The Junior Institute will meet next Wednesday, November 13th at the home of Mrs. Arthur Steckley. The members are asked to bring with them the fruit canned for the Red Cross.

### Goodwood

The Goodwood Willing War Workers met at the home of Mrs. Charles Jones, opening with prayer, and a report given by the sec'y and treasurer. Plans were made to send Christmas boxes to our soldier boys in Iceland and England. Dress goods was given out to be made into children's clothes for refugees. A report was given on goods which have been shipped to the Salvation Army, including 3 large boxes of socks, sweaters, quilts, scarves, wristlets, pyjamas and children's dresses, and second hand clothing. The following letter dated October 7, from a local boy in England was read:

Dear Mrs. Rae and Friends:  
 Just a line to let you know that I received your most welcome box and I certainly appreciated it very much. It is nice to know that one is remembered at home. I am having a very nice time in England although it is marred somewhat by Jerry making a nuisance of himself so often. The reaction of the bombings on the English people is not what Hitler expected, they are not afraid but more determined than ever that Nazism be wiped out.

The rainy season has started here now and it is most miserable at times:

I am most terribly tired to-night, and I don't feel much like writing, so please forgive me for this short note. Thank all my friends for their kindness.

Yours very truly,  
 John T. Evans

## Make Bigger Profits

Bacon is what you make it. 85% of the cost of producing a bacon hog is the feed cost. Marmill and Master Pig Starters and Hog Concentrates and Rations are carefully built up to correct protein, mineral and vitamin balance to give the most economical gains and enable the farmer to get the greatest value out of home-grown grains.

### PIGGY PELLETS

# HOG CHOLERA

## —A MENACE!

**Active Co-operation of every Ontario Farmer is Necessary to STAMP IT OUT**

ONTARIO has a really serious outbreak of Hog Cholera. This deadly infectious disease of swine has reached alarming proportions in the counties of Essex and Kent, with smaller outbreaks in Lambton, Elgin, Norfolk and Haldimand. If the disease is not controlled it is certain to spread to neighbouring counties. Every precaution must be taken. The Ontario Department of Agriculture is actively co-operating with the Federal Department of Agriculture and farmers in their efforts to stamp out this disease.

If the spread of Hog Cholera is not checked NOW, every pig raiser in Ontario stands to lose. Only the immediate and wholehearted co-operation of every Ontario farmer will stamp out this menace to the hog industry.

### HOW TO PREVENT HOG CHOLERA

The Departments of Agriculture strongly recommend every pig raiser to take the following precautions:

1. Confine all hogs to pens or yards that have been thoroughly cleaned and disinfected with an approved disinfectant.
2. In centres of heavy infection, if possible, keep hogs away from straw stacks as this is a place usually frequented by birds such as starlings, sparrows, and pigeons, which may have come direct from an infected barnyard. Destroy as many pigeons, sparrows and starlings as possible.
3. Keep dogs out of the pig pen. Keep your dog under control in the daytime and tied up at night. Keep stray dogs off your farm.
4. Burn any dead pigs or bury them so deeply that stray dogs will not dig them up.
5. Keep all doors closed and protect the windows so that no dogs or birds can enter the pens.
6. Do not visit neighbours' hog pens nor allow neighbours to visit yours.
7. Always have a pan of strong disinfectant solution just inside the door so that anyone entering the pen can disinfect his shoes, AND INSIST ON ITS USE.
8. Keep livestock trucks off your farm—if you have stock to ship, load up at the end of the lane. Disease-bearing refuse dropping from the bottom of the truck might easily be carried to your hogs.
9. DO NOT PURCHASE "FEEDER HOGS" except from dependable sources within a clean district.
10. Isolate newly purchased breeding stock for at least three weeks before permitting them to run with hogs already on the premises.
11. In areas where hog cholera exists be extremely careful about breeding outside sows with your boar.
12. Where hogs are serum treated, follow to the letter instructions given by the Veterinary Inspector of the Federal Department of Agriculture.
13. Feed only carefully balanced rations. Well-fed hogs have the strongest resistance to disease.

Hog Cholera is highly contagious and can spread very rapidly. The above precautions, put into practice, TODAY, will do much to prevent the spread of this deadly disease.
