Brampton town council has declared a six day open shooting season for starlings that have been playing havoc among the orchards in that place. Men armed with shot guns and rifles are being mustered for the attack, the town council supplying the ammunition. This bit of information is interesting to Stouffville residents who know all about the menace of starlings. Similar steps were taken here, by privately organized gangs, and the birds have left town for parts unknown. A couple of people staying at the home of Mr. and Mrs. Garfield Kellington were coming to town on Saturday to meet an afternoon bus, when they ran into the deep ditch at the corner of the ninth concession and the townline. The public library building is badly in need of a fresh coat of paint. If neglected any longer the building will deteriorate. We understand from members of the board that they have not the money to do this work, but it should be found, as the metal work around the top of the building is beginning to rust and may be ruined in another year. There is very little to paint on the building, and it would seem that some sort of economy could be found that would save enough money to attend to this work at once.

We have it from Mr. F. L. Button that our townsman Mr. A. C. Burkholder really does not spend all his vacation in Muskoka in fishing and swimming. On his recent vacation at Elgin House Mr. Button made a trip over to Port Carling and saw for himself that A. C. really finds work to do around his summer home, and so the inferences that those who are Muskoka bound every summer and entirely relieved of work, should be withdrawn. Mr. Burkholder will tell us that he didn't employ a lawyer to plead that he is not indifferent to work when in the North.
