WHERE THE MONEY GOES

goes when it is worn out. It McCreight. becomes filthy lucre and is washed into the sewage system at Ottawa says the Financial Post. This is what happens to dilapidated Dominion notes: First it is boiled beyond recognition with chemicals so that printing and colors are obliterated. Then the residue is put through a steam pressure beater and poured into a sewer, whence the material is conveyed into the Ottawa River. Some \$60,000,000 a year in cash is out to vote disposed of in this way.

Once upon a time the money was burnt, but pieces would escape through the flue and arouse false hopes in the breast of those who observed them fluttering on the lawns of Parliament Hill.

Wait for the Irish Carnival Wednesday night next week. Good WOOD BUZZING-Custom cash prizes for costumes.

Honey Grades -

The consuming public is sho ing a special interest in the a tractive apearance and convenient identification of quality which is made possible by the new honey grades, which came into effect thi year. Where honey is sold by grade the grading must conform to the Canadian standards. The Canadian standards for honey provide a natural classification by color into the four classes: White, Golden, Amber and Dark. These classes are in turn at 9 a.m. Bing Edward Hotel, Toron- home here tor New Years graded strictly on the quality basis as Fancy, Choice or Manufacturers. and Anna Howser visited at Miss popular because of the consistency of the application of grade terminclogy to the product when graded, Mrs. Fred Jakes, of Vernon, B.C., the inherent quality of the honey

Crate-Feeding Pays

The farmer who has poultry to market would do well to remember that it is the last pound which brings the finish and increases the value of the bird by 50 or 75 cents.

Use Registered Males

Good breeding practice in poul try has long recognized the value of the highly prepotent male bird in building up flock production. When the farmer or poultryman can raise the average production of the pullet flock from 120 eggs to 150 or 160 eggs per bird in a flock of 100 pullets the real cash value of the high quality male bird is immediately apparent. In the whole scheme of the National Poultry Policy = the registered cockerel alone has the proven ability best suited to increasing pullet production. These cockerels are bred from two direct lines of females which have laid 200 eggs or more in one of the Canadian egg laying contests. proven capacity for egg size as well And what is most important, every registered cockerel has been bred from a fully matured hen. They are cream of production bred

The Canadian Hen

Canadian hen in the last year or two has been building up a commerce all her own. Four years ago Canada was sending no dressed poultry to Great Britain, but lately there has been a sharp development in the export trade. A large supply was sent to the British Christmas market last year and the year before. During the past twelve months over two and a quarter million pounds of dressed poultry have been exported and another generous supply was delivered to the British Christmas market. A large supply of Canadian poultry

Cleaning Seed Grain Plan early for next year's grain erop. Farmers with good grain of a Farmers who are in a position variety which gives high production Fockler

them big dividends. There are sever- Farmers who have been growing a al reasons for this. It produces the variety of grain with low yielding

Farmers using their own seed substantial differentials between each should clean and grade it thoroughly before seeding. Where farmers are fortunate enough to have a cleaning plant in their district, they may get their grain cleaned for a nominal fee. Those who have not the advantage of a cleaning mill can procure good seed by using a hand grain cleaner to remove weed seeds and light kernels. Many farmers neglect to clean their seed because of the work entailed, but clean grain is absolutely necessary in order to produce profitable crops. While a good seedbed, a fertile soil and good growing conditions are all necessary in order to secure high grain yields, it is equally important to use well cleaned seed of a variety with inherent high yielding ability.

THE PROPER CARE OF YOUR AUTOMOBILE Two Methods of Polishing

IT has been told how the color and, ened and wrung "dry." The wax lustre of your automobile can be restored by the use of a properly formulated polish. There are two accepted methods of polishing, the should be put on sparingly, rubbing it into small sections (not more than two or three square feet) at a time. Then the wax is one by using a combination cleaner rubbed up to a bright lustre with and polish of the liquid type, and a clean dry cloth. the other by using a cleaner and

While the use of the liquid polish is less work, and will restore the lustre to your car in one operation, it doesn't last long and won't prevent further weathering.

ed off with a mild abrasive polish of soft cloth which has been damp- long time.

Wax, like window glass, has the

ability to filter out the ultra-violet rays of the sun. When you wax your car, you apply a thin transparent film over the entire surface which, in addition to improving its The second method involves two operations, and while harder work, will preserve the finish for months. The traffic film must first be cleaned off with a mild abrasive polish

or cleaner. When the finish is If given this attention a car will thoroughly dry and clean, the retain its good looks for years, and polishing wax is applied with a ball its finish will last a remarkably

Here and There

Canadian Pacific liner Empress of Britain, flagship of the fleets of the company, sails January 10 from New York on its fourth round-the-world cruise, visiting 32 ports in 130 days. Return to New York is scheduled for May 20, 1935. More than 31,000 miles will be covered by the ship on this cruise. This is Canadian Pacific's twelfth annual world cruise.

Four years old and still breaking records, the 26,000-ton Empress of Japan, newest and biggest of the Canadian Pacific Steamships Pacific fleet, made the run, Honolulu to Yokohama in six days, 16 hours, 53 minutes, putting the ship in possession of speed supremacy for all legs of the Pacific crossing.

R. Cornthwaite, fireman, Canadian Pacific Railway, Engineer James Y. Ross and Yardman, J. Brophy, Port Arthur, aboard yard engine "6608" pulling 150 empty cars from Port Arthur to Fort William, saw a woman lay her head on the rails just ahead of the engine. Cornthwaite leapt through the cab window and from the front floor board jumped just in time to drag the woman clear of the track,

Miss Georgia Englehart, slim girl Alpinist of New York, this summer climbed Mount Assiniboine, highest peak in the Canadian Rockies, and in doing so completed her 100th ascent in the Banff-Lake Louise area. Two years ago she set a new woman's endurance championship by scaling 38 peaks in a single summer in that section. Low winter fares good from De-

cember 15 to February 28 are being offered by the railways covering round trips to Canada's Evergreen Playground, that favored region in British Columbia called Vancouver Island, with the beautiful capital of the province, Victoria, and all the sports attractions of summer available during the winter months brought within the purse limits of the average Canadian,

The big event of 1935 will be the pageantry and picturesque functions of the 25th anniversary of King George's accession to the throne, set for May 6 next, which will continue until well into July. Summer sailings of Canadian Pacific liners have been planned to connect with these events.

The Laurentians, Eastern Canada's winter playground, face the biggest season in their history with an ambitious programme of ski events calling for 19 meets of various kinds, not counting the Dominion and international intercollegiate championships extending from January 1 to April 21, it is announced by the Laurentian Zone committee of the Canadian Amateur Ski Association.

Recommendation of immediate implementation of the Beatty Commission's report for professional ranks of the Civil Service of Cauada was unanimously concurred in at a business session of the Professional Institute of the Civil Service held recently at Ottawa.

TENDERS FOR WOOD

Tenders will be received on and up to January 15, 1935 for the purchase of 24 single cords of 16" hardwood (beach and maple) delivered and piled at the school, S.S. No. 10, (Bloomington) The lowest or any tender not necessarily accepted. Address tenders to:

Percy Brown, Secretary, Stouffville, R.R. 2

Layers Need a Real Home

While there are many factors that enter into the management of the poultry flock, there ... is nothing that will have greater influence on the poultry raiser's success or failure than the way in which he houses his flock. Birds of good breeding, no matter how well fed, will not return maximum profits unless well housed. The poultry house is the hen's home, and to be comfortable and give good production, the house should have proper ventilation, insulation and sanitation; it should have a proper location, plenty of light, be dry, and have ample floor space.

New Body Lines and More Room in 1935 Ford V-8

Markham Phone 120

THE largest and roomiest cars Ford has ever built, with new body lines of advanced streamline design. are illustrated above in this Ford V-8 de luxe Tudor sedan for 1935. Sedans seat six passengers in comfort. Luxurious appointments are new. The eleven body types are all finished in new baked enamel which is said to need only washing to restore its high lustre. Cars are approximately eight inches longer from bumper to bumper and seats are wider. Chassis improvements, including moving the engine forward more than eight inches and new spring suspension, add to riding comfort, especially of rear seat passengers. Directed-flow crankcase ventilation is an improvement of the 90 horsepower V-8 engine.
