According to latest statistics there are 1700 wells in the Township of Markham, but the authority doesn't say how many of them are dry at the present time. The subdivisions near Yonge street account for about 400 wells, while the remainder of the 1700 are to be found mostly on farms. At the present time men from the Department of Mines are making a survey of the Township of Whitchurch ascertaining the depth of wells, their location and other information of value to the Department at Ottawa.

Mrs. Elizabeth Nicholson living opposite the Presbyterian church on Main street, is finding the drought not so bad for her garden which is low lying. Sunflowers shown the Tribune this week measured nearly ten inches across which is a good growth for such a year as we are experiencing, having no rain all summer that would penetrate the ground more than a couple of inches and only one shower capable of doing that much. The garden at the rear of Mrs. Nicholson's home was at one time regarded as impossible of cultivation, and many of our residents will remember when that district was nothing more than swamp land, lying under water much of the year. Since it has been built on, and garden cultivated the locality stands out in such a year as this as among the best in town.

Preserving Time

The kind of Utensil used for doing down preserves has a great deal to do with properly preserving the flavor of the fruit or pickles. Be particular about the utensils you buy and avoid the common cheap goods produced to attract buyers at a price.

We are showing a line of heavy preserving utensils which we guarantee for long service—and to be the proper metals to preserve flavors and save fuel in the preserving process.

Our prices are attractive regardless of the high quality of our goods.

Low-priced CHEVROLET-Maple Leaf Truck SETS NEW PERFORMANCE-ECONOMY RECORD

1246 Miles at a record low cost of \$27.68

- GASOLINE—12 miles per gallon average.
- OIL—1 pint in 1246 miles.
- FUEL COST—only one-third of a cent per ton mile.
- WATER—1 1/2 pints used during entire trip.
- REPAIRS—No money expended on repairs or adjustments.

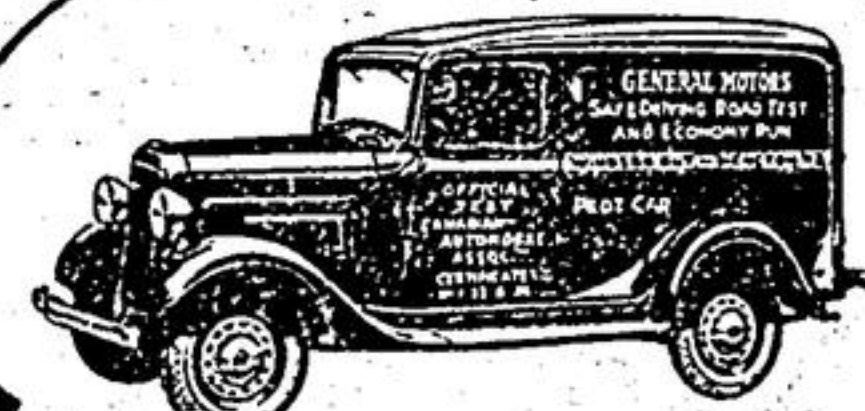

For Economical Transportation

All facts and figures quoted for the Economy Test truck are certified by the CANADIAN AUTOMOBILE ASSOCIATION. As a result of the test official C. A. A. Certificate No. 1-22-36 has been awarded.

Hauling 20,000 pounds certified gross weight 1246 miles from Windsor, Ont., to Moncton, N.B., this big Chevrolet-Maple Leaf 2 1/2-ton truck recently established a Canadian record for Economy, Safety and Stamina. The long, hard test was made under typical road and weather conditions. The total operating cost amounted to \$27.68, or one-third of a cent per ton mile!

For operators handling 5- to 7-ton payloads, this Chevrolet-Maple Leaf model equipped with Truxmore third axle provides a combination which, by slashing expenses, materially adds to your profits. As a result of the trail-blazing experiment made under practical, workaday conditions, we have been provided with a fund of useful information. Individual and fleet owners are invited to share this with us. Can you spare a few moments to visit our showrooms today?

Chevrolet 1/2-ton Panel Truck

Here is the Chevrolet 1/2-ton truck which accompanied the Chevrolet-Maple Leaf Economy Test Truck as "Pilot Car." Carefully kept performance records of this truck indicate gasoline mileage, 19.05 miles per gallon; oil consumption, nil; water added, nil; repairs and adjustments, nil.
