The Ful-O-Pep Plan Helps Poultrymen Save up to 30% to 50% on COST OF FEEDING NEW PULLETS

Some have asked why a commercial feed manufacturer advocates a plan of restricted feeding. The answer is simple. By advocating this basic principle in the Ful-O-Pep Rearing Plan, substantial economies are possible to alert poultrymen, and at the same time he can raise a stronger, healthier bird than by limited feeding.

With Ful-O-Pep Chick Starter and Growing Mash—so exceptionally rich in nutritive value—as a foundation of the Ful-O-Pep plan, poultrymen may complete the growing ration with whole oats and scratch grains, thus saving considerable money.

We believe this to be an important contribution to the practical poultryman's method of operation.
