GETTING RID OF BUTTER

There is a plan under way to get rid of the surplus butter in Canada by distributing it to the needy. The plan will be financed by the Dominion Government and the distribution will be under the auspices of existing organizations well fitted to attend to such matters.

The object is to take away the over-supply in order to give butter fat producers a chance to get a fair return for their product. The heavy producing season for butter is advancing and will soon be here and the desire is to clear the markets before the season arrives.

It will be another application of the bonus system, and it is doubtful if the benefits will be great unless there is a change made in our way of doing business. If the dairy farmers keep on turning to butter as they have in the past there is nothing to prevent them piling up another surplus by the end of the pasture season.

If they take the advice of men well fitted to give it, and turn their attention to cheese factories from May to October they will be finding a better output for their product; they will be making something which can be readily exported and sold, and they will also be doing their share at keeping the butter market from again becoming glutted.

SELLS PERCHERON

Wm. Rennie of the 10th concession of Markham sold one of his fine Percheron mares this week to Mr. George Rodanz for use on Burnbrae Farms at Ringwood. Mr. Rodanz paid a rather unusual price for this horse flesh, but Mr. Rennie always produces something nice along this line and it brings its reward. This Percheron mare will make a worthy addition to the Burnbrae stock.
