JUDAS HAS A HARD NAME

There was an account of a young people's meeting in one of our exchanges a few days ago and the speaker of the evening had taken Judas as an example not to be followed. The speaker could find nothing good about Judas. He was the modern double-crosser; when people used the word traitor it was Judas to whom they referred; par- ago. ents do not give their sons the name of Judas, and so on.

Reading the abbreviated report we take it the speaker did not think much of Judas, and the world seems to share that opinion. Great painters show him as an unlovely person; some of them make him Horses, T.B. Tested Cattle, Imple- look decidedly mean. Truth is no per son seems to have much of an opinion of Judas.

There is this to be said in memory of the much-abused man-he repented for that which he had done. He took back the money which had been paid to betray his Master. "He cast down the pieces of silver in the temple and departed, and went and hanged himself." We hold no particuar brief for Judas, and perhaps it makes no great difference to him what people of 1936 think or say of him, but in plain justice to the man we believe too many people leave him in the act of betrayal and fall to notice what he did afterward. As the enormity of the thing he had done grew upon him he went and hanged himself. He should at least be credited with having paid the Sweet Potatoes, 3 lbs. 10c price for the betrayal as far as he was concerned.
