

4TH LINE UXBRIDGE

Sorry to hear Mrs. Bert Staley is very ill again but we hope she is soon feeling better.

Mr. and Mrs. Walter Talbot of Stouffville were visitors at Mr. Bert Staley's on Sunday.

Owing to poor health Mrs. Watson has returned to Toronto after spending a time with her daughter Mrs.

RADIO SERVICE

All makes of Radios, Electric Stoves, Toasters, Irons and Fixtures Repaired

Will Appreciate your custom

Fred Woodland.
The young folks are enjoying this frosty weather as Mr. Jack Frost has frozen the ponds making good skating.

The Fifth Line young people are busy practising for their Sunday School Christmas Concert, to be held on the 19th of next month.

The chirvari for Mr. and Mrs. Percy Hardy came off fine after the couple were rounded up and given a sleighride. The blue racers are sure cunning and we think the bride and groom took an example off them.

A miscellaneous shower was held at the home of Mr. and Mrs. George Redshaw on Friday evening of last week in honor of the approaching marriage of their daughter Elva. There were about forty friends and relatives present and the bride-to-be received many beautiful and useful gifts.

GREEN WOOD,—1st class body, 4ft. \$8.50 cut, \$9.00 delivered. Quantity dry limb wood, 2 cord \$14, or 3 for \$20, also dry body wood. W. F. Ratcliff, phone 9906. Terms cash.

Farmers' Information

Storing Vegetables for Winter
Select well-grown, disease-free unblemished material and handle it carefully to avoid mechanical injuries. An earth floor basement under a dwelling house or a regular root cellar may be used. Proper ventilation is very important and a temperature of 34 degrees Fahrenheit should be maintained. The beet, cabbage, carrot, celery, parsnip, potato and turnip require dark, slightly moist storage space, while onions do best under dry, cold dark conditions.

Too Many Green Apples
On British Markets
Arrivals of Canadian apples at the rate of 150,000 to 250,000 barrels a week have knocked the bottom out of the British apple market for the time being, as supplies of this magnitude far exceed the demand in the early part of the season, when English apples have not yet been disposed of.

Green apples, and particularly Ontario Greenings, are in excessive supply on the British markets, says Andrew Fulton, Overseas Fruit Representative.

Preparing Perennial Borders for Winter
A very good thing to remember when mulching plants for winter is that the ideal protection keeps the plants cold, which means that the mulch should be applied when the ground is frozen hard for the first time that season.

Corn fodder or straw manure, besides being easily obtainable, are to be preferred to leaves as the latter forms an almost air-tight mat and very often results in trouble by causing premature growth of the plants.

Unfinished Hogs
All unfinished hogs offered at stockyards and packing plants, such as do not conform to the requirements of the grading regulations are graded as feeders, and it is in the interest of the producers to make every effort to hold back hogs of select bacon, and bacon weights, until they are properly finished. Underfinished pigs make soft bacon and poor cuts and roasts.

Milk Cooling Surging
The Colder Months
Do not attempt to cool milk by setting the cans out-of-doors, even in freezing weather. It takes far too long or the milk to cool to 50 degrees F. for air is a good insulator but a poor cooling medium. Use a cooling tank with water as cold as possible, and keep the level up to the necks of the cans.

Watch the Seed Fairs
The adaptability of different varieties of grain to different soil and climatic conditions is reflected to no small extent in the degree of development attained by individual kernels. Varieties which consistently win high places at our seed fairs are therefore likely to be at least reasonably well suited to the district from which they come. Moral: Watch the winners at the seed fairs!

Apple Crop Report
The quality of the apple crop in Ontario is superior to that of last year. Some damage was sustained due to early frosts on October 24th and 25th. The last estimate of apple yield in September indicated a commercial crop of 1,069,000 barrels which will be reduced by the cause just mentioned. The output in 1932 was 918,500 barrels. Exports have been exceptionally heavy and up to November 7th this season 238,000 barrels had been shipped from Ont., as compared with a total of 132,900 barrels up to November 25th last season. The high rates prevailing for sterling are proving a very favourable factor—the present rate of sterling is \$5.25 as compared with \$3.77 a year ago.

Official Crop Report
The latest official crop bulletin shows that with the exception of sugar beets, the yield per acre of all field crops in Ontario this year is below last year. A severe period of drought and intense heat during July reduced the yield of spring grains and hay and clover crops. During August and September more favourable growing weather prevailed and the yield of late crops turned out much better than mid-summer prospects indicated. The volume of production of all field crops for 1933 is about 8 per cent below 1932. But farm prices show considerable improvement over last year and are 15.6 per cent higher. As a result the value of these crops is estimated to be \$121,553,000, compared with \$114,150,500 in 1932, or in an increase of \$7,403,000 in spite of the smaller output.

Fall plowing got away to a good start, but was made difficult by dry weather and later by heavy snowfalls. Farmers planned to sow a much larger acreage to fall wheat but owing to lack of soil moisture, many fields that were already prepared, were not seeded. The sown acreage of fall wheat is estimated at 630,700

acres compared with 595,000 in 1932, an increase of 6 per cent. The condition of fall wheat at the end of October was 96 per cent of the long-time average and fall rye 95 per cent.

YORK JUNIORS WILL VISIT CHICAGO INTERNATIONAL
In the County Competitions in stock judging for boys and household science for girls, held in the spring, prizes of a free trip to the Chicago International are given to the high standing boy and the high standing girl. This year these prizes were won by Robert Chapman of Weston and Gladys Harrison of Woodbridge. These winners will go to Chicago early in December where they will be royally entertained during the whole time of the show.

Wintering the Brood Sow
The brood sow deserves her fair share of winter accommodation. A pen that is well bedded, dry and free from draughts is essential. Place the feed trough some distance away so that she is forced to exercise outdoors daily. Eradicate lice and round worms; there is no market for them. Feed a mixture of grains to maintain the sow in fair flesh, but use barley sparingly unless the sow is very thin. Provide clover or alfalfa hay to be eaten at will. Be kind to the sow, but not "too kind," or weak, unthrifty pigs will result.

Head of Apiary Department
Dr. E. J. Dyce has been appointed head of the Apiculture Department as successor to the late Prof. F. Eric Millen who headed the department for many years.

Dr. Dyce, who is a graduate of the Guelph College, took his doctor's degree at Cornell University, and has the distinction of being the principal discoverer of the new process for honey which has resulted in a great increase in the sale of the Ontario product in the British Isles and elsewhere.

As a result of his appointment, he automatically becomes Provincial Apiarist, with the duty of controlling disease in the apiaries of the Province.

New Grades For Eggs
Important amendments whereby further protection is afforded to both producers and consumers, have been made in the egg regulations by Order-in-council. The new grades consist of "A-1," "A," "B" and "C" in place of "Specials," "Extras," "Firsts" and "seconds." The words "New laid" may be applied only to grade A-1, and the word "fresh," or any other equivalent of that word, to grades A-1 and A.

Grades A-1 and A are divided respectively into three classes, Large, Medium and Pullet and all eggs possessing the quality of Grade A may be sold in that grade irrespective of size, but the eggs of different sizes must be packed separately, with the size indicated on the container. As grade A-1 is a super grade, the packing of eggs of this grade may be done only by producers authorized by the Dominion Department of Agriculture. Storage eggs are not permitted to be sold in a higher grade than B.

"B" grade consists of reasonably clean eggs, sound in shell, and eggs weighing less than the rate of 22 ounces to the dozen shall not be graded in B. There are two classes, Large (24 ounces) and Medium (22 to 24 ounces.)

"C" grade consists of all eggs below A and B grades which are fit for human consumption.

MR. MOTORIST

Have you tried the courteous service and reliable Oils and Gasoline at Grove's Ringwood Garage. If not, give us a call.

We are equipped to repair or overhaul all makes of cars. Experienced Workmanship.

BLOOMINGTON

Mr. and Mrs. J. Stover of Toronto were guests with her mother Mrs. Law here on Sunday.

Delos Morris of Rochester, Mich., has been here on a short visit to his sisters Mrs. Burnett, Mrs. Story and Mrs. Art Smith.

Miss Alta Fockler, was the local delegate of the Junior Women's Institute to the annual convention held in Toronto.

The play "Cranberry Corners" was presented to a full house at Bloomington United Church, on Friday. Everybody thoroughly enjoyed it. This play will be given at Ballantrae on Friday December 1st.

Dairy Herd Sale

The auction sale of registered pure-bred Ayrshire cattle on the farm of Mr. Herb Mitchell on Thursday last, witnessed the sale of nine animals, more or less the culls of the herd. Mr. Mitchell decided not to offer his better class milkers because the class of buyers were not plentiful enough. One would-be purchaser made a private bid of \$100 for a cow in the stalls, but the owner regarded it as a sacrifice price, and did not consider the offer. The Mitchell herd is accredited and has never shown a reactionary test.

MEETING OF MILK PRODUCERS

The annual meeting of milk producers of District No. 7 was held in the Temperance Hall, Newmarket, on Thursday, November 16. There was a fair attendance. Dr. Reynolds, president of the Toronto Milk Producers, and E. H. Clark, secretary of Ont. Milk Producers were the chief speakers. Dr. Reynolds explained the quota system. "For sale of milk," he said, "those shipping to the larger dairies, it is harder on the producer that does not ship an even supply of milk such as one or two cans in winter, and seven or eight in summer. It also helps to keep the big surplus of milk on the market. Your organization has had some difficult times. We always did the best we could in all our transactions. We felt we had 3,800 producers at our back, but have had producers say they did not get a square deal having been missed by a truck driver or one of the Dairy's field men." E. H. Clark pointed out it was to the producer's interest to produce a good product, and have control of the same to the consumer. "We have fifty-four dairies in our market, and one hundred and sixty truckers transporting our goods. We have got to all come to one agreement. Our goods are perishable and must be handled quickly and under sanitary conditions."

The officers were elected for the ensuing year:
Pres.—W. H. Wilmet, Sharon
Sec.—W. Stevens, Sharon
Com.—Floyd Cunningham, Queensville; E. Doner, Newmarket; W. Richardson, Vandon; Gordon Stevens, Pine Orchard; Frank Merritt, Keswick; Carl Moorehead, Mount Albert; Walter Lloyd, Bradford.

It was decided to hold a meeting every three months at different points in the District No. 7.
