#### World's Champion Cow

A unique tribute was paid recently to B. H. Bull and Son, of Brampton owners of "Basilua," the wonderful cow which won the world's championship in a production contest extending over a whole year, when leading agricultural officials gathered to pay honor to the cow and its owners at a banquet arranged by the Peel District Jersey Breeders' Association. Unstinted praise was offered by Hon. Mr. Weir and Hon. T. L. Kennedy, Federal and Provincial Ministers of Agriculture, and Dr. G. I. Christie. head of the Ontario Agricultural College, and by many leading owners of dairy herds. This remarkable cow, which is five years of The L.O.L. announce a special age and weighs 950 pounds, prodays. Such an achievement is of widespread interest and testifies to the wisdom in selection and care in feeding and testing on the part of its

Junior Farm Winners

Honors were well divided among various Canadian -provinces in the Boys' and Girls' Club competitions at the Royal Winter Fair, Toronto: Quebec won in dairy cattle, Manitoba in beef cattle and poultry, Saskatchewan in swine, Nova Scotia in potatoes and Ontario in grains. . There were 56 contestants, representing over 23,000 members of about 1,400 clubs. They were the very best that could be developed through local and elimination contests and the way in which they went about the judging of the various classes and answered questions bearing on the project which had commanded their major, attention during the past season, showed that the Boys' and Girls' Club movement is developing an army of competent leaders. During their week in Toronto, the boys and girls were royally entertained. Prospects for the future of this junior farmer movement are very bright.

Beef Cattle

The progressive steps in growing beef steer are first to develop by continuous growth a large frame well covered with muscle and never entirely denude of fat; then to deposit on this body of frame and muscle the fat necessary to give the animal the desired finish. To acrieve the first step-requires ration rich in bone and muscle building feeds according to: local conditions; to accomplish the second step a somewhat similar ration is needed at first, but gradually changed to one containing a larger proportion of fat producing carbonaceous foods, such as corn

barley and peas. Increases should be gradual. The condition of the steers should be watched and the grain feed fitted to the rate of progress, so as to keep the steers gaining steadily to have them fit to sell by the date at which it is planned to market
