RINGWOOD
Albert Hoover is erecting a new double garage.
Mr. W. Jacob, of Toronto is visiting his son Walter for a few days.
The church was well filled on Sunday evening at the Harvest Home service.
Ross Lee of New York, and Mrs. John Lee of Stouffville were Wednesday visitors at Roy Grove's.

We welcome the newly married couple, Councillor and Mrs. Abner Summerfeldt (nee Gertrude Fisher) to our village. The chivviri band gave them some select tunes on Tuesday.
If you care to add my observations to your Ringwood news, the old boys, like myself will know what I'm talking about. I was impressed by a big mattress adv in a daily paper the other day, and it started me thinking about the old days around Ringwood and there never was a better place to sleep than in my own home on a straw tick when I was a lad. This city mattress was advertised as "The greatest place to sleep which has ever been devised. Makes a man feel sorry for those in . . . other years who have had to sleep on anything else."

He said a good deal more. Truth is we think he said too much. There have been good mattresses made before the one of which he speaks. Some folk have found comfort and rest in a feather bed—not a bad thing on a cold night.

But he has overlooked something else. On the farm they used to fill the tick with new straw now and then. Ah! There was the place to sleep. On the first night on a new-filled tick the bed was a formidable looking thing, it bulged and it rounded. At first glance it looked as though no person could possibly stay on the thing because the chance of sliding off was too great. Then it was necessary to do a little jumping on the straw tick to make sure of a place for the night. The folk down stairs used to call up through the stove-pipe hole in the floor to ask what all the noise was about, although they must have known in advance there was to be noise. But finally two lads could always knock the straw tick into a state of submission. There came a sort of little hole into which one could fit well and with comfort. There was a clean smell about the straw and sleep was sweet. As days went on the tick became flatter. Finally it became too flat, and the straw was dumped and the process started all over again.

Perhaps the man who is advertising his new mattress never slept on a straw tick and perhaps he never had to make an effort to conquer the bulking thing on the first night. If so he never had the satisfaction of having established himself on his own ingenuity and effort; the smell of clean straw was never in his nostrils as he drifted off in a great night's rest. That being the case, he cannot very well pose as an authority on the finest place in the world to sleep.

BALLANTRAE
Mrs. Herb. Kirby and Dave were visiting friends here on Sunday. The Kirby's are living in Markham village where David is employed on the Economist.
Mr. and Mrs. Thos. Webb, of Pontypool have been visiting at the home of Henry Jakeman.
While the fall potato crop is generally a fair yield, some failures are reported particularly where the late crop was too far advanced at the time of the heat and drought. Thus one Ballantrae farmer harvested only 40 bags from two acres, while another of our farmers picked 75 bags of one acre.
George Davies, proprietor of the big dance hall, on the north shore, has purchased Underwood's property adjoining his to the west, and will extend the shore line, and improve boating facilities. Men are now engaged in the work, all of which will improve the north side still more. George Davies is a pusher, and has put us on the map.

44,000 BABY CHICKS
In renewing his subscription to the Tribune the other day H. G. Michell of Pickering Township gave us the production figures of his chick hatchery for last year, which are amazing. Mr. Mitchell's hatchery produced 44,000 baby chicks, Barred Rocks and White Leghorns, and had ready sale for all he put on the market. This summer he is enlarging the hatchery in anticipation of a still larger patronage, which is chiefly local business. This extensive poultry farm placed a layer in the R.O.P. contest this year, and "biddie" produced 307 eggs in the year. Last year Mr. Mitchell's fancy layer produced 312 eggs.
