### What The Tourist Wants

Some tourist attractions are permanent, others occasional. Tourists just have to be reasonable about it and discover what is what and when. They may sit on the verandah of almost any large hotel in India any day and see the mango tree trick done; but they will never see the rope trick performed unless they are quite a shade less than strictly sober, and probably not then. Moreover, they may roam the

# Serve the Best Tea

A WEEKLY TONIC by Dr. M. M. Lappin

A WIDOW'S DILEMMA

My heart always goes out to woman who is bereft of her husband and is left with the task of bringing of EVERYDAY LIVING should be adup young children alone. The gallantry with which some women have faced such a task, and the success they to, Ontario. Enclose a (3c) stamped, have made of it, can only invoke one's admiration. I have a letter this week from a widow who is in a dilemma. Let me quote a part of her letter:

"My husband died nine years ago "OSSING on a few shovelsful" is and left me with two children — a the common way of refueling a girl and a boy. My boy is now cevenof me, but something seems to have anxious about her future. If I remonstrate with her she tells me I am too old fashioned. I have a strong suspicion that some of those she runs around with are too fond of drink. I am really worried. Can you help me in my diemma?"

This letter is obviously from a woman who sincerely desires the best for her daughter, and to that end she has tried to do her best. Of course she is facing a situation that many mothers have to face, but I sometimes wonder if, in such circumthe contact of the fresh coal with the I appreciate the feelings of a mother hot coal, and will cause them to in a case like this and I think I can quite understand her problem. There Next remove the ashes from the is a tendency for the world to take ashpit, and reset the dampers. The more notice of a young woman's misconduct than it does of a young man's then she would have so withered him sible; the Check Damper should be misconduct. Somehow we seem to as-I would have nothing else to wish for! with her scorn and disgust that she closed; the Ashpit Damper should sociate the sowing of wild oats with would have disposed of him for ever. be open. It is also advisable to open young men and look for that sort of Men with money and power in their the slide in the fire-door slightly - thing in them. I do not know why we about the width of a wooden match should do that, but do it, and the (2) fact that we do is apt, perhaps, to make mothers a little bit more sensitive regarding the conduct of their daughters.

A young women, like the one concerned here needs to be handled carefully. To adopt an unsympathetic and scolding attitude toward her may Darwin, Northern Australia. - A do more to drive her along the wrong Lancashire woman has just made path than anything else. ### **Explore New Guinea** With Airplanes

(Contributed by British Aircraft Society).

London-Three British airplanes will begin in New Guinea towards the end of this month an exploration of 25,000,000 acres of the Dutchowned western section of the island, which is probably the largest unknown area in the modern world. The aircraft will leave England on a flight, scheduled to take 14 days, to Java, whence they will proceed immediately for New Guinea, where landing grounds and camps have been established.

The belief that oil and gold deposits of vast extent may exist in Netherlands New Guinea is the mainspring of the enterprise. At present the only known feature of the district to be surveyed is the general course of the large rivers. Aerial photography will thor of several works. He is willing data for the compilation of accurto deal with your problems and give ate maps which will provide indication of sites were oil and precious mineral deposits may be found. The maps will also provide information dressed to: Dr. M. M. Lappin, Room of great vale to government and to 421, 73 Adelaide Street, West, Toron- the development of forestry and agriculture. Detailed study of the maps and photographs will enable the forestry expert to trace groups of useful trees, especially those Agriculturists will look for old lake beds and plateaux which may be suitable for intensive development. At the same time, the expedition will assemble a mass of general information about the country, including the distribution of population and the best tracks by which the native villages and settlements can be reach-

In all, fifty men will take part in the expedition under the leadership of Mr. R. N. de Ruyter van Steveninck, half of them Euroreans and half natives. Each camp has a hospital, stores, workshops, laboratories for the photography and survey work and a radio station. Two radio stations are being erected at a distance of 100 miles from the main base; they will be used to provide the essential dayby-day information, about weather conditions. The expedition will be away 18 months.

The three Dragon-Rapide biplanes have been specially equipped for the work. Each carries a vertical electrically-operated camera, which is housed below the normal floor level and can be used over a very wide angle with uninterrupted view. Two auxiliary fuel tanks, each of 30-gallons capacity, are located centrally in the cabin. They are covered for use as tables. A glasscovered aperture in the floor is fitted for use with a new kind of driftsight instrument; exact determination of drift is of paramout importance in aerial photography to ensure accuracy of subsequent mapping. Full "blind" flying equipment and transmitting and receiving radio apparatus are included in the navigtional gear. The two Gipsy-Six 200 h.p. air-cooled motors drive metal

Leading the formation of three airplanes on its flight to Java will be Mr. G. M. Cox, who has been flying for 20 years and is now with the de Havilland School of Flying. The other pilots-in-charge will be Flying Officer E. Fulford, also of the de Havilland School, and Captain Koppen, a well known Dutch aviator who first flew in 1914.

# Trees On Farms

Observes the Brussels Post: There is a Perth County farmer who some years ago started planting trees in a ravine on his property. He said he knew it would never be possible to cultivate the land and he wanted the trees there for two purposes. first may seem simple—he liked trees and then he was certain the bush would be a good place for pasturing the cattle in hot weather: . 5

The trees are such as are found in ordinary woodlot, but there are a number of spruce and pine as well. The spot today is a place of beauty. That is not all. Last winter he took out eight cords of wood, and the stuff he removed was surplus growth i or broken! down trees. He says it looks better now that the eight cords of wood were removed. To look at the place today one would think trees had never been removed from it.

It is much easier to get young trees today than it used to be, and there are plenty of farms where there is a piece of land which might well be put to growing trees. The people on the land today may get the benefit the land today may not get the benefit but the next generation will.

## To Eliminate Crossing

Five localities in the Ottawa district will benefit by an expenditure of \$112,150 in public works as part of the first allocations of the \$1,000,-000 fund provided for the Railway Grade Crossing Fund in a special vote to provide public works in respect to grade crossings. The largest of the amounts approved by order-in-council goes to Morrisburg in authorized expenditure of \$105,000 for elimination of the C.N.R. Grade crossing in that municipality. Other municipalities to benefit include Arnprior, Carleton Place, Franktown, and Jasper Road near Smith Falls.

"YOU CAN'T BAKE GOOD CAKE WITH INFERIOR BAKING POWDER. I INSIST ON MAGIC. LESS THAN 1¢ WORTH MAKES A BIG CAKE," says MADAME R. LACROIX, Assistant Director of the Provincial School of Domestic Science; Montreal.

DON'T RISK BAKING FAILURES . . . .
