We are indebted to Henry Hoover of Markham who brought in to The Tribune a Russian squash grown from seed brought direct from Russia about seven years ago. The squash has grown along the lines of the ancient Mohammedan temple or mosque, with the lower half exposed out over the top story. As if tending out over the top story, it is done in gorgeous colors which we are sure would appeal to the Russian heart. Mr. Hoover tells us that a popular way to serve the top half and after removing the seeds, fill with dressing as you would a fowl, replace the top, and season. This is said to make a delicious dish.

LIBERALS MAKE A POPULAR CHOICE

When the Liberal Party in the Riding of York East, at its recent convention elected H. J. McConnell for its standard bearer in the present Provincial Elections they certainly made a good choice judging by the popular acclaim with which he is being received all over the Riding. Whether it is in the farming areas or the industrial districts the verdict is the same and can be well summed up in the words of a man who has lived in the Riding all his life, when he remarked "at last, the Liberal Party has brought forward a candidate whom all sections, whether farmer or worker, can get behind, because he has all the attributes of a real legislator." Born in Owen Sound some 44 years ago, of Methodist parents he played an active part in the community life of that town and it was during his successful career as a lacrosse and hockey player that he was christened "Mickey" by which name he is still known to many of his friends and associates. Coming down to the Toronto district many years ago he quickly forged ahead in the business world and at the present time is a valuable and highly respected member of the staff of a large oil company.

At his meetings in the south end of the Riding he has dealt very clearly and lucidly with the problems confronting the worker and small owner and has pledged himself if elected to sponsor legislation which will set up tribunals before which a home owner in the case of foreclosure being forced upon him shall have the right to appeal so that whatever equity he has in his home will receive protection.

With reference to mother's allowances he maintains that the present payments are too low because the cost of living has increased considerably since that time.

Dealing with the recent announcement of Premier Hepburn that the Liberal Party, if returned, will, at the next session of the Legislature, introduce unemployment insurance. Mr. McConnell has pledged himself to support this legislation one hundred per cent feeling that it is long overdue. At his meeting in Markham he surprised many of those present by his thorough understanding of the problems affecting the farmers in his Riding his statement that if he is elected he will support very much needed amendments to the Milk Control Act received very popular applause.

Dealing with Hepburn's Hydro Policy, which has saved thousands of dollars to the rural consumers through the reduction of the excessive service charges imposed upon them for many years, by the Henry Hydro Commission. Mr. McConnell will urge that the service charges be eliminated entirely, which would mean building many more miles of hydro lines in the farming areas. During the last year of the Henry Hydro Commission about 100 miles of lines were constructed in the farming areas, whilst last year, under the Hepburn Hydro Commission, over 2,000 miles were built, and entirely to Hepburn's Hydro Policy.

H. J. McConnell who has been well named, "a young man of action" has gathered around him during the campaign, men and women from all walks of life and all shades of opinion, and progressive thinkers all over the riding are enthusiastic because at last they are able to present a united front, behind a real fighting candidate. Victory for Liberalism in York East is in the air. We have given you the candidate; now you give him your vote. If you do, the 25 years of reactionary Tory domination in this Riding will be completely swept away.
