Vegetables for winter use are best stored on a sand floor at temperature about three degrees above freezing, advises George Rush, Vegetable specialist of the Ontario Department of Agriculture, Toronto. However this is difficult where furnaces are used as the temperature is much higher and the air dry. If a portion of the basement could be shut off, roots could then be kept in good condition.

Another vegetable 'V' has been added to our list. Willis McNair of Goodwood dug a potato last week which has grown in perfect V formation. Mr. McNair not only produces winning potatoes, but also appears to be no mean hand with mangolds. One of these roots measured thirty-five inches in length and weighed in the vicinity of twenty pounds. The big sample had grown straight down for about half its length, and then made a direct right-angle turn.

The October meeting of the Garrett Evening Auxiliary was held at the home of Mrs. J. M. Storey. The guest speaker, Rev. A duet rendered by Jean Westlake and Marguerite Grubin, Miss Eva Hoover presided. A social half hour was enjoyed by all.

Thanksgiving Day was a very quiet holiday in town, but the weather was so bright and sunny that it was a pleasure just to be in it. Never has a Thanksgiving Day been observed in this country when the people had more to be thankful for, and he who failed to give thanks to his Creator for all these good things, is a hardened individual indeed. The town enjoyed quite a number of visitors, while many more spent the day away from home.

Help Yourself to Leaves
Residents who appreciate leaves for their gardens should help themselves to the piles that accumulate on Main street roadway. By doing so two good purposes would be accomplished, for it is no easy task to keep the leaves out of the storm sewer, and from blocking up the grates, then too you obtain the leaves or fertilizer. Best time to gather them is when they are wet and can easily be pushed into piles.

The Newmarket Era, consistently against the sale of booze in that town, fears that The Tribune may have been a bit prejudiced in its views about Bradford, because our paper is published in a "village of churches." We can assure The Era that we are not at all prejudiced on this issue, and perhaps are not as firm in our convictions as The Era on just how to handle the liquor evil, but such signs as one may see around beverage rooms in Bradford or any other place where the suds are dispensed under government law, drives us more and more into the "dry" column. However, our people will read with great interest the generous remarks offered Stouffville, its line of advertising men who do more than others to maintain the village in the front ranks of Ontario towns of equal size, and to its newspaper. The Era itself has won all the honors in its class of Ontario weeklies, while Editor Hebb's has filled the highest offices in the Ontario-Quebec division of the Canadian Weeklies, and is in a position to speak with considerable authority.

BRITAIN WANTS TO BUY More Eggs! BOOST PRODUCTION with Ful-O-Pep!

The door to profits is wide open to poultrymen today. Every extra egg means extra profits, so today feed hens a mash specially Vitamin-rich to help gear-up egg production and keep flocks healthy. At the same time thousands of successful poultrymen find by feeding one-third Ful-O-Pep Egg Mash, one-third scratch grain their feed costs as much as 15% to 20% less. Yet this ration is so wonderfully balanced in feed values, it helps hens maintain a high standard of health and vitality.

Retired minister of this town, Rev. J. W. Holmes, can do something besides preach the gospel and that is the highest calling of man. The twenty big tubers weighed 22 pounds, two ounces, lovely white clean murphies every one of them. Mr. Holmes reports that from 24 hills he dug, 72 pounds of potatoes. The seed was procured in Uxbridge township, but the parson couldn't give the name of the seed.

DOMINION WINDFALL APPLES

The big wind storm of two weeks ago blew to the ground almost half of Ontario's rich apple crop. Action was necessary to avoid appalling, sinful waste. Emergency meetings were held of Government Bodies, Growers and Distributors, and plans laid to market the fallen apples immediately. Dominion's 213 stores in Ontario immediately swung into action! Carloads were purchased—Special deliveries to stores were made—Large displays were built—Special selling effort organized—not a detail overlooked to speed the sale of this entire crop so that Ontario apple growers may receive their rightful return. It is our patriotic duty as Canadians, particularly during war time to wholeheartedly support "food emergencies" which might result in waste. Buy "Windfall" apples now. "Windfall" is a government grade. They will only be available for a few weeks.
