Discussing doubts expressed by

the Ottawa Department of Agricul-

Dominion reports indicate a stock

of potatoes in Canada of 11,447,000

owt. as atApril 1, he stated. From

this amount, farmers obtain their

supply of seed for the 1936 crop, as

well as the supply for table use.

Continuing his argument, he states:

in 1935 was 506,800 acres. Ten cwt.

per acre are required for seed,

which means 5.068,00 cwt. are

necessary for this purpose. This

leaves for table consumption in

Canada and for export 6,379,000

"Since April 1 exports to the

United States have amounted to

75,000 cwt. This leaves a supply, in

no more are exported, of approxim-

ately 6,300,000 cwt for table con-

"It is estimated that the annual

per capita consuption in Canada is

3 cwt., which, with a population 'of

10,949,000, necessitates 32,847,000

cwt. for table use yearly. On this

basis we shall require for three

months approximately 8,211,500

cwt. of potatoes. This means

shortage of approximately 1,832,000

cwt. exists at the present time.

The Toronto Star says the Hep-

"numerous opportunities to Con-

servative critics for condemning its

liquor policies." But those oppor-

tunities are open to Liberals as well

as Conservatives-The Star and The

to have been in existence for some

within their power to bring effective

influence to bear upon the Govern-

ment to clean. up the conditions

which The Star so feebly deplores.

Criticism from Conservative quart-

ers has been open to the suspicion of

being offered for the purpose of

embarrassing the Government, bu

vigorous, constructive criticism from

leading Liberal papers would be

above such suspicion; and would go
