SAVE PAPER

WASTE paper is a valuable war material - don't throw it away or burn a scrap of it. Canada needs it - needs it badly - needs it NOW!

Paper wraps up the detonation charges in land mines - holds the charges of parachute flares in place - is used for wadding in cartridges. These are only a few of the direct war uses of waste paper.

Paperboard cartons are the most important shipping containers on this continent. They are made of waste paper. Shells, gas masks, munitions, field telephones, shell casings, food, clothing and other material are shipped to England in these cases. Thousands of them must be made, and made quickly.

This ever-increasing demand is causing an acute shortage of waste paper. It's a shortage which you can overcome by saving every scrap of paper and giving it regularly to your Salvage Committee.

Help provide the shipping cases!
