The weather this past week is so like spring that we feel in a holiday mood. It has been so warm that some fear is felt that vegetables may not be able to withstand it unless there is an immediate change. This is Monday afternoon.

A GOLDEN PHEASANT TAKES A REST  
Hundreds of Licensed Hunters May Shoot these Beautiful Birds on Friday and Saturday in Markham Twp.

**Heavy Demand for Pheasant Licenses**

The demand for licenses to shoot pheasants in Markham Township on Friday and Saturday of this week has been so great that the allotment has been exhausted. The deputy Minister of Game and Fisheries, James Taylor was unable to get two licenses when he applied, it is reported. Hunting will be permitted this year for two days only as stated above.

Blocks of five, ten and sometimes more licenses were booked in the name of single individuals to be disposed of among their friends when they became available for sale. Charles Hoover, Township Clerk who has charge of sale of the licenses, explained to applicants the mix-up occurred because nobody had any idea there would be such a big demand.

"Things will be different next year," Everett Harper, game warden, declared. "Blocks of licenses were promised to single individuals for the sake of convenience. For example, if a number of men in another municipality wanted licenses there wasn't any sense of having all of them make the trip to Unionville. So one man would come and reserve a block of 5 or 10 putting his name down for the block. Then when the licenses arrived from the department the man would give the names of 5 or 10 men and the licenses would be issued to them. The non-resident licenses were limited to 400 this year. It is unfortunate that so many Toronto hunters got the idea that they would be offered for sale last week.

"Toronto hunters who were disappointed got mad and accused the issuer of everything under the sun, but investigation shows that there was the best of intentions, although a mistake may have been made in the arrangements," said Mr. Harper.

Quite a number of farmers are putting no trespassing or no hunting signs on their premises, and if the pheasants could only read they would know where to spend the last two days of this week.
