One of the mockeries of our war effort is to witness a chap with a big V plastered on the windshield whizzing by you at 50 or 60 miles an hour. Conserving gasoline means nothing to him.

Labor day in town was scarcely recognized as a holiday other than that business places were closed and Main street did not have the customary cars parked by people doing business from out of town. The picture theatre provided the one line of entertainment for those seeking amusement.

Some farmers have the right idea. Their name is clearly printed on the mail box in front of their farm. They have also remembered that the speed of present-day travel makes it imperative that the name be in good-sized letters, so that it can be read at a glance. For many years most farmers have neglected to keep their name on their mail-boxes. This is a step in the right direction.

It has often been said that when it comes to a "brain job", two heads are better than one, and in this case three proved better. Misses Eulah Brillinger and Isobel Collard, and Mr. Donald Hodgins pooled their skill one day last week to guess the number in attendance on this particular day at the Exhibition. Their guess was just 300 short of the exact number, and the prize was a handsome meat slicer.

Rev. G. W. Brown, pastor of the Ringwood circuit and resident in town, occupying the Peter Lehman house on Rupert avenue, got the surprise of his life these recent weeks when he witnessed the thrifty peach tree on the property produce its crop. Now they are all picked, and believe it or not Mr. Brown gathered seventeen baskets of fruit from the single tree. They were taken off rather on the green side and ripened in the house, thus assuring them from being blown down. It would seem that peaches grew very well in Stouffville where a few trees are giving a good account of themselves, when producing in some sheltered spot.

The death of James W. Hewitt, aged 71, of Toronto, recalls the fact that he was the founder of the contracting firm of Hewitt & Sons who built the wing on our school building four years ago. A native of Orangeville, the late Mr. Hewitt will ever be remembered as a man who builded well. It was because of his thoroughness and sincere christian principals inculcated into the big contracts his firm handled that they became known as masters of the art, and a building erected by the firm of Hewitt & Sons will ever stand as a monument to them of which they may be justly proud.

More than 2,000,000 gallons of apple juice will be canned this year, Agriculture Department officials predict, establishing a record for one of Canada's youngest and most promising fruit industries. Successful canning of unfermented apple juice has been possible only since 1937 when a suitable acid-resistant lining was found for the cans, officials said. At about the same time a pasteurization process was developed to prevent fermentation without destroying the delicate fruit flavor. In the season 1937-38 about 128,000 gallons were canned according to departmental records, and as the product caught the public taste the amount jumped in the next year to 900,000 gallons. Last year the total was 1,500,000 gallons.

Donnie Davis, 10-year-old son of Rev. Douglas and Mrs. Davis of Stouffville had the thrill just before the family moved from King to Stouffville, of teaching the school teacher. Donnie assisted Stone's bakery there by working on their delivery truck, and when the labor shortage became so acute Miss Elizabeth McClure, teacher at Eversley, volunteered to drive the truck. It was Donnie's job to teach her where to go, what lanes to turn in and out, and just how to get around the thirty miles travelled. You see Donnie is only ten, and he is not allowed to drive a truck yet.
