could not like.

"Why do you do it?"

"Because I have to."

RYNOPSIS

Joan Denby of humble origin, is in-troduced as a social equal of Miss Georgina La Fontaine, rather than as persuaded him to come to Matta. her secretary. She meets Piers Hannen, here are only goats in the streets millionaire, who forces his attentions on her. Lord Edwards proposes to

"In this case, Mr. Hannen, you'll shaken up now, though, after our have to be. Do you know that I've only met you twice."

"What of it? Meet me some like that sort of man - a gentle more?"

"I'll never change my mind. Oh, please-this is so absurd! Haven't so he led me to believe. Poor Blagh. I hurt your feelings enough with It happens to all of us!". what I've said about you, for you to know-?"

"That Joan who haunts my dreams, who robs me of my appetite, who has the loveliest, in fact the only face in grateful to Georgie, she's such the world-detests me! What a dear." situation! It's dashed funny when you came to think of it!"

But he didn't laugh. He just looked at her in whimsical exasperation but impoverished line?" as though he could not understand what had happened to him.

the fact, she thought, and go! She was sorry - but there wasn't a chance for him so far as she was the fire. concerned.

"We'll drop the subject," he said suddenly, but added coolly: "For the present! What are you doing to-night?"

"Whatever I am doing," said Joan gently, "I want you to understand that I shan't be doing it with you!"

He asked soberly:

"Is there anyone else?" ... "No," Joan was forced to admit and his gravity vanished. "Dine and go to a theatre with

wants me." "Georgina can hang herself! Or does that sound too inconsiderate?" having things your own way."

"Mr. Hannen, I do assure you that it's quite useless! I can't go ing at the clock, he asked. "What out with you!".

she flushed with annoyance at the on it." grim certainty of this statement he moved away to the fireplace again. said. "And get some of that sleep

He did not seem to intend to go; in fact he began to talk casually about this and that as though their previous conversation had never taken place.

"Aren't you cold over there?" he said. "Come to the fire!"

And when she came he said: "Since you won't look after my comfort, I'll have to look after

He stood waiting for her to sit down in one of the easy chairs by the fire. When she had done so he sat down himself, facing her, lighted a cigarette, and talked about Malta.

TO ALWAYS GET FAST PAIN RELIEF

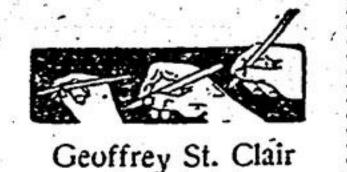

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold" . . . eases even a bad headache, neuritis or rheumatic pain almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

THE SILVER JUBILEE

New York Times Reviews

The Reigns Of Europe's

Monarchs

Most of the published descriptions of King George's "Silver Jubilee" have stressed first the continuing loyalty, throughout the twenty-five past years, of the British people to their sovereign, then the period's great changes in the world's history and in the British Empire. It has certainly been an eventful quartercentury; yet it may be doubted whether any reign of equal or greater length in Europe will not have witnessed similarly impressive, often equally momentous, vicissitudes of history. Accustomed as we in America are to a Chief Magistrate's tenure cf four or at most eight years - a period usually too short for thoroughgoing political or social changes to come about-we are not in the habit of associating them with one ruler's official tenure. Lincoln's term and Wilson's perhaps come nearest to presenting such a picture, but twenty-five years, especially when they have included such an episode as the World War, will necessarily serve better to portray a changing

King George's reign has not been long when compared with that of numerous previous sovereigns, in England and on the Continent. Queen Victoria's sixty-four years on the throne, from 1837 to 1901, far overtops it; the famous "Diamond Jubilee' of 1897 celebrated the sixtieth anniversary of the Queen's accession. The removal of moisture is a major | Elizabeth reigned forty-five years. problem in poultry houses. Poultry George III occupied the British throne for sixty, Louis XIV of France for seventy-two; there were other European sovereigns who governed during nearly or quite half skin. It was found at one experiment- a century. With all of them, the reign was a landmark for momentous changes in the history of their country, often of the world.

We speak habitually of the "Victorian era," forgetting perhaps that ature at 50 degrees F. is too high to the England at the beginning of that He stopped the train about 100 yards ed, but failure has commonly result- of the country in the world. Into beyond the station. The driver was ed when temperatures were allowed Elizabeth's long reign were crowded not able to reverse his train as a to go too high or to fluctuate wide- the firm establishment of Protestantism in England, the Huguenot wars on the Continent, the great voyages of discovery, the rise, from obscure things because we have reasons for beginnings, of an English literature them, but we find reasons for them in some respect unequaled since that because we want to do them."-Will day, the defeat of the Spanish Armada and the achieving of predominance for England in European af-

> For its lights and shades, the long reign of Louis XIV stands almost by itself. When the old King died at the age of 77, he had seen as ruler of France the creation of the most brilliant court and literature in French history; something like French hegemony over the rest of Continental Europe, a series of brilliant victories by his generals, followed in the end by a series of disastrous defeats in the Marlborough campaigns and the relegation of France to a secondary place. Abroad, he had witnessed the rise of the Dutch Republic, the meteoric career of Charles XII of Sweden, the struggle between British Parliament and Crown, the protectorate of Cromwell, the restoration of the Stuarts and the English revolution of 1689, down to the establishment of the Hanoverian dynasty. It was little wonder that Voltaire should have named his history of the period "Siecle de Louis Quatorze." Whether he wrote in it of France or of other countries, every reader understood the appropriateness of the title.

> George V's twenty-fiive-year reign will necessarily be associated with the war and with the economic and political disintegration which ensued. It can hardly be said that the period has rounded out an episode in history as did the reigns of Elizabeth, of Louis, or of George III. For that, history is still too much visibly in the making. What the Jubilee celebration brings most forcibly to mind is the extent to which England and the Empire have stood foursquare during the chapter of political confusion. In this rapidly changing era, the ovation by England to its King is at least a symbol of the power with which British institutions and the British. Constitution have been able to resist the tendencies of the time.

> CARE OF THE FARROWING SOW

A little extra care at farrowing will often save a greater percentage of the litter. Include some bran in the meal ration to prevent a ferverish condition. A week or ten days befire farrowing place the sow in a farrowing pen that is dry, clean and free from draughts, Bed the pen with short straw. Keep a watchful eye on the sow at farrowing time but do not disturb or assist her unless absolutely necessary. Provide a warm bran lop for the sow a few hours after farrowing.
