PROSPECTS BRIGHTER FOR YORK FARMER

Improvement in Prices increases Producers' Income—High Production Maintained During Depression

With the improvement in agricultural produce prices, the farmers of York County should experience better times. Their produce is now commanding a better price than at any time during the past few years. Wheat has during the past few months more than doubled the price at which it was quoted at this time last year, and the increase during the past month has amounted to about 60 per cent. Other lines of produce have advanced in proportion, and this means a far greater buying power for a large percentage of the population of the county. Of course prices have done most of the climbing since the farmer sold his chief products of 1932.
 Last year, with wheat quoted at approximately 35 cents per bushel, the York county farmers produced 734,481 bushels of fall wheat on 25,862 acres, with a market value of \$345,206. Spring wheat produced on 4,199 acres of York county land totalled 83,140 bushels, with a market value of \$37,413. With the price of \$37.413. With the price of wheat nearing a point where it is nearly two and one half times the price of 1932, it is expected that the market value of the fall wheat, providing the acreage remains near the total of last year, will be between \$813,000 and \$1,000,000 and the spring wheat market value between \$93,500 and \$100,000.
Crop Prices Improving
 Other crops have advanced proportionately to wheat. Market reports indicate that the prices which the farmer will receive for root and field crops will be at least double those of the corresponding period one year ago. Livestock prices, which have recently been weaker than grain and vegetable prices, are now firming up and an increased income to the breeder seems indicated.
 According to the report issued by the Ontario Department of Agriculture Statistics Branch, for the year strengthening of commodity prices have been an important factor in the world trade depression. Difficulty has been experienced not only by the farmers and producers of the County of York in marketing their produce and in securing a decent return for it, but it has been general throughout the world.
 The report stresses the point that there has been an appreciable strengthening of commodity prices during the past few months. The report also states that if the prices prevailing at the end of April, 1933, could be maintained over a 12-month period, then the farmers would have an increased revenue of \$34,183,000 throughout Ontario, with York county benefiting proportionately. Of course, if the present level of prices can be maintained over the same period, the increased revenue will be even greater for the York farmers.
 One other bright spot revealed by the report is the fact that the depressed condition in agriculture, so far as prices are concerned, have not affected the continuity of agricultural production. Grains, livestock, market vegetables, fruits, etc., have maintained a high level of production, and in some instances have exceeded those of the previous year.
Much Cleared Land
 In York county, according to the report of the Agriculture Department, there is a total of 529,740 acres of assessed land. Of this amount 443,885 acres have been cleared of bush, or a percentage of 83.79 of the land is cleared land. This is a good percentage when it is shown that only 59.66 per cent of all land in the province of Ontario has been cleared.
 Production of oats and barley was maintained at a high level last year. The number of acres planted in oats was 60,627 for the County of York, with a yield of 2,231,074 bushels, or 36.8 to the acre. The market value was \$557,769. In barley the number of acres sown was 19,231, with a yield of 621,161 bushels, or 32.3 to the acre and with a market value of \$236,041.
 Peas were produced on 1,063 acres in the county last year. The amount produced totalled 19,984 bushels, which a market value of \$13,189. The acreage of beans was small, which, with only 37 acres

calves totalled 11,043 and all other cattle 1,704. Total number of animals was 58,984, and total value \$2,019,240.
 Sheep and lambs in York totalled as follows: Ewes for breeding 11,371; 1 year and over 1,753; under 1 year 12,909; total number, 26,033, and value \$130,165.
Many Swine on Hand
 Swine on hand in York were as follows: Brood sows 5,614; other swine, 6 months and over, 6,960; under 6 months, 36,929; total number, 49,503, and value, \$269,791.

MARKHAM TOWNSHIP FARM PURCHASED

B. R. Leech, sales manager of the Toronto Radio and Sports Co. Ltd., has purchased 100-acre farm in lot 7, con. 3, Markham township to be developed as a country estate. The sale price listed was \$15,000 and the deal was negotiated by J. A. Willoughby, owned by Mrs. M. A. Robinson. A nine-roomed roughcast house and fine bank barn comprise the buildings. There is also an extensive orchard.
 The new owner plans to improve the residence and other buildings as a preliminary to construction.

ATHA

With deep sorrow, we announce the death of Mr. Richard James, which took place at the home of Mr. Geo. Tran, Atha, on Tuesday evening of last week, in his 69th year. Mr. James was well known in these parts, having lived at the home of Mr. Tran when he resided near here many years ago. Dick, as he was more commonly known, will be missed by all, being a fine quiet, hard working man, and an extra good herdsman. The funeral was held Thursday at 2 o'clock from home of G. Trau to Locust Hill Cemetery.

RINGWOOD

It has been said that it costs nothing to be polite, yet when two Stouffville youths were handed a biscuit apiece by a Ringwood fellow in the presence of his wife (or was it his lady friend) on Friday night, the chaps from town presumed they were of the fair one's baking, and not wishing to offend by chucking the hand-out after they had bitten into it, they showed that "heroes are made, not born," by the way they persevered in masticating it even at the risk of wearing away all their home-grown teeth. Never did a pair of youths tackle a harder job, nor see broader smiles from the gallery when they had finished. It wasn't until someone tipped them off that they had successfully abetted a dog biscuit and knows started to howl. And no one who has ever tackled a dog biscuit and knows the kind of concrete they are made of, but will realize that nothing that wears a tag and gets hydrophobia has more license to howl than those disillusioned youths from Stouffville.
