price. Its the price that we get for our butter, that governs the price we pay for cream. The prices we pay for cream are always the highest the butter market permits to pay, and not only on special occasions, or for a special purpose which is so often done. By being so situated and giving prompt attention to the cream as it comes in, gives our cream shippers a chance to get the best grade for their cream. The fact is that the percentage of our 2nd grade cream is exceptionally low.

You must remember that the difference in 2nd grade and 1st grade is 3c per lb. of butterfat, and we pay a premium of 2 cents per lb. of butter fat for special grade, over 1st.

### THIS MEANS SOMETHING TO OUR FARMERS

Notwithstanding the fact that we had a 30 per cent increase in 1931 over the Butter manufactured by us in 1930, that increase was maintained in 1932, and so far this year (1933) we are again forging ahead with a still larger production than heretofore, or to be exact a further increase of 20 per cent for the first quarter of 1933.

### CLAREMONT

An enjoyable time was spent at the home of Melburn and Mrs. Chapman near Goodwood, on Friday evening last week when a surprise party of several car loads of their old friends and neighbors of this locality motored up to spend the evening with them. Mrs. Jno. Pallister, on behalf of the party, expressed regret at the removal of Mr. and Mrs. Chapman and daughter from this community, and extended to them sincere good wishes for their future welfare in their new home. A beautiful gift was then presented to them. Mr. Chapman made a suitable reply, thanking the donors for their kindness.

The remainder of the evening was spent in games and community singing, in which every one present joined most heartily. A dainty lunch was served by the visitors. Before leaving for their homes, "God be with you till we meet again" was sung, bringing a very happy evening to a close.

### Here and There

Another sale of salmon angling leases is announced in New Brunswick for the famous waters of the Upperquitch River which will be leased to the highest bidder at a sale to be held in Fredericton, April 27. The leases will be for ten years from March 1, 1933.

Canadian railway salaries have experienced severe cuts over the past few years. This has applied to officers as well as to workers on the trains and along the lines. The recently issued annual report of the C. P. R. announced that E. W. Beatty, Chairman and President of the C. P. R., had instituted a special cut of 15 per cent for himself and the Company's directors. This makes a total cut of 25% for them since the decline in earnings began.

Nipigon River's famous speckled trout don't know it yet but the ukase has gone forth that non-residents shall pay only \$5.50 for an annual fishing license, or about half the charge hitherto. Further, Nipigon guides will offer their services this year for \$20.00 a week as against \$28.00 in 1932. Those trout in the Nipigon pools and in those off the islands at its mouth including St. Ignace, run to seven pounds and up.

Canadian Pacific liner Empress of Japan recently hung up a new speed record when she travelled the 2,329 miles from Honolulu to Victoria in four days, eight hours and three minutes, clipping seven hours, 47 minutes from her best previous time for the voyage and much outdistancing the best mark for any other Pacific liner except the Empress of Canada.

The literary hit of the year has been made by Frederic Niven, Canadian author, living near Nelson, B.C., whose "Mrs. Barry" has been recently hailed by authorities as one of the most profound moving books ever written. Mr. Niven, who thus breaks into the ranks of best sellers, earlier in the century handled baggage and freight for the Canadian Pacific Railway at Nelson.

H. F. Mathews, general manager, Canadian Pacific hotels in western Canada, with headquarters at Winnipeg, has been promoted general manager of the company's hotel system from coast to coast, with headquarters in Montreal, according to a recent announcement by E. W. Beatty, chairman and president of the railway.

It is necessary to go back to the year 1916 to find revenues of the Canadian railways on a level comparable with 1932. The following record shows that in 1932 we compare favorably with 1916:

Railway Operating Revenues . . . . .	Decreased	5.5%
Railway Operating Expenses . . . . .	Increased	20.9%
Net Revenue from Railway Operations . . . . .	Decreased	50.6%
Railway Tax Accruals . . . . .	Increased	135.7%
Net Railway Operating Income . . . . .	Decreased	58.3%
Railway Property Investment . . . . .	Increased	34.6%
Rate of Return on Investment . . . . .	Decreased	69.0%
Revenue Freight T on Miles . . . . .	Decreased	28.3%
Revenue Passenger Miles . . . . .	Decreased	50.3%
Actual Gross Ton Miles . . . . .	Decreased	17.2%
Payroll of Engine and Train Service Employees and Telegraphers . . . . .	Increased	31.3%
Train Miles . . . . .	Decreased	22.8%

### The Farm News

Heaves, the ailment common in horses, is frequently caused by repeated gorging with food or water, or both. Dusty grain or hay also predisposes to this trouble.

Early in spring is the best time to transplant most kinds of trees and shrubs, evergreens included. Evergreens may be transplanted in summer but greater precautions must be taken to do it successfully. Although held back in some districts by wet, cold weather, spring farm work has become general throughout Ontario. In many counties cultivating has been general and in some cases spring wheat and oats sown. The reports indicate that fall wheat is looking decidedly good and that clovers, alfalfa and timothy have come through the winter in fairly good condition.

### Exports to U.S. Jump

A tremendous increase in the export of farm products to the United States was noted for the year ending Jan. 31st., 1933, as against the previous 12-month period. Citing some of the Canadian items which mounted in export trade, we see canned fruits, tobacco leaf, honey, cheese, condensed milk, and canned meats. In the last-named item the increase was 2,443 per cent., there being 15,388 pounds exported in 1931, and 391,354 pounds in 1932.

Tobacco leaf exportation grew from 5,839,000 pounds in 1931 to 13,969,000 in 1932; cheese (70 per cent. Ontario), from \$04,780 hundredweight to \$33,638; canned fruits (80 per cent. Ontario), 5,412,000 pounds to 10,442,000 pounds; honey (80 per cent. Ontario), 1,364,000 pounds to 2,236,000; and condensed milk, 84,062 pounds to 171,000 pounds.

### Sow Good Seed

One of the best services rendered by the experimental farms in the testing of varieties of grain to determine their suitability to particular areas. That this work has been extensive and satisfactory is indicated by the general adoption of varieties that were first distributed from the farms. Outstanding examples are Marquis and Garnet wheat in the West, and O.A.C. No. 44 and O.A.C. No. 72 oats in Ontario. In the face of all this, attempts are made at times to push the sale of seed from the United States of so-called new varieties at fancy prices on the claim that fabulous yields may be obtained. About a year ago a carload of an inferior sort was sold in central Ontario at \$1.35 to \$2 per bushel, even though it graded No. 3. This leads A. H. Martin, of the Crop and Markets Branch, to state that not one variety ever introduced into the province by high pressure salesmen has ever been equal to the standard varieties already grown.

Another matter to be kept in mind at the seeding season is that quality counts, either in home grown or purchased seed. Experiments at the O.A.C., prove that large plump kernel yields 20 per cent more than light or shrunken seed. These experiments also show that an additional outlay for plump seed will increase the yield from 10 to 15 bus. per acre, which at the present price of 40 cents per bushel for feed oats means a cash increase of from \$4 to \$6 per acre.

For Wilkinson's grocery specials see page seven.

### Patrons Build Factory

Dissatisfied with the returns which their nearby markets were returning them for their milk, descendants of the Scottish pioneers of East Nissouri township in Oxford county, Ontario, decided to build a real co-operative cheese factory for themselves. This they did in the truest sense of the word, and the result is the Homestead Co-operative Cheese factory, opened not long ago. It was built with the patrons' own hands at a big saving and in splendid manner. A number of old-fashioned "bees" helped out the personal labor that was being carried on by the directors and others from among the patrons.

The factory has the cellar curing system, and is modern in every way, and generous in its size. It will have an output of about 150 tons per season.

### Honey Market Improved

Two cents increase a pound in the price of honey since last fall, and an improved market out look has placed the honey industry in the best position in which it has been for a number of years, according to Professor F. Eric Millen of the O.A.C.

Honey has received preference on the British market, and this combined with other factors, has helped the export trade in light honey considerably. The Ontario Honey Export Association announces it has shipped to date some 675,000 pounds of honey to Great Britain and the Continental market. The quantity is made up as follows: 450,000 pounds of white and golden honey; 20,000 pounds of light amber; 6,000 pounds of comb honey, and 200,000 pounds of buckwheat.

Various processes have been adopted to give honey in different forms to suit the markets. Prof. Millen advocates selling as soon as possible after extraction so that the best flavor may be preserved.

Attend the spring fair at Meville, on Friday May 12. Everything in garden seeds, shrubs, etc., on sale. Amusements for all as a special attraction.

Premier Henry added four registered Holsteins to his York county farm herd at a little under \$1,000, when he attended the sale at the Coliseum.

Fifty-one head sold for a total of \$8,771 or an average of \$172 a head, at what was considered the most outstanding sale of dairy cattle in Canada during the past four years. The stiffest bidding centred about a six-year-old cow consigned by the Mount Victoria Farms, Hudson Heights, Que., which went to Harry D. Norris of Baltimore for \$1,200 after Premier Henry had run the bid up to \$1,175.

Buyers from Michigan, Illinois and the New England States, Ont., Quebec and the Maritimes were at the sale. The top price realized for a male was \$525 paid for a 10 months old bull calf consigned by J. Walter Jones of Charlottetown, P.E.I. and bought by M. L. McCarthy of Sussex, New Brunswick.

Premier Henry, a four-year-old heifer at \$250 from Mount Victoria Farms, Hudson Heights Que., a yearling heifer at \$260 from J. Walter Jones of Charlottetown, a four-year-old heifer at \$170 from J. Watson Roulston of Hagersville, Ontario, and a two-year-old heifer from T. R. Dent of Woodstock, Ont. nol22wM

### Carrot Growers NOTICE

All parties concerned in the growing of Red Carrots for factory purposes (Campbell Soup Co. Ltd.) should get in touch with R. E. Brown, phone 176, the District Representative. First of all, this season the company demand carrots grown from seed of a distinct type. There are also other plans concerning the growing and cultivation of same which growers should know. R. E. Brown.

HOUSE TO RENT—Main street, all conveniences, and centrally located. Isaac Bowdway.

PASTURE FARM FOR RENT—\$50 for season, or will take in stock \$3 for yearlings or \$4 for older cattle for season. Plenty of water and shade. The late Wm. Pearson farm, lot 7, con. 3, Uxbridge. Apply to Ernie Mantle.

The date on the label of your Tribune indicates the time your paper expires. The rate is \$2 per year or \$1 for six months renewal.

### GOODWOOD

We are looking forward to the entertainment to be given in the United Church Sunday School Room on Monday evening next, where Mr. Croskey will be giving moving pictures which will be both educational and entertaining.

Mr. and Mrs. Gould and family of Toronto visited friends in town over Sunday.

Mr. and Mrs. Johnson of Markham have taken up their abode on the farm recently owned by the Torn Bros. Welcome to our community.

Mrs. J. E. Wagg, Norman and Gladys visited in Mount Albert on Sunday, with Mr. and Mrs. Harry Leadbetter. Toronto—Mrs. McDonald—the good wife of our friend Distin, was a much welcomed visitor at the social gathering in Toronto of the Goodwood Cemetery Board. Mrs. McDonald is one of many friends who sees that the Toronto members do not return home hungry after their visits to Goodwood in connection with the cemetery. Mrs. John Lee of Stouffville was another very welcomed guest.

### Back-to-Farm Movement

The present increased employment of men on farms is a definite step toward minimizing the unemployment situation, declared Dr. Christie, president of O.A.C., in a recent address. He referred to the fact that more boys and more men as farm managers on salaries had been placed on farms this spring than in any like period for the past ten years.

### CARD OF THANKS

My sister and I, through the medium of the Tribune, wish to convey our earnest thanks and appreciation to our many friends in Stouffville and vicinity for their sincere sympathy expressed to us during our recent bereavement, and for their tokens of respect paid to the memory of our beloved aged mother.

Gordon R. Duncan.
