

## ACROSS CANADA

Charlottetown, Prince Edward Island.—Although its production of creamery butter in 1934 amounted to only 658 boxes, Prince Edward Island held the unique distinction of turning out 100 per cent "firsts." Cheese also graded high, with an output of 3,096 boxes of which 98.45 per cent were firsts.

Halifax, Nova Scotia.—The creameries of Nova Scotia are capable of turning out twice the present amount of butter, if supplies of cream were forthcoming. Mr. W. J. Bird, Dairy Superintendent of Nova Scotia, reports. There are great opportunities for development in the province, he adds.

Kentville, Nova Scotia.—It is anticipated that a party from overseas composed of buyers and importers of Nova Scotia and Canadian fruit generally, will make a trip to Canada in the fall leaving England about September 14th next. It is the intention of the party to visit Toronto first, then come to St. John, N.B., cross the Bay of Fundy to Digby, then on to Kentville where the members will spend a few days at the Cornwallis Inn.

Saint John, New Brunswick.—The New Brunswick Record of Performance Society forwarded a shipment of 24 Barred Rock pullets and cockerels to the Department of Agriculture, Trinidad recently. The assortment was collected through the co-operation of the Dominion Livestock tested by the Provincial Department of Agriculture. The birds will be used as foundation stock in the West Indies.

Fredericton, New Brunswick.—Shipments of potatoes to Cuba this season are almost double in volume those of the previous season, the estimate of Mr. C. H. Godwin, of the Dominion Seed Potato Inspection Service, being 209,000 bushels this season as compared with 119,000 bushels last season.

Quebec, Quebec.—A campaign to bring the membership up to 2,000 was decided upon at the recent meeting of the Council of the Quebec Chamber of Commerce.

Montreal, Quebec.—The travelling "lecture caravan" of the Canadian Forestry Association gave instruction to 122,500 people in rural settlements throughout Canada during the past year, according to the annual report. In addition to the media of moving pictures other methods of public instruction included the co-operation of thousands of rural schools and the organization of six thousand junior forest wardens by which the national cause of forest protection and the conserving of the game and fish was greatly advanced.

Ottawa.—In the mining industry, \$17,460,000 was added to the value of Canada's gold production in 1934, due to the average price for this precious metal increasing, from \$28.60 a fine ounce in 1933 to \$34.49 in 1934.

Toronto, Ontario.—Ontario mines produced \$70,063,046 in gold in 1934, compared with \$47,872,532, in 1933, an increase of 46 per cent. The increase was partly due to the higher average price for gold received in 1934. The number of tons milled last year by gold mines was 6,375,867 compared with 5,607,395 tons in 1933. The figures supplied by the Ontario Department of Mines are all in Canadian funds. December output was \$6,056,308 compared with \$3,741,464, in the same month of 1933.

Port Arthur, Ontario.—A total of 6,800 claims were staked in the Port Arthur mining division during 1934 which is a record for the local office. This represents a total of approximately \$102,000 in registration fees for the local office.

Winnipeg, Manitoba.—For the first time in its history the Canadian Fruit and Vegetable Jobbers' Association will hold their convention in Winnipeg. This is the 10th annual convention of this body and delegates from all over Canada have signified their intention of attending.

Brandon, Manitoba.—The Manitoba Provincial Exhibition will be held in Brandon this year, from the first of July to the fifth, it was decided at the recent meeting of "Class A" fairs in Winnipeg.

Regina, Saskatchewan.—A distinct increase in horse-breeding activities last year over 1933 is reported by the Dominion Department of Agriculture. Horse breeders' clubs in the Prairie Provinces numbered 166, an increase of 32 per cent over 1933. The census of horses during the mid-year showed 2,933,400. Shipments of Clydesdales and Percheron geldings were made to the United Kingdom during the year. Also a carload of pure bred hunter type sires went to the Barbados for constabulary work. A demand is reported developing in Australia for Clydesdales and Percherons from Canada for breeding purposes, and negotiations are under way with China for shipping 500 head of unbroken western range horses.

Saskatoon, Sask.—Regal, the new smooth-awned barley put out by the University of Saskatchewan is becoming popular as a general-purpose barley, according to Dr. J. B. Harrington, Field Husbandry Department, University of Saskatchewan.

## TELEVISION

**Cannot Be Made Popular In U.S. Without Sacrifice Of Many Sound Programs.**

Pasadena, Cal.—Crowding of the wave bands by the present sound broadcasts, and not technical difficulties, was blamed by Prof. S. S. Mackeown of the California Institute of Technology for the fact that this country is lagging behind England in television.

Professor Mackeown, electrical authority, said radio listeners could have television today, provided they sacrificed their sound programs at the rate of 100 for each television broadcast.

## NEW WORLD WAR WITHIN 4 YEARS

New York.—H. G. Wells, British author and historian, said recently that in the last eleven months the world has been heading for "a new and more horrible world war which will come by 1940."

Arriving here from England, he termed England's storied prosperity "greatly exaggerated."  
"There is tremendous unemployment in England," he said. "England's prosperity has been greatly exaggerated. It is a false prosperity and there may be a crash at any time. It is an Indian summer sort of thing. It looks like summer, but it isn't."

Asked if there is a new Liberal movement and a "resurrection" of Lloyd George under way, he replied: "There's no resurrection of Lloyd George. He just bobbed up." He would not comment on Huey Long except to say: "I hope to meet that great man."

"Do you really believe he is a great man?" he was asked. "Unquestionably," Wells smiled, then added enigmatically, "but would you mind putting a query after that?"

Wells laughed heartily when asked if he didn't think Lloyd George is the "Huey Long of England." He started to say something, but checked himself and replied: "Not quite!"

## Mounties in Manitoba Taking On 25 New Men

Winnipeg.—Twenty-five men will be added to the Royal Canadian Mounted Police force in Manitoba on May 1, it is announced. Development in northern mining areas has opened new territory the present force cannot cover.

## PREVENT DISEASE

REGINALD H. WIGGINS, M.D., C.M., L.M.C.C.

We spend over fifty times as much on the cure of disease as we do on its prevention. If this ratio were reversed, we would go a fair way towards eradicating disease. To prevent disease is to forestall the necessity and greater expense of a cure.

We know that of twenty-four million school children in the United States, two-thirds, or 65%, have dental decay; one-third have diseased tonsils and nasal obstruction from overgrown adenoids; another third, on eight million are suffering from eye strain and defects in vision; five million are undernourished and the same number are suffering from nervous disorders; a million with spinal curvature; another million with defective hearing; half a million with the Great White Plague, and a third of a million with heart disease. The figures in Canada would be relatively as large, if they were recognized and reported.

All the pills and potions in the world cannot right this terrific calamity, this blight, but they could all have been very largely prevented.

Defective and decayed teeth could have been prevented by proper diet and cod-liver oil for the mother before the child was born and for the child after birth, and proper mouth hygiene; two-thirds of the cases of diseased tonsils and enlarged adenoids could have been eradicated by surgical treatment; the defects of vision could have been greatly checked by proper lighting in home and school, etc., etc.

Next week's article: "More on Prevention."

## Extra Inches Spoil the Line

**Keep your Figure from becoming "Outsize"**

When a woman begins to lose her figure, she frequently gets her first hint of it in the dress department. The assistant tactfully says, "I'll have to let it out a little here, Madam." A month or two later it probably means "putting in extra fullness."  
If extra inches are threatening your girlish lines, you can profit by the experience of the woman who wrote the following:—"I am now 40 years of age, when many women find flesh forming round the hips and thighs and on the back of the neck. I have avoided all that since taking Kruschen Salts, and feel quite graceful and youthful, and so fresh in the mornings. Kruschen really is wonderful."—(Mrs.) K.U. Kruschen is an ideally-balanced blend of various mineral salts. It assists the internal organs to perform their functions properly—to throw off each day those waste products and poisons which, if allowed to accumulate, are apt to give rise to various ailments.

Get a bottle of Kruschen Salts (45c or 75c) from any Drug Store, and take a half-a-teaspoonful in a tumbler of hot water every morning.

## PROTECTION PROVIDED FOR SCHOOL CHILDREN

Birch Cliff.—The Hon. David A. Croll, Minister of Welfare and Municipal Affairs, has approved Scarborough Township's program, which includes traffic service for the protection of school children going and returning from school. For some time members of the council and parents have been up in arms for the protection of children, especially those who are forced to cross the railway tracks like those main lines on Kennedy road near Scarborough Junction School. The Minister has announced that relief recipients stationed at dangerous highway and railway crossings will help to save young lives and for the work the unemployed will receive cash at the prevailing township rate. He also announces the approval of the \$8,200 works program of Scarborough and seven other municipalities.

## Sterling Products Limited Will Increase Advertising

Windsor, Ontario.—Definite improvement in business was reported at the Annual Meeting of Sterling Products (Limited) recently held in Windsor. An increase in advertising expenditures for the year was approved and the following officers were elected: H. L. Schade, president; H. L. Kinnunen, vice-president; H. C. Eastman, secretary-treasurer.

Commenting on the business outlook for the remainder of 1935, Mr. Schade said that he looked for continued improvement.

The Sterling Company distributes well-known drug products including Dr. Lyon's Tooth Powder, Watkins' Multifid Coconut Shampoo Oil, Glostora, Del-A-Tone, Aspirin, Phillips' Milk of Magnesia, Phillips' Dental Magnesia, Midol, Cascarets, California Syrup of Figs, Danderine, Pape's Diapiesin, Pape's Cold Compound, No-To-Bac, Diamond Dyes and Diamond Tints.

## Small Towners Have Most Culture

The best of American home-life and culture is to be found in its smaller towns according to recent

statistics. Small town people are more intelligent, sincere, home loving and have more appreciation for the arts. "Small town women are real, earnest, sound and wise," says Mr. H. E. Blood, who made the survey.

Cattle exported from Canada to Great Britain in 1935, from January 1 to February 21, numbered 4,781.

**A Law Every Mother Should Know and Observe**

Never Give Your Child An Unknown Remedy without Asking Your Doctor First

According to any doctor you ask, the only safe way is never to give your child a remedy you don't know all about, without asking him first.

When it comes to "milk of magnesia," that you know everywhere, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—always say Phillips' when you buy. And, for your own peace of mind, see that your child gets this; the finest men know: Made in Canada.

**Safety for You and Yours**

You can assist others by refusing to accept a substitute for the genuine Phillips' Milk of Magnesia. Do this in the interest of yourself and your children and in the interest of the public in general.

**PHILLIPS' Milk of Magnesia**

Will Tend to Affect Population if Reduction Continues.

**Gardening**  
By Gordon L. Smith

**ARTICLE NO. 5.**

**STARTING SEED INDOORS.**  
If the seed is started indoors, from two to three weeks can be saved with many flowers and vegetables. In districts where the growing season is rather short, certain things must be grown in this way. If bloom or maturity is to be guaranteed. Among the flowers are pansies, asters, marigolds, zinnias, petunias, cosmos, larkspur, stocks and snapdragon, though with the possible exception of the petunia and aster, good results can also be secured in the warmer sections of the Dominion from seed sown in the open ground. With vegetables there are peppers, tomatoes, cabbage, cauliflower, egg plants, brussell's sprouts, broccoli, celery and head lettuce. Naturally, when sown under glass in March, and set out as well started plants in May, such things are away ahead of seed sown in the open ground after the spring frosts are over.

**ADD NEW THINGS**  
Much of the interest in flower gardening lies in trying something new.

**Catarrhal Deafness May Be Overcome**  
If you have catarrhal deafness or head noises go to your druggist and get 1 oz. of Parmitin (double strength) and add to it ¼ pint of hot water and a little sugar. Take 1 tablespoonful four times a day.

This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the nose stop dripping into the throat. It is easy to prepare, costs little and is pleasant to take. Anyone who has catarrhal deafness or head noises should give this prescription a trial.

**SKIN BLEMISHES Vanish Before Physician's Prescription**

—Why let them go on tormenting you? Like millions of others have done, you can get rid of your skin trouble through the work of a great physician—Dr. D. D. Dennis. Dr. Dennis' prescription—known in many countries as D.D.D. and now manufactured by Campana's Italian Balm chemists—will bring you relief at once, and quickly restore your skin to health. All druggists sell D.D.D. Trial size, 35c. Guaranteed to give instant relief or money refunded.
